Academic Writing in a Second or Foreign Language Ramona Tang,2012-01-12 It can be a challenge writing in a language that is not your native tongue Constructing academic essays dissertations and research articles in this second or foreign language is even more challenging yet across the globe thousands of academics

and students do so some out of choice some out of necessity This book looks at a major issue within the field of English for Academic Purposes EAP It focuses on the issues confronting non native English speaking academics scholars and students who face increasing pressure to write and publish in English now widely acknowledged as the academic lingua franca Questions of identity access pedagogy and empowerment naturally arise This book looks at both student and professional academic writers using qualitative text analysis quantitative questionnaire data corpus investigations and ethnographic approaches to searchingly examine issues central to the EAP field      **Crossing Borders** Mimi Sheller, Kevin

Hannam, 2018-10-18 Crossing Borders examines how translocal transnational and internal borders of various kinds distribute uneven capabilities for moving dwelling and circulating The contributors offer nuanced understandings of the politics of mobility across various kinds of borders and forms of cultural circulation showing how people experience and practice crossing many different borders Several chapters draw on interviews and ethnographic methods to analyze transnational migration while others focus on material relations and cultural practices Rather than the usual narrative of mobility as a kind of freedom border crossing emerges here as an instrumental practice for building translocal livelihoods a tactic for simply getting by and a material practice potentially generating new forms of future sociality Ultimately these diverse perspectives on crossing borders offer new ways to think about the mobility of political relations and the politics of mobile relations in a world of growing circulation across borders but also flexible forms of re bordering This book was originally published as a special issue of *Mobilities*      *Global Mobility of Highly Skilled People* Driss Habti, Maria Elo, 2018-09-17 This volume

examines self initiated expatriates SIEs the category of highly skilled people whose movement from one country to another is by choice Although they are not forced to relocate due to work conflict or natural disaster their migration pattern is every bit as complex The book challenges previous theoretical approaches that take for granted a more simplistic view of this population and advances that mobility of SIEs relates to the expatriates themselves their conditions and the different structures intervening in their career life course With their visible increase worldwide this book positions itself as a nexus for this on going discussion while linking self initiated expatriation to the theoretical landscape of international skilled migration and mobility Major interests that catch attention are transnational practices work related experiences and personal life course including forms of inequalities in their migration experiences The book identifies forms and drivers of migratory behaviour and provides an argument concerning the broader processes of mobility and integration As such this book constitutes a departure point for future research in terms of theoretical underpinnings and empirical rigor on global highly skilled mobility of SIEs The collection of empirical case studies offers an insightful analysis for policy makers concerned stakeholders and organizations to better cope with this form of migration      Identifying the English Edward

Higgs, 2011-10-06 Personal identification is very much a live political issue in Britain and this book looks at why this is the case and why paradoxically the theft of identity has become ever more common as the means of identification have multiplied

Identifying the English looks not only at how criminals have been identified branding fingerprinting DNA but also at the identification of the individual with seals and signatures of the citizen by means of passports and ID cards and of the corpse Beginning his history in the medieval period Edward Higgs reveals how it was not the Industrial Revolution that brought the most radical changes in identification techniques as many have assumed but rather the changing nature of the State and commerce and their relationship with citizens and customers In the twentieth century the very different historical techniques have converged on the holding of information on databases and increasingly on biometrics and the multiplication of these external databases outside the control of individuals has continued to undermine personal identity security      **Essential**
