Past Perceptions:

Perceptions of the Past in the Early Middle Ages Rosamond McKitterick, 2006 In these essays McKitterick establishes that early medieval historians conveyed in their texts a sophisticated set of multiple perceptions of the past

Self and World Quassim Cassam, 1997-02-20 Self and World is an exploration of the nature of self awareness Quassim Cassam challenges the widespread and influential view that we cannot be introspectively aware of ourselves as objects in the world In opposition to the views of many empiricist and idealist philosophers including Hume Kant and Wittgenstein he argues that the self is not systematically elusive from the perspective of self consciousness and that consciousness of our thoughts and experiences requires a sense of our thinking experiencing selves as shaped located and solid physical objects in a world of such objects Awareness of oneself as a physical object involves forms of bodily self awareness whose importance has seldom been properly acknowledged in philosophical accounts of the self and self awareness The conception of self awareness defended in this book helps to undermine the idealist thesis that the self does not belong to the world and also the claim that the existence of subjects or persons is only a derivative feature of reality In the final part of the book Cassam argues that the existence of persons is a substantial fact about the world and that it is not possible to give a complete description of reality without claiming that persons exist This clear original and challenging treatment of one of the deepest of intellectual problems will demand the attention of all philosophers and cognitive scientists who are concerned with the self

Making Senses of the Past Jo Day, 2013-03-19 Since the nineteenth century museums have kept their artifacts in glass cases to better preserve them and drawings and photographs have become standard ways of presenting the past These practices have led to an archaeology dominated by visual description even though human interaction with the surrounding world involves the whole body and all of its senses In the past few years sensory archaeology has become more prominent and Making Senses of the Past is one of the first collected volumes on this subject This book presents cutting edge research on new theoretical issues The essays presented here take readers on a multisensory journey around the world and across time In ancient Peru a site provides sensory surprises as voices resound beneath the ground and hidden carvings slowly reveal their secrets In Canada and New Zealand the flicker of reflected light from a lake dances on the faces of painted rocks and may have influenced when and why the pigment was applied In Mesopotamia vessels for foodstuffs build a picture of a past cuisine that encompasses taste and social activity in the building of communities While perfume and flowers are examined in various cultures in the chamber tombs of ancient Roman Palestine we are reminded that not all smells are pleasant Making Senses of the Past explores alternative ways to perceive past societies and offers a new way of wiring archaeology that incorporates the senses

We're All Insane! Second Edition Kevin Everett FitzMaurice, 2012-06-25 This book helps you to understand how thought becomes a problem when thought replaces reality You discover enough information and examples to be able to negate thought as reality which enables you to re experience what is You can live

sanely in an insane world You just have to choose against the common illusions and delusions of your society and your conditioning All the common illusions and delusions of the world are constructed through the misunderstanding and misuse of thought Albert Ellis voted the second most influential psychologist of all time by the American Psychological Association APA said of the first edition of *We re All Insane* I found it a most unusual book that makes some excellent points almost all of which I go along with It sort of brings Alfred Korzybski up to date and makes some points which sic are not particularly clear in his own writings

Who Needs the Past? R. Layton,2012-11-12 This book offers a critique of the all pervasive Western notion that other communities often live in a timeless present Who Needs the Past provides first hand evidence of the interest non Western non academic communities have in the past

The Burden of the Past Kan Kimura,2019-01-29 The Burden of the Past reexamines the dispute over historical perception between Japan and South Korea going beyond the descriptive emphasis of previous studies to clearly identify the many independent variables that have affected the situation From the history textbook debates to the Occupation period exploitation of comfort women to the Dokdo Takeshima territory dispute and Yasukuni Shrine visits Professor Kimura traces the rise and fall of popular political and international concerns underlying these complex and highly fraught issues Utilizing Japanese and South Korean newspaper databases to review discussion of the two countries disputed historical perceptions from the end of World War II to the present The Burden of the Past provides readers with the historical framework and the major players involved offering much needed clarity on such polarizing issues By seeing behind the public discourse and political rhetoric this book offers a firmer footing for a discussion and the steps toward resolution

Reference and Consciousness John Campbell,2002-06-06 Campbell investigates how consciousness of the world explains our ability to think about the world He illuminates problems about thought reference and experience by looking at the psychological mechanisms on which conscious attention depends

Hume's Difficulty Donald L.M. Baxter,2012-11-12 In this volume the first focused study of Hume on time and identity Baxter focuses on Hume s treatment of the concept of numerical identity which is central to Hume s famous discussions of the external world and personal identity Hume raises a long unappreciated and still unresolved difficulty with the concept of identity how to represent something as a medium betwixt unity and number Superficial resemblance to Frege s famous puzzle has kept the difficulty in the shadows Hume s way of addressing it makes sense only in the context of his unorthodox theory of time Baxter shows the defensibility of that theory against past dismissive interpretations especially of Hume s stance on infinite divisibility Later the author shows how the difficulty underlies Hume s later worries about his theory of personal identity in a new reading motivated by Hume s important appeals to consciousness Baxter casts Hume throughout as an acute metaphysician and reconciles this side of Hume with his overarching Pyrrhonian skepticism

Consciousness Josh Weisberg, David Rosenthal, 2022-07-06 *CONSCIOUSNESS* Consciousness is a thought-provoking collection of classic and contemporary philosophical literature on consciousness, bringing together influential scholarship by seminal thinkers and the work of emerging voices who reflect the diversity of the field. Editors Josh Weisberg and David Rosenthal have selected discussions that animate modern debates and connect consciousness to broader philosophical topics. Providing an expansive view of the philosophical landscape of consciousness studies, this carefully calibrated reader features classic work from the past four decades by seminal thinkers such as Thomas Nagel, David Lewis, Ned Block, Gilbert Harman, and Daniel Dennett, as well as important recent work from David Chalmers, Fiona Macpherson, Joseph Levine, Kathleen Akins, and other contemporary philosophers. Divided into five parts, *Consciousness* explores the nature of consciousness, consciousness and knowledge, qualitative consciousness, and theories of consciousness. A final section on agency and physicalism includes work by Galen Strawson and a previously unpublished article by Myrto Mylopoulos. Philosophically challenging yet accessible to students, *Consciousness* is an ideal reader for many undergraduate and graduate courses on consciousness or philosophy of mind, as well as a useful supplementary text for general classes in philosophy and a valuable reference text for philosophers of mind, cognitive scientists, and psychologists.

Hume's Philosophy Of The Self Tony Pitson, 2005-06-29 First Published in 2002, *Personal Identity* lies at the very heart of Hume's philosophy but has received surprisingly limited attention. Hume's *Philosophy of the Self* is the first book to go beyond the famous section of the *Treatise Of Personal Identity* and explore the

fundamental concern with the Self that pervades all of Hume's work A E Pitson argues innovatively that this concern rests on a crucial distinction between two aspects of personal identity our thought and our passions Hume's Philosophy of the Self addresses issues fundamental to the study of eighteenth century thought the Scottish Enlightenment and naturalism and offers an essential new perspective on Hume's moral philosophy epistemology and philosophy of mind **Perceptions of the Past in Southeast Asia** Anthony Reid, David G. Marr, 1979 Freedom and Resentment and Other Essays P.F. Strawson, 2008-08-28 A collection of eleven essays by Sir Peter Strawson one of the twentieth century's most important philosophers **Proust, Beckett, and Narration** James H. Reid, 2003-10-13 This is a comprehensive comparison of the narrative techniques of two of the twentieth century's most important writers of prose Using a combination of theoretical analysis and close readings of Proust's *A la recherche du temps perdu* and Beckett's trilogy of novels *Molloy* *Malone Dies* and *The Unnamable* James H Reid compares the two novelists' use of first person narration in constructing and demystifying fictions of consciousness Reid focuses on the narrator's search to represent the voice that speaks the novel a search he argues that structures first person narration in the works of both novelists He examines in detail the significant impact of Proust's writing on Beckett's own work as well as Beckett's subtle reworkings of Proust's themes and strategies This study is an important contribution to critical literature and offers fresh perspectives on the crucial importance of the Recherche and the trilogy in the context of the twentieth century novel The Archaeology of Time Gavin Lucas, 2004-11-10 It might seem obvious that time lies at the heart of archaeology since archaeology is about the past However the issue of time is complicated and often problematic and although we take it very much for granted our understanding of time affects the way we do archaeology This book is an introduction not just to the issues of chronology and dating but time as a theoretical concept and how this is understood and employed in contemporary archaeology It provides a full discussion of chronology and change time and the nature of the archaeological record and the perception of time and history in past societies Drawing on a wide range of archaeological examples from a variety of regions and periods The Archaeology of Time provides students with a crucial source book on one of the key themes of archaeology Time and Memory Christoph Hoerl, Teresa McCormack, 2001 The 15 essays in this collection throw light on central issues in the study of the mind by uniting psychological and philosophical approaches dealing with the connection between temporal representation and memory Aristotle's Theory of Abstraction Allan Bäck, 2014-07-02 This book investigates Aristotle's views on abstraction and explores how he uses it In this work the author follows Aristotle in focusing on the scientific detail first and then approaches the metaphysical claims and so creates a reconstructed theory that explains many puzzles of Aristotle's thought Understanding the details of his theory of relations and abstraction further illuminates his theory of universals Some of the features of Aristotle's theory of abstraction developed in this book include abstraction is a relation perception and knowledge are types of abstraction the objects generated by abstractions are *relata* which can serve as subjects in their own right

whereupon they can appear as items in other categories The author goes on to look at how Aristotle distinguishes the concrete from the abstract paronym how induction is a type of abstraction which typically moves from the perceived individuals to universals and how Aristotle s metaphysical vocabulary is relational Beyond those features this work also looks at how of universals accidents forms causes and potentialities have being only as abstract aspects of individual substances An individual substance is identical to its essence the essence has universal features but is the singularity making the individual substance what it is These theories are expounded within this book One main attraction in working out the details of Aristotle s views on abstraction lies in understanding his metaphysics of universals as abstract objects This work reclaims past ground as the main philosophical tradition of abstraction has been ignored in recent times It gives a modern version of the medieval doctrine of the threefold distinction of essence made famous by the Islamic philosopher Avicenna
