Past Present And Future 2e:

Climate Change Jason Smerdon, 2009-04-25 Climate Change is geared toward a variety of students and general readers who seek the real science behind global warming. Exquisitely illustrated, the text introduces the basic science underlying both the natural progress of climate change and the effect of human activity on the deteriorating health of our planet. Noted expert and author Edmond A. Mathez synthesizes the work of leading scholars in climatology and related fields and he concludes with an extensive chapter on energy production anchoring this volume in economic and technological realities and suggesting ways to reduce greenhouse gas emissions. Climate Change opens with the climate system fundamentals: the workings of the atmosphere and ocean, their chemical interactions via the carbon cycle, and the scientific framework for understanding climate change. Mathez then brings the climate of the past to bear on our present predicament, highlighting the importance of paleoclimatology in understanding the current climate system. Subsequent chapters explore the changes already occurring around us and their implications for the future. In a special feature, Jason E. Smerdon, associate research scientist at Lamont-Doherty Earth Observatory of Columbia University, provides an innovative appendix for students.

Dalits Anand Teltumbde, 2016-08-19 This book is a comprehensive introduction to dalits in India who comprise over one sixth of the country's population from the origins of the caste system to the present day. Despite a plethora of provisions for affirmative action in the Indian Constitution, dalits are largely excluded from the mainstream except for a minuscule section. The book traces the multifarious changes that befell them during the colonial period and their development thereafter under the leadership of Babasaheb Ambedkar in the centre of political arena. It looks at hitherto unexplored aspects of the degeneration of the dalit movement during the post-Ambedkar period as well as salient contemporary issues such as the rise of the Bahujan Samaj Party, dalit capitalism, the occupation of dalit discourse by NGOs, neoliberalism and its impact, and the various implicit or explicit emancipation schemas thrown up by them. The work also discusses ideology, strategy and tactics of the dalit movement, touches upon one of the most contentious issues of increasing divergence between the dalit and Marxist movements, and delineates the role of the state both colonial and post-colonial in shaping dalit politics in particular ways. A tour de force, this book brings to the fore many key contemporary concerns and will be of great interest to students, scholars, and teachers of politics and political economy, sociology, history, social exclusion studies, and the general reader. Heed my words brothers and shrug them off as mumblings of a madman I came to tell you that we do not need to understand things we do not need to understand things because we have not yet created anything It is true that it seems like we are surrounded by realities and that we seem ready to accept things as they are because our wills are restrained that we are so afraid of failure that we not even dare venture forth So stand with me use the language divine and let us see together what it will bring I herald not only a new language but also a new life full of things that are the creation of our own wills

Experiencing Time Simon Prosser,2016-04-29 Our engagement with time is a ubiquitous feature of our lives We are aware of time on many scales from the briefest flicker of change to the way our lives unfold over many years But to what extent does this encounter reveal the true nature of temporal reality To the extent that temporal reality is as it seems how do we come to be aware of it And to the extent that temporal reality is not as it seems why does it seem that way These are the central questions addressed by Simon Prosser in Experiencing Time These questions take on a particular importance in philosophy for two reasons Firstly there is a view concerning the metaphysics of time known as the B theory of time according to which the apparently dynamic quality of change the special status of the present and even the passage of time are all illusions Instead the world is a four dimensional space time block lacking any of the apparent dynamic features of time If the B theory is correct as the book argues then it must be explained why our experiences seem to tell us otherwise Secondly experiences of temporal features such as changes rates and durations are of independent interest because of certain puzzles that they raise the solutions to which may shed light on broader issues in the philosophy of mind **Mining and Engineering World** ,1908 The Mining World ,1908
