Epistemological Beliefs and Critical Thinking in Mathematics Benjamin Rott, 2021-08-30 Epistemological beliefs and beliefs on the nature of knowledge its limits sources and justification play an important role both in everyday life and in learning processes This book comprises several studies dealing with such beliefs in the domain of mathematics amongst others a qualitative interview study and quantitative studies for which a new questionnaire has been developed In this new instrument belief positions e.g mathematical knowledge is certain vs uncertain and belief argumentation the way those positions are justified are differentiated Additionally a test for mathematical critical thinking has been designed The results show significant correlations between sophisticated belief argumentations and high scores in the critical thinking test but no correlations regarding belief positions

Views and Beliefs in Mathematics Education Carola Bernack-Schüler, Ralf Erens, Timo Leuders, Andreas Eichler, 2015-05-05 International mathematics education researchers give a differentiated overview of views and beliefs of both teachers and students Beliefs about how to teach mathematics have a high impact on the instructional practice of teachers In the same way views and beliefs about mathematics are an essential factor to explain achievement and performance of students The 19th MAVI conference added a variety of research perspectives to the international discussions of mathematics related beliefs The authors of this volume have compiled a rich selection of research

results which may further enhance the discussion of MAVI topics in the future Wozu Mathe in den Wirtschaftswissenschaften?
