Pastoral Landscape:

Studies in the History of Art ,1992 The Pastoral Landscape John D. Hunt,1998-09-10 **Studies in the History of Art** ,1992 Pastoral Capitalism Louise A. Mozingo,2016-05-27 How business appropriated the pastoral landscape as seen in the corporate campus the corporate estate and the office park By the end of the twentieth century America s suburbs contained more office space than its central cities Many of these corporate workplaces were surrounded somewhat incongruously by verdant vistas of broad lawns and leafy trees In Pastoral Capitalism Louise Mozingo describes the evolution of these central but often ignored features of postwar urbanism in the context of the modern capitalist enterprise These new suburban corporate landscapes emerged from a historical moment when corporations reconceived their management structures the city decentralized and dispersed into low density auto dependent peripheries and the pastoral in the form of leafy residential suburbs triumphed as an American ideal Greenness writes Mozingo was associated with goodness and pastoral capitalism appropriated the suburb s aesthetics and moral code Like the lawn proud suburban homeowner corporations understood a pastoral landscape s capacity to communicate identity status and right mindedness Mozingo distinguishes among three forms of corporate landscapes the corporate campus the corporate estate and the office park and examines suburban corporate landscapes built and inhabited by such companies as Bell Labs General Motors Deere Company and Microsoft She also considers the globalization of pastoral capitalism in Europe and the developing world including Singapore India and China Mozingo argues that even as it is proliferating pastoral capitalism needs redesign as do many of our metropolitan forms for pressing social cultural political and environmental reasons Future transformations are impossible however unless we understand the past Pastoral Capitalism offers an indispensable chapter in urban history examining not only the design of corporate landscapes but also the economic social and cultural models that determined their form **Arcadian Visions** Allan R. Ruff,2015-10-31 This book is about Arcadia and the pastoral tradition what it has meant for successive generations and their vision of the landscape as well as the implications this has had for its design and management Today the concept of Arcadia and way it has shaped our landscape is dimly perceived and little understood by landscape architects and those responsible for the management of land This is in marked contrast to previous centuries when the vision of Arcadia and the pastoral was implanted by education among the more privileged in society Young men spent many hours translating and learning by rote the words of Virgil and other classical authors and on the Grand Tour they would be introduced to work of painters like Poussin and Claude and their interpretations of the Ideal pastoral landscape Today Arcadia holds as powerful an influence as at any time in the past and it is important that we plan our urban environment in ways that harmonize with the natural world Arcadian Visions provides an alternative landscape history for all those involved with the landscape either through its design management use or enjoyment It begins by examining the origins of Arcadia and the pastoral in the classical poetry of Theocritus and Virgil and the effects of and on Christianity before outlining its

development in renaissance Italy and subsequently in the Netherlands America and England It concludes by looking at how Arcadian ecology is bringing about a reappraisal of the pastoral in the 21st century **PLACES OF DELIGHT**, 1988

The Pastoral Landscape D.C.) Center For Advanced Study In The Visual Arts (Washington, 1992 **Pastoral and Monumental** Donald Conrad Jackson, 2013 In *Pastoral and Monumental* Donald C Jackson chronicles America's longtime fascination with dams as represented on picture postcards from the late nineteenth to the mid twentieth century Through over four hundred images Jackson documents the remarkable transformation of dams and their significance to the environment and culture of America Initially dams were portrayed in pastoral settings on postcards that might jokingly proclaim them as a dam pretty place But scenes of flood damage dam collapses and other disasters also captured people's attention Later images of New Deal projects such as the Hoover Dam Grand Coulee Dam and Norris Dam symbolized America's rise from the Great Depression through monumental public works and technological innovation Jackson relates the practical applications of dams describing their use in irrigation navigation flood control hydroelectric power milling mining and manufacturing He chronicles changing construction techniques from small timber mill dams to those more massive and more critical to a society dependent on instant access to electricity and potable water Concurrent to the evolution of dam technology Jackson recounts the rise of a postcard culture that was fueled by advances in printing photography lowered postal rates and America's fascination with visual imagery In 1910 almost one billion postcards were mailed through the U S Postal Service and for a period of over fifty years postcards featuring dams were all the rage Whether displaying the charms of an old mill the aftermath of a devastating flood or the construction of a colossal gravity dam these postcards were a testament to how people perceived dams as structures of both beauty and technological power **The Landscape of**

Pastoral Care in 13th-Century England William H. Campbell, 2018 Examines how thirteenth century clergymen used pastoral care preaching sacraments and confession to increase their parishioners religious knowledge devotion and expectations Charting the Plantation Landscape from Natchez to New Orleans Laura Kilcer VanHuss, 2021-05-05

Charting the Plantation Landscape from Natchez to New Orleans examines the hidden histories behind one of the nineteenth century South's most famous maps Norman's Chart of the Lower Mississippi River created by surveyor Marie Adrien Persac before the Civil War and used for decades to guide the pilots of river vessels Beyond its purely cartographic function Persac's map depicted a world of accomplishment and prosperity while concealing the enslaved and exploited laborers whose work powered the plantations Persac drew In this collection contributors from a variety of disciplines consider the histories that Persac's map omitted exploring plantations not as sites of ease and plenty but as complex legal political and medical landscapes Essays by Laura Ewen Blokker and Suzanne Turner consider the built and designed landscapes of plantations as they were structured by the logics and logistics of both slavery and the effort to present a facade of serenity and wealth William Horne and Charles D Chamberlain III delve into the political activity of formerly enslaved people and slaveholders

respectively while Christopher Willoughby explores the ways the plantation health system was defined by the agro industrial environment Jochen Wierich examines artistic depictions of plantations from the antebellum years through the twentieth century and Christopher Morris uses the famed Uncle Sam Plantation to explain how plantations have been memorialized remembered and preserved With keen insight into the human cost of the idealized version of the agrarian South depicted in Persac s map Charting the Plantation Landscape encourages us to see with new eyes and form new definitions of what constitutes the plantation landscape *The Languages of Landscape* ,1997 **Agricultural and Pastoral Landscapes in Pre-Industrial Society** Fèlix Retamero,Inge Schjellerup,Althea Davies,2014-12-01 Through a series of case studies this third volume in the Earth series deals with the technological constraints and innovations that enabled societies to survive and thrive across a range of environmental conditions The contributions are structured into three sections to draw out particular commonalities and contrasts in the choices made by pre industrial communities in the construction of varied landscapes and cultural heritage Landnam from the Old Norse for taking of land deals with colonization including the drivers and processes through which colonizers developed an understanding of the productive potential and limitations of their new lands Fields and field systems Field walls are a distinctive and apparently timeless characteristic of many pre industrial farming landscapes but they present many the challenges to their study such as the effects of plowing abandonment and land use change and of urban development in fertile lowland zones which may eradicate reduce or conceal past systems of land use and division The importance of indirect and proxy evidence is illustrated and the value of interdisciplinary and modeling approaches emphasized Agro pastoralism focuses on the complex time space adaptations devised for managing cultivation and livestock production particularly the need to prevent stock incursions into arable fields during the growing season whilst making effective use of seasonal grazing resources The contributions focus on mountainous areas where temporary migrations in the form of transhumance provided access to a diversity of resources based around seasonal constraints on their availability and productivity **Landscape and Western Art** Malcolm Andrews,1999 This book explores many issues raised by the range of ideas and images of the natural world in Western art since the Renaissance The whole concept of landscape is examined as a representation of the relationship between the human and natural worlds Featured artists include Claude Freidrich Turner Cole and Ruisdael and many different forms of landscape art are addressed such as land art painting photography garden design panorama and cartography **Pasture Landscapes and Nature Conservation** Bernd Redecker,Werner Härdtle,Peter Finck,Uwe Riecken,Eckhard Schröder,2002-05-28 One of the main problems and aims of nature conservation in Europe is to protect semi open landscapes The development during the past decades is characterized by an ongoing intensivation of land use on the one hand and an increasing number of former meadows and pastures lying fallow caused by changing economic conditions on the other hand In several countries the establishment of larger pasture landscapes with a mixed character of open grassland combined with shrubs and forests has been recognized as one solution

to this problem The book gives an overview of the European projects concerning to this topic nature conservation policy and strategies scientific results and practical experiences creating large scale grazing systems **Natural States** Richard W. Judd,2010-09-30 Richard Judd and Christopher Beach define the environmental imagination as the attempt to secure a sense of freedom permanence and authenticity through communion with nature The desire for this connection is based on ideals about nature wilderness and the livable landscape that are personal variable and often contradictory Judd and Beach are interested in the public expression of these ideals in post World War II environmental politics Arguing that the best way to study the relationship between popular values and politics is through local and regional records they focus on Maine and Oregon states both rich in natural beauty and environmentalist traditions but distinct in their postwar economic growth Natural States reconstructs the environmental imagination from public commentary legislative records and other documents Judd and Beach trace important divisions within the environmental movement noting that they were balanced by a consistent civic minded vision of environmental goods shared by all They demonstrate how tensions from competing ideals sustained the movement contributed to its successes but also limited its achievements In the process they offer insight into the character of the broader environmental movement as it emerged from the interplay of local state and national politics The study ends in the 1970s when spectacular legislative achievements at the national level were masking a decline in mainstream civic engagement in state politics The authors note the rise of the private ecotopia and the increasing complexity in the way Americans viewed their connections with the natural world Yet today despite wide variations in beliefs and lifestyles a majority of Americans still consider themselves to be environmentalists In Natural States environmental politics emerges less as a conflict between people who do and do not value nature and more as a debate about the way people define and then chose to live with nature In their attempt to place the passion for nature within a changing political and cultural context Judd and Beach shed light on the ways that ideals unify and divide the environmental movement and act as the source of its enduring popularity **Baroque Garden Cultures** Michel Conan,2005 Baroque Garden Cultures proposes a new approach to the study of baroque gardens examining the social reception of gardens as a means to understand garden culture in general and exploring baroque gardens as a feature of baroque cultures in particular **Places of Delight** Robert C. Cafritz,David Rosand,1988 *Pastoralist Landscapes and Social Interaction in Bronze Age Eurasia* Michael David Frachetti,2009-01-05 Offering a fresh archaeological interpretation this work reconceptualizes the Bronze Age prehistory of the vast Eurasian steppe during one of the most formative and innovative periods of human history Michael D Frachetti combines an analysis of newly documented archaeological sites in the Koksu River valley of eastern Kazakhstan with detailed paleoecological and ethnohistorical data to illustrate patterns in land use settlement burial and rock art His investigation illuminates the practical effect of nomadic strategies on the broader geography of social interaction and suggests a new model of local and regional interconnection in the third and second millennia B C E Frachetti further argues that these early

nomadic communities played a pivotal role in shaping enduring networks of exchange across Eurasia The Unchosen Ones

R. J. Kern, In 2016 award winning Minnesota based photographer R J Kern made portraits of youth contestants at Minnesota county fairs Each participant some as young as four years old had spent a year raising an animal which they had then entered into a 4 H livestock competition None of the youths who sat for him had succeeded in winning an award despite the obvious care they had given to their animals The Unchosen Ones depicts the bloom of youth and the mettle of the kids who grow up on farms reminding us how resilient children can be when confronted with life s inevitable disappointments The formal qualities of the lighting and setting endow these young people with a gravitas beyond their years revealing self directed dedication in some and in others perhaps the pressures of traditions imposed upon them Kern s beautiful portraits capture a particular America a rural world and a time in life when the layered emotions of youth are laid bare Four years later in 2020 Kern returned to photograph his young subjects The most recent photographs show how the children have grown into adolescence or young adulthood some of them have continued to pursue animal husbandry while others have developed other interests It is likely that some of these kids will not choose to continue running their family farms an unpredictable and demanding way to make a living These diptychs are punctuated by lush landscapes of the farms that are their homes As Kern made the second group of photographs he asked his young subjects what they had carried forward from their previous experience What were their thoughts their dreams and their goals for the future How would they fit into the future of agricultural America **Roman Landscape: Culture and Identity** Diana Spencer,2010 This survey explores how and why Romans of the late Republic and early Principate were fascinated with landscaped nature Thematic discussions and case studies work through what landscape represented and how studying Roman identity in terms of place environment and the natural world helps us better to understand Rome itself
