Deadly Doctrine Wendell Watters, 1992-12 The Christian religion presents itself as the way to contentment spiritual health and salvation But is this really true Dr Wendell Watters offers a powerful argument based on his many years of clinical experience with individuals couples and families that Christianity's influence actually militates against human development in such vital areas as self esteem sexuality and social interactions The tragic end result of Christian conditioning is too often antisocial behavior sexual dysfunction poor psychological development anxiety and even major psychiatric illness Christian indoctrination is not simply a problem affecting individuals or single families the noxious effects of its teachings over nearly two millennia pervade society at large even those who are not Christians and in ways that seriously undermine human welfare and the quality of life Christianity's aggressive pronatalist policies have encouraged large families despite parents inability to cope either emotionally or financially With this the Christian church has formulated rigid sexual roles forbidding all practices not leading directly to conception By actually promoting sexual ignorance and irresponsibility Christianity has allowed the proliferation of such social ills as rape child molestation and pornography In the face of so much human suffering resulting from Christian doctrine it is imperative that health care professionals recognizing the Christian belief system as an addictive disease develop a religious status examination to help evaluate how notions about life derived from Christian god talk compromise individuals healthy functioning In failing to determine the role of oppressive religious beliefs in mental

illness physicians and other health care workers actually promote Christianity's continued stranglehold on human happiness and self fulfillment *Proceedings of the Society for Psychical Research* Society for Psychical Research (Great Britain),1925
