Geomorphological Landscapes of the World Piotr Migon, 2010-01-22 Physical landscapes are one of the most fascinating facets of our Planet which tell stories about the evolution of the surface of the Earth This book provides up to date information about the geomorphology of the selected classic sites from around the world and shows the variety of geomorphological landscapes as moulded by different sets of processes acting over different timescales from millions of years to days The volume is written by nearly fifty geomorphologists from more than twenty countries who for many years have researched some of the unique sceneries on the planet The thirty six chapters present each continent of the world They describe landscapes of different origin so that the reader can learn about the complexity of processes behind the sceneries This is a useful reference book linking geomorphology with global initiatives focused on nature conservation *South American Contributions to World Archaeology* Mariano Bonomo, Sonia Archila, 2021-11-08 This book focuses on South American archaeology and its contributions to the broader global archaeological discussion in theory methods and new interpretations of the archaeological record These include discussions on human peopling and colonization of the continent domestication of plants and emergence of complex societies This volume covers a wide variety of sub disciplines in archaeology including archaeobotany zooarchaeology molecular archaeology bioarchaeology geoarchaeology The chapters span from the pre Columbian to contemporaneous indigenous societies for all the main geographical and ecological zones of South America The book discusses how particular cases of South American archaeology have contributed to the understanding of a global and basic issue human relations with their environments and landscapes during the past The authors focus on the latest results produced by multidisciplinary studies carried out at archaeological sites in several areas of South America ranging from studies of early hunter gatherers through the historic period This work would be of interest to

researchers in archaeology and Latin American studies

The Southernmost End of South America Through

Cartography Luis Ignacio de Lasa, María Teresa Luiz, 2021-01-19 This volume describes the construction of the territorial identity of the southern end of South America and analyzes the cartographic territorialization of Patagonia Tierra del Fuego and the Terra Australis continent Different spatial representations and territorial nature coexisted in this process as a result of the spatial interpretation and value modes as well as the projects and strategies of various actors The book discusses the formal and symbolic incorporation to the Spanish dominion and its inclusion in the imperial design built over a new image of the world Examining Jesuit cartography it considers both the indigenous territoriality and the dynamics of relations between natural and social components in the continental hinterland The process of cartographic differentiation for this southern Atlantic region is analyzed in the framework of early Antarctic exploration and competing use of navigation routes and maritime resources The book emphasizes the role geopolitical and economic interests play in these developments The formation of territorialities of various origins has particular contents and logic which are built upon imaginary subordination to political and economic interests Cartographic language in the 19th century associated with political and commercial motivations and the British imperial ideology stimulated the territorial expansion The book argues why in the late 1800 s this was an important factor in the integration process of the southern indigenous territories and the national territoriality

Sex, Skulls, and Citizens Ashley Kerr, 2020-03-15 PROSE Awards Subject Category Finalist Biological Anthropology Ancient History and Archaeology 2021 Best Nineteenth Century Book Award Latin American Studies Association Nineteenth Century Section 2021 Analyzing a wide variety of late nineteenth century sources Sex Skulls and Citizens argues that Argentine scientific projects of the era were not just racial encounters but were also conditioned by sexual relationships in all their messy physical reality The writers studied here an eclectic group of scientists anthropologists and novelists including Estanislao Zeballos Lucio and Eduarda Mansilla Ramón Lista and Florence Dixie reflect on Indigenous sexual practices analyze the advisability and effects of interracial sex and use the language of desire to narrate encounters with Indigenous peoples as they try to scientifically pinpoint Argentina's racial identity and future potential Kerr's reach extends into history of science literary studies and history of anthropology illuminating a scholarly time and place in which the lines betwixt were much blurrier if they existed at all

The Desertmakers Javier Uriarte, 2019-10-29 This book studies how the rhetoric of travel introduces different conceptualizations of space and time in scenarios of war during the last decades of the 19th century in Argentina Brazil Paraguay and Uruguay By examining accounts of war and travel in the context of the consolidation of state apparatuses in these countries Uriarte underlines the essential role that war in connection to empire and capital has played in the Latin American process of modernization and state formation In this book the analysis of British and Latin American travel narratives proves particularly productive in reading the ways in which national spaces are reconfigured reimagined and reappropriated by the state apparatus War turns out to be a central instrument not just for

making possible this logic of appropriation but also for bringing temporal notions such as modernization and progress to spaces that were described albeit problematically as being outside of history The book argues that wars waged against deserts as Patagonia the sert o Paraguay and the Uruguayan countryside were described and imagined were in fact means of generating empty spaces real voids that were the condition for new foundations The study of travel writing is an essential tool for understanding the transformations of space brought by war and for analyzing in detail the forms and connotations of movement in connection to violence Uriarte pays particular attention to the effects that witnessing war had on the traveler s identity and on the relation that is established with the oikos or point of departure of their own voyage Written at the intersection of literary analysis critical geography political science and history this book will be of interest to those studying Latin American literature Travel Writing and neocolonialism and Empire writing

Ice Age Southern Andes C.J. Heusser, 2003-11-12 The Southern Andes stretching from the subtropics to the subantarctic are ideally located for palaeoenvironmental research Over the broad and continuous latitudinal extent of the cordillera 24 vegetation is adjusted to climatic gradients and atmospheric circulation patterns Opposed to the prevailing Southern Westerlies the Southern Andes are positioned to receive the brunt of the winds while biota are set to record the shifting of incoming storm systems over time Sequential latitudinally placed sedimentary deposits containing microfossils and macroremains as archives of past vegetation and climate make possible the detection of equatorward and poleward displacement of plant communities and as a consequence changes in climatic controls No terrestrial setting in the Southern Hemisphere is so unique for palaeoenvironmental reconstruction during and since the last ice age Twenty radiocarbon dated fossil pollen and spore records chosen to place emphasis on the last ice age include high resolution submillennial data sets that also cover the

Holocene thus providing contrast between present interglacial and past glacial ages From a refined data base the records constitute the foundation for interpreting factors responsible for vegetation change over 50 000 14C years glacial interglacial migration and refugial patterns for a diversity of taxa and the extent of intrahemispheric and polar hemispheric synchronicity versus asynchronicity *Climate Change and Human Responses* Gregory Monks,2017-03-21 This book contributes to the current discussion on climate change by presenting selected studies on the ways in which past human groups responded to climatic and environmental change In particular the chapters show how these responses are seen in the animal remains that people left behind in their occupation sites Many of these bones represent food remains so the environments in which these animals lived can be identified and human use of those environments can be understood In the case of climatic change resulting in environmental change these animal remains can indicate that a change has occurred in climate environment and human adaptation and can also indicate the specific details of those changes *Colonisation, Migration, and Marginal Areas* Mariana Mondini,Sebastián Munoz,Stephen Wickler,2017-01-23 Human migration tends to involve more than the odd suitcase or two we often carry other organisms on our travels some are deliberately transported others move by accident This volume of 12 papers offers a zooarchaeological approach to questions surrounding the nature and extent of human colonization and migration and the adaptation of humans to new and sometimes extreme or challenging environments The volume is divided into two parts Part 1 takes up the theme of Human and Animal Migration and Colonisation Contributors consider the relationship between human movements and the movements of animals and animal products case studies look at Neolithic population movements in Oceania the Norse colonization of Greenland and the European settlement of Virginia Part 2 focuses on the topic of Behavioural Variability in the So Called Marginal Areas Contributors offer various interpretations of the concept of marginality from climatic extremes of the Arctic cold and the heat and aridity of western North America to the geographical remoteness of Patagonia and the cultural circumstances surrounding the beginnings of transhumant pastoralism in prehistoric southeastern Europe **Grasslands of the World** Food and Agriculture Organization of the United Nations,2005-01-01 This book brings together information on the contrasting characteristics condition present use and problems of the world s main natural grasslands Since grassland is commercialized through the grazing animal particular attention is paid to the livestock production systems associated with each main type Grazing resources are more than simply edible herbage many other factors have to be taken into account notably water in all areas and shelter in winter cold climates Seasonality of forage supply is a characteristic of almost all grazing lands so the strategies for dealing with lean seasons are described The main problems of each type are mentioned and possible strategies for their sustainable management discussed taking into account their multiple functions not only livestock production The book is primarily aimed at agricultural scientists educationalists extensionists and decision makers with interests in responsible use of extensive grasslands **Growth of the Southern Andes** Andrés Folguera,Maximiliano Naipauer,Lucía Sagripanti,Matías C.

Ghiglione, Darío L. Orts, Laura Giambiagi, 2015-11-27 This book presents recent findings on the structure and evolution of the Southern Andes Through a detailed description of a series of orogenic segments reviewed by the different groups that have worked with structural and geophysical tools in each area over the last several years it illustrates the diversity of mechanisms that have impacted strong orogenic gradients and consequently mountain morphology from the southern Pampean flat subduction zone to the southern tip of the continent 33 56o S The book also revises our conventional understanding of the source of the different Mesozoic to Cenozoic sections exhumed in the orogenic wedge with the objective of discussing basin mechanisms through time A final chapter discusses probable orogenic controls that have acted together in order to explain structure the different deformational stages and intra orogenic extensional collapses that affected the fold and thrust belt over time

Britain and the Making of Argentina Gordon A. Bridger, 2013 The author reminds us all of the huge part that British capital British people and British technology played in transforming Argentina into a modern 20th century economy He also analyses the reasons for Argentina's loss of momentum in the post war world Much of the history has been forgotten and or misjudged That does not make it any less important In fact it deserves to be recognised as there are lessons that could be learned from the golden decade of development Those who have an interest in history and development especially in Argentina including academics journalists historians and economists will all find this economic and social history of interest
