## **Pataphysics The Poetics Of An Imaginary Science:**

**'Pataphysics** Christian Bok, 2002 Pataphysics the pseudoscience imagined by Alfred Jarry has so far because of its academic frivolity and hermetic perversity attracted very little scholarly or critical inquiry and yet it has inspired a century of experimentation Tracing the place of pataphysics in the relationship between science and poetry Christian B k shows it is fundamental to the nature of the postmodern and considers the work of Alfred Jarry and its influence on others A long overdue critical look at a significant strain of the twentieth century avant garde Pataphysics The Poetics of Imaginary Science raises important historical cultural and theoretical issues germane to the production and reception of poetry the ways we think about write and read it and the sorts of claims it makes upon our understanding Poetics of Liveliness Ada Smailbegović, 2021-10-29 Can poetry act as an aesthetic amplification device akin to a microscope through which we can sense minute or nearly imperceptible phenomena such as the folding of molecules into their three dimensional shapes the transformations that make up the life cycle of a silkworm or the vaporous movements that constitute the ever shifting edges of clouds We tend to think of these subjects as reserved for science but as Ada Smailbegović argues twentieth and twenty first century writers have intermingled scientific methodologies with poetic form to reveal unfolding processes of change Their works can be envisioned as laboratories within which the methodologies of experimentation natural historical description and taxonomic classification allow poetic language to register the rhythms and durations of material transformation Poetics of Liveliness moves across scales to explore the realms of molecules fibers tissues and clouds It investigates works such as Christian B k s insertion of a poetic text into the DNA code of living bacteria in order to generate a new poem in the shape of a protein molecule Jen Bervin s considerations of silk fibers and their use in biomedicine Gertrude Stein s examination of brain tissues in medical school and its subsequent influence on her literary taxonomies of character and Lisa Robertson s studies of nineteenth century meteorology and the soft architecture of clouds In their attempt to understand physical processes unfolding within lively material worlds Smailbegović contends these poets have developed a distinctive materialist poetics Structured as a poetic cosmology akin to Lucretius s *On the Nature of Things* which begins at the atomic level and expands out to the vastness of the universe Poetics of Liveliness provides an innovative and surprising vision of the relationship between science and poetry *'Pataphysics Unrolled* Katie L. Price, Michael R. **Parallels and Responses to Curricular Innovation** Brad Petitfils, 2014-10-24 This volume explores two radical shifts in history and subsequent responses in curricular spaces the move from oral to print culture during the transition between the 15th and 16th centuries and the rise of the Jesuits and the move from print to digital culture during the transition between the 20th and 21st centuries and the rise of what the philosopher Jean Baudrillard called hyperreality The curricular innovation that accompanied the first shift is considered through the rise of the Society of Jesus the Jesuits These men created the first global network of education and developed a humanistic curriculum designed to help students navigate a complicated era of the known human centered and unknown God centered universe The curricular innovation that is proposed for the current shift is guided by the question What should be the role of undergraduate education become in the 21st century Today the tension between the known and unknown universe is concentrated on the interrelationships between our embodied spaces and our digitally mediated ones As a result today s undergraduate students should be challenged to understand how in the objectively focused commodified STEM centric landscape of higher education the human subject is decentered by the forces of hyperreality and in turn how the human subject might be recentered to balance our humanness with the new realities of digital living Therein one finds the possibility of posthumanistic education

**From Text to Txtng** Paul Budra, Clint Burnham, 2012-07-25 Literary scholars face a new and often baffling reality in the classroom students spend more time looking at glowing screens than reading printed text The social lives of these students take place in cyberspace instead of the student pub Their favorite narratives exist in video games not books How do teachers who grew up in a different world engage these students without watering down pedagogy Clint Burnham and Paul Budra have assembled a group of specialists in visual poetry graphic novels digital humanities role playing games television studies and yes even the

middle brow novel to address this question Contributors give a brief description of their subject investigate how it confronts traditional notions of the literary and ask what contemporary literary theory can illuminate about their text before explaining how their subject can be taught in the 21st century classroom      **From Cohen to Carson** Ian Rae,2008-03-26 From Cohen

edition of the MLA s widely used *Introduction to Scholarship in Modern Languages and Literatures* features sixteen new essays by leading scholars Designed to highlight relations among languages and forms of discourse the volume is organized into three sections Understanding Language provides an overview of the field of linguistics with special attention to language acquisition and the social life of languages Forming Texts offers tools for understanding how speakers and writers shape language it examines scholarship in the distinct but interrelated fields of rhetoric composition and poetics Reading Literature and Culture continues the work of the first two sections by introducing major areas of critical study The nine essays in this section cover textual and historical scholarship interpretation comparative cultural and translation studies and the interdisciplinary topics of gender sexuality race and migrations among others As in previous volumes an epilogue examines the role of the scholar in contemporary society Each essay discusses the significance underlying assumptions and limits of an important field of inquiry traces the historical development of its subject introduces key terms outlines modes of research now being pursued postulates future developments and provides a list of suggestions for further reading This book will interest any member of the academic community seeking a review of recent scholarship while it provides an indispensable resource for undergraduate and graduate students of modern languages and literatures      *Through the Daemon's Gate*

Dean Swinford,2013-10-08 This book tells the story of the early modern astronomer Johannes Kepler s *Somnium* which has been regarded by science historians and literary critics alike as the first true example of science fiction Kepler began writing his complex and heavily footnoted tale of a fictional Icelandic astronomer as an undergraduate and added to it throughout his life The *Somnium* fuses supernatural and scientific models of the cosmos through a satirical defense of Copernicanism that features witches lunar inhabitants and a daemon who speaks in the empirical language of modern science Swinford s looks at the ways that Kepler s *Somnium* is influenced by the cosmic dream a literary genre that enjoyed considerable popularity among medieval authors including Geoffrey Chaucer Dante John of Salisbury Macrobius and Alan of Lille He examines the

generic conventions of the cosmic dream also studying the poetic and theological sensibilities underlying the categories of dreams formulated by Macrobius and Artemidorus that were widely used to interpret specific symbols in dreams and to assess their overall reliability Swinford develops a key claim about the form of the *Somnium* as it relates to early science Kepler relies on a genre that is closely connected to a Ptolemaic or earth centered model of the cosmos as a way of explaining and justifying a model of the cosmos that does not posit the same connections between the individual and the divine that are so important for the Ptolemaic model In effect Kepler uses the cosmic dream to describe a universe that cannot lay claim to the same correspondences between an individual's dream and the order of the cosmos understood within the rules of the genre itself To that end Kepler's *Somnium* is the first example of science fiction but the last example of Neoplatonic allegory

*Expanding Authorship* Peter Middleton, 2021-06-01 *Expanding Authorship* collects important essays by Peter Middleton that show the many ways in which in a world of proliferating communications media poetry making is increasingly the work of agencies extending beyond that of a single identifiable author In four sections Sound Communities Collaboration and Complexity Middleton demonstrates that this changing situation of poetry requires new understandings of the variations of authorship He explores the internal divisions of lyric subjectivity the vicissitudes of coauthorship and poetry networks the creative role of editors and anthologists and the ways in which the long poem can reveal the outer limits of authorship Readers and scholars of Wallace Stevens William Carlos Williams George Oppen Frank O'Hara Robert Duncan Robert Creeley Jerome Rothenberg Susan Howe Lyn Hejinian Nathaniel Mackey and Rae Armantrout will find much to learn and enjoy in this groundbreaking volume

**Many Subtle Channels** Daniel Levin Becker, 2012-04-30 The youngest member of the Paris based experimental collective Oulipo Levin Becker tells the story of one of literature's quirkiest movements and the personal quest that led him to seek out like minded writers artists and scientists who are obsessed with language and games and who embrace formal constraints to achieve literature's potential

*Avant Canada* Gregory Betts, Christian Bök, 2019-01-10 *Avant Canada* presents a rich collection of original essays and creative works on a representative array of avant garde literary movements in Canada from the past fifty years From the work of Leonard Cohen and bpNichol to that of Jordan Abel and Liz Howard *Avant Canada* features twenty eight of the best writers and critics in the field The book proposes four dominant modes of avant garde production Concrete Poetics which accentuates the visual and material aspects of language Language Writing which challenges the interconnection between words and things Identity Writing which interrogates the self and its sociopolitical position and Copyleft Poetics which undermines our habitual assumptions about the ownership of expression A fifth section commemorates the importance of the Centennial in the 1960s at a time when avant garde cultures in Canada began to emerge Readers of this book will become familiar with some of the most challenging works of literature and their creators that this country has ever produced From Concrete Poetry in the 1960s through to Indigenous Literature in the 2010s *Avant Canada* offers the most sweeping study of the literary avant garde in Canada to
