Employees' Intellectual Property Rights Sanna Wolk,Kacper Szkalej,2016-04-24 In today s knowledge based global

economy most inventions are made by employed persons through their employers research and development activities. However methods of establishing rights over an employee's intellectual property assets are relatively uncertain in the absence of international solutions. Given that increasingly more businesses establish entities in different countries and more employees co-operate across borders it becomes essential for companies to be able to establish the conditions under which ownership subsists in intellectual property created in employment relationships in various countries. This comparative law publication describes and analyses employers' acquisition of employees' intellectual property rights first in general and then in depth. This second edition of the book considers thirty-four different jurisdictions worldwide. The book was developed within the framework of the International Association for the Protection of Intellectual Property (AIPPI), a non-affiliated non-profit organization dedicated to improving and promoting the protection of intellectual property at both national and international levels. Among the issues and topics covered by the forty-nine distinguished contributors are the following: different approaches in different law systems; choice of law for contracts; harmonizing international jurisdiction rules; conditions for recognition and enforcement of foreign judgments; employees' rights in copyright; semiconductor chips; inventions; designs; plant varieties; and utility models on a country-by-country basis; employee remuneration; right parties; duty to inform; and instances for disputes. With its wealth of information on an increasingly important subject for practitioners in every jurisdiction, this book is sure to be put to constant use by corporate lawyers and in-house counsel everywhere. It is also exceptionally valuable as a thorough resource for academics and researchers interested in the international harmonization of intellectual property law.

Intellectual Property in the Life Sciences Paul England, 2011. It uniquely satisfies two practical needs: a global reach that reflects the worldwide markets within which the life sciences industry now operates; and a sector-based approach addressing the issues that those in the business face. Written by a team of the world's leading specialists in the field, including Lewis Ho from Simmons Simmons, Joachim Feldges from Field Fisher Waterhouse, Miquel Montana from Clifford Chance, and Pravin Anand from Anand and Anand, this accessible guide provides an overview of the key international and European IP legislation complementing the book's central theme of monopoly protection. In addition, the book features coverage from 15 jurisdictions of the most important and topical life sciences issues on which intellectual property has an impact.

ANDA Litigation Kenneth L. Dorsney, 2012. Examining the intersection between the statutory and regulatory scheme governing approval of generic pharmaceuticals and U.S. patent law in the context of Paragraph IV ANDA litigation, this comprehensive guide focuses on current and developing law as well as litigation strategies and tactics. This ready roadmap begins with an explanation of the Hatch-Waxman Act, its implementation, and litigation. Other topics include preparing and trying the case, post-trial issues, and appeals, remedies, settlement, antitrust implications, and litigation of pharmaceuticals outside the U.S.
