Information Klaus Kornwachs, Konstantin Jacoby, 1996 This volume contains contributions based on presentations made at the conference on multidisciplinary aspects of information theory held in Cottbus Germany March 1994 and organized by the German Society for System Research and the Working Group for Physics and Computer Science The papers have been carefully revised after a second discussion procedure and they present important information on theoretical physical biological philosophical linguistic and sociological basic properties of information Most of the papers aim at presenting a coherent system theoretical understanding of information as an entity in computer science as well as in physics The outlines of a theory of pragmatic information are also developed

**Competition Law as Regulation** Josef Drexler, Fabiana Di Porto, 2015-10-30 To what extent should competition agencies act as market regulators Competition Law as Regulation provides numerous insights from competition scholars on new trends at the interface of competition law and sector specific regulation By relying on the experiences of a considerable number of different jurisdictions and applying a comparative approach to the topic this book constitutes an important addition to international research on the interface of competition and regulation It addresses the fundamental issues of the subject and contributes to legal theory and practice

Topics discussed include foundations of the complex relationship of competition law and regulation new forms of advocacy powers of competition agencies competition law enforcement in regulated industries in general information and telecommunications markets and competition law as regulation in IP related markets Scholars in the two fields of law and economics will find the research aspects of the book to be of interest Officials in competition and regulatory agencies will benefit from the practical relevance of the book

**FairEconomy** Wolfgang Fikentscher, Philipp Hacker, Rupprecht Podszun, 2013-03-14 FairEconomy is a concept for a free and fair market economy In response to the financial and economic crises of the past years the authors develop fundamental ideas of how a market economy works what rules markets need and who safeguards fairness and equal opportunity in such an economy The book sets out the design of a sustainable market order Going back to the very roots of doing business it offers a fascinating insight into the cultural and anthropological premises of the market economy Fairness and free competition can be identified as key elements of successful markets sometimes neglected in politics and business Legal rules need to ensure that fairness and economic freedom work The same holds true for the relationship of risk and liability that has been overlooked in the banking sector The ideas of a FairEconomy sketched in this book are fit to become a reality The authors point to institutions and mechanisms that could integrate the concept into global law They place their trust less upon ever larger institutions and more on private entitlement and enforcement at the global regional and local levels
