to create spaces to foster spiritual growth and exploration if we are to break away from the commoditized disempowering system that is so dominant today This edited collection is a valuable resource for students practitioners educators and administrators who wish to engage in transformational schooling Its multidisciplinary approach engages ideas around critical pedagogy sociology of education and inclusive schooling There is an increasing need for exploring novel paradigms of studying education in the context of the dynamics that straddle social economic and technological processes that have come to characterize the world in recent years This book is a timely contribution in this respect as its focus transcends hitherto applied approaches that depend largely on western orientation The book breaks new grounds in studying education and society that find significant relevance in societies that are marginalized by the dominant western understanding The authors draw from the rich heritage of spirituality that is akin to the non western social paradigms to develop a rigorous but creative concept of schooling I am sure practitioners researchers and students of education will find it a valuable source of practical and theoretical information that would widen their horizon of understanding of sociology of education Tom Mongare Ndege PhD Moi University Kenya The editors have compiled a brilliant collection of essays Each piece of scholarly work shows how spirituality is a paramount part of our everyday lives and is connected to teaching learning living and healing This is a timely and most relevant work that is sure to spur critical dialogue and discussion This collection shows that while the spirit may be wounded it can never be broken Erica Neeganagwedgin PhD University of Toronto
