Who Cleans the Park? John Krinsky, Maud Simonet, 2017-03-24 America's public parks are in a golden age Hundreds of millions of dollars both public and private fund urban jewels like Manhattan's Central Park Keeping the polish on landmark parks and in neighborhood playgrounds alike means that the trash must be picked up benches painted equipment tested and leaves raked Bringing this often invisible work into view however raises profound questions for citizens of cities In Who Cleans the Park John Krinsky and Maud Simonet explain that the work of maintaining parks has intersected with broader trends in welfare reform civic engagement criminal justice and the rise of public private partnerships Welfare to work trainees volunteers unionized city workers sometimes working outside their official job descriptions staff of nonprofit park conservancies and people sentenced to community service are just a few of the groups who routinely maintain parks With public services no longer being provided primarily by public workers Krinsky and Simonet argue the nature of public work must be reevaluated Based on four years of

fieldwork in New York City *Who Cleans the Park* looks at the transformation of public parks from the ground up Beginning with studying changes in the workplace progressing through the public private partnerships that help maintain the parks and culminating in an investigation of a park s contribution to urban real estate values the book unearths a new urban order based on nonprofit partnerships and a rhetoric of responsible citizenship which at the same time promotes unpaid work reinforces workers domination at the workplace and increases the value of park side property *Who Cleans the Park* asks difficult questions about who benefits from public work ultimately forcing us to think anew about the way we govern ourselves with implications well beyond the five boroughs *Urban Informatics* Wenzhong Shi,Michael F.

The Elgar Companion to Urban Infrastructure Governance Matthias Finger, Numan Yanar, 2022-04-19

Providing a comprehensive overview of the governance of urban infrastructures, this Companion combines illustrative cases with conceptual approaches to offer an innovative perspective on the governance of large urban infrastructure systems. Contributions by leading scholars in the field present a transdisciplinary approach to the topic with a global scope. Chapters examine the challenges facing urban infrastructure systems including financial, economic, technological, social, ecological, jurisdictional and demand. Using novel conceptualizations of urban infrastructure and examining global cases of specific energy, mobility, water, housing, green and telecommunication systems, the Companion further illustrates how these challenges are interrelated with their governance. Finding efficiency, sustainability and resilience to be key governance performance indicators, it concludes by highlighting the role that digitalization plays in making cities smarter and argues for the potential of digitalization for large urban infrastructure governance. With global significance, this Companion will be an invaluable read for students and scholars of urban studies, governance and infrastructure. The informative case studies will be an excellent resource for city practitioners, officials and policymakers.

Urban Governance and Informal Settlements Ninik Suhartini, Paul Jones, 2019-02-04

The objective of this book is to better understand the nature of urban governance regarding the provision of basic urban services in rapidly growing mid-sized towns and cities in developing countries. Set within the context of understanding urban planning and management within the wider city setting, the study focuses on the provision of the basic urban services of housing, water and sanitation, especially within informal settlements. Using the case study of the mid-sized city of Jayapura, Papua, Indonesia, the publication explores:

- i the types, processes and stakeholders that constitute formal urban governance in the provision of basic urban services;
- ii understanding how stakeholders gain and benefit from on the ground formal service arrangements; and why;
- iii for those who do not directly benefit from the formal arrangements, how individuals, groups and communities organize and access governance to meet their basic urban needs.

The methods employed to better understand the nature of urban governance and its relationship to the provision of basic urban services comprised primary face-to-face household surveys interviewing 448 respondents, ground mapping at a plot size level in four informal settlements and semi-structured interviews with 12 stakeholders and secondary data regarding urban governance planning and management. The study reveals that urban governance arrangements in fast-growing mid-sized cities have emerged both formally and informally to cope with basic urban service needs across a range of settlement types and socio-cultural groups. The major modes of governance arrangements in the informal settlements consist of traditional formal and informal and hybrid governance which co-evolve as their boundaries overlap and intersect through time at varying levels of

equilibrium The governance equilibrium represents a balance at a specific point and place in time in how stakeholders utilize and share resources and access various contributions **Partnerships and Regimes** JONATHAN S. DAVIES,2019-11-11
