In Pursuit of Lakshmi Lloyd I. Rudolph, Susanne Hoeber Rudolph, 1987-04-15 The pursuit of Lakshmi the fickle goddess of prosperity and good fortune is a metaphor for the aspirations of the state and people of independent India In the latest of their distinguished contributions to South Asian studies scholars Lloyd I Rudolph and Susanne Hoeber Rudolph focus on this modern day pursuit by offering a comprehensive analysis of India s political economy India occupies a paradoxical plane among nation states it is both developed and underdeveloped rich and poor strong and weak These contrasts locate India in the international order The Rudolphs theory of demand and command polities provides a general framework for explaining the special circumstances of the Indian experience Contrary to what one might expect in a country with great disparities of wealth no national party right or left pursues the politics of class Instead the Rudolphs argue private capital and organized labor in India face a third actor the state Because of the dominance of the state makes class politics marginal the state is itself an element in the creation of the centrist oriented social pluralism that has characterized Indian politics since independence In analyzing the relationship between India s politics and its economy the Rudolphs maintain that India s economic performance has been only marginally affected by the type of regime in power authoritarian or democratic More important they show that rising levels of social mobilization and personalistic rule have contributed to declining state capacity and autonomy At the same time social mobilization has led to a more equitable distribution of economic benefits and political power which has enhanced the state s legitimacy among its citizens The scope and explanatory power of *In Pursuit of Lakshmi* will make it essential for all those interested in political economy comparative politics Asian studies and India

The State of the Nations Michael F. Lofchie, 2024-06-21 The State of the Nations is a collection of essays evaluating the political social and economic development of independent African states in the 1960s The effort to employ the notion of constraint as a conceptual tool in analyzing African politics reflects an attempt to move away from evaluative terms such as development and modernization or decay and breakdown Development which has an implicit suggestion of social progress and constitutional government seems inappropriate for the study of the wide array of political phenomena found in African states Terms such as breakdown and decay with an equally broad suggestion of disruption disunity and instability seem equally inappropriate The vantage point of the authors in this volume is primarily political but their understanding of African development encompasses the social and economic spheres as well The constraints that impede achievement of African objectives are varied and many of course are

not political Geographical factors for example are supremely relevant in accounting for the availability of natural resources The principal justification for emphasizing political rather than other constraints is the extent to which political will and political action can stimulate development in spite of other obstacles Contributors Jonathan Barker Henry Bienen Barbara Callaway Emily Card Martin R Doornbos Rupert Emerson R Cranford Pratt Richard E Stryker Immanuel Wallerstein Claude E Welch M Crawford Young This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1971 *Handbook of Legislative Research* Gerhard Loewenberg, 1985 The Handbook of Legislative Research a comprehensive summary of the results of research on nineteenth and twentieth century legislatures is itself a landmark in the evolution of legislative studies Gathered here are surveys by leading scholars in the field each providing inventory of an important subfield an extensive bibliography and a systematic assessment of what has been accomplished and what directions future research must take **Democratization from Above** Anjali Thomas Bohlken, 2016-01-11 Democratization from Above seeks to explain why some national and state governments in the developing world introduce reforms to make local governance more democratic while others neglect or actively undermine democracy at local levels of government The study challenges conventional wisdom that local democratization is implemented as a means of granting more autonomy to local actors Instead Anjali Thomas Bohlken argues that local democratization offers higher level government elites who lack control over party organizational networks an alternative means of increasing the effectiveness of local intermediaries on whom these elites rely to mobilize political support The book starts with a focus on India and uses original data and a combination of qualitative and quantitative evidence to show support for the argument The study then relies on an original cross national dataset to show how the argument helps explain the variation in the implementation of local democratization reforms across the developing world
