generated more plastic waste by weight and per capita than any other nation Although the U S solid waste management system is advanced it is not sufficient to deter leakage into the environment Reckoning with the U S Role in Global Ocean Plastic Waste calls for a national strategy by the end of 2022 to reduce the nation s contribution to global ocean plastic waste at every step from production to its entry into the environment including by substantially reducing U S solid waste generation This report also recommends a nationally coordinated and expanded monitoring system to track plastic pollution in order to understand the scales and sources of U S plastic waste set reduction and management priorities and measure progress
