Pascalian Meditations:

Pascalian Meditations Pierre Bourdieu, 2000 A brilliant example of Bourdieu's unique ability to link sociological theory, historical information and philosophical thought

Practising the Symbolic Sheena Jain, 2022-10-04 A powerful theory of the symbolic embedded within a remarkable and original theory of practice is a nodal aspect of the work of Pierre Bourdieu who was a leading social thinker of our times 1930-2002 Against the backdrop of the significance of symbolic practice in social life this book explains the intellectual warp and woof of his theory of the symbolic presents a brief excursus that explores its potential to illuminate social contexts other than those in which it was conceived examines its links with Bourdieu's role of social critic and public intellectual and engages critically with scholarly assessments of his contribution The book thus seeks to provide a comprehensive and in depth analysis and understanding of a central dimension of Bourdieu's work

Morphing Intelligence Catherine Malabou, 2019-02-12 What is intelligence The concept crosses and blurs the boundaries between natural and artificial bridging the human brain and the cybernetic world of AI In this book the acclaimed philosopher Catherine Malabou ventures a new approach that emphasizes the intertwined networked relationships among the biological the technological and the symbolic Malabou traces the modern metamorphoses of intelligence seeking to understand how neurobiological and neurotechnological advances have transformed our view She considers three crucial developments the notion of intelligence as an empirical genetically based quality measurable by standardized tests the shift to the epigenetic paradigm with its emphasis on neural plasticity and the dawn of artificial intelligence with its potential to simulate replicate and ultimately surpass the workings of the brain Malabou concludes that a dialogue between human and cybernetic intelligence offers the best if not the only means to build a democratic future A strikingly original exploration of our changing notions of intelligence and the human and their far reaching philosophical and political implications *Morphing Intelligence* is an essential analysis of the porous border between symbolic and biological life at a time when once clear distinctions between mind and machine have become uncertain

Back to the Rough Grounds of Praxis Daniel Franklin Pilario, 2005 What is praxis How do we do theology from its perspective These are the main questions which this book seeks to answer As propaedeutic to theological reflection it surveys the notion of praxis in the philosophical sociological and anthropological traditions from Aristotle and Marx to contemporary theories It argues that Pierre Bourdieu's theory of practice achieves a critical synthesis of these different traditions making it a viable theological dialogue partner Bourdieu provides us with a praxeological theory to scrutinize the complexity of the social realm and an epistemological theory to understand the mystery of God's presence in these socio-historical conjunctures which serve as the privileged and only locus of His/Her revelation The author thus engages two theologians who take praxis/practice as central to their theological methods Clodovis Boff liberation theology and John Milbank radical orthodoxy From the perspective of its appropriated framework this work attempts to avoid the limitations as well as preserves the gains achieved by these two approaches as it

also explores the rudiments of a theological method relevant to our post Marxist and postmodern global contexts **The Racial Order** Mustafa Emirbayer, Matthew Desmond, 2015-08-04 Proceeding from the bold and provocative claim that there never has been a comprehensive and systematic theory of race Mustafa Emirbayer and Matthew Desmond set out to reformulate how we think about this most difficult of topics in American life In *The Racial Order* they draw on Bourdieu Durkheim and Dewey to present a new theoretical framework for race scholarship Animated by a deep and reflexive intelligence the book engages the large and important issues of social theory today and along the way offers piercing insights into how race actually works in America Emirbayer and Desmond set out to examine how the racial order is structured how it is reproduced and sometimes transformed and how it penetrates into the innermost reaches of our racialized selves They also consider how and toward what end the racial order might be reconstructed In the end this project is not merely about race it is a theoretical reconsideration of the fundamental problems of order agency power and social justice *The Racial Order* is a challenging work of social theory institutional and cultural analysis and normative inquiry **Conform, Fail, Repeat** Christopher Samuel, 2017-10-18 Anti globalization activists have done little to slow capitalism's global march Many of the gains made by decades of identity based movements have been limited to privileged subgroups The lesson of these movements is clear struggle for change is essential but the direction of change matters considerably Like movements of the past current social movements such as Black Lives Matter Idle No More and the growing anti Trump movement must navigate a path between reformism and radicalism pragmatism and idealism capture and independence In *Conform Fail Repeat* Christopher Samuel uses Pierre Bourdieu's central thinking tools to show how power and domination force movements into a no win choice between conformity and failure With special attention to North American LGBTQ politics and the G20 protests in Toronto *Conform Fail Repeat* shows how Bourdieu's work can give movement observers as well as participants new tools for tracking and avoiding the pitfalls of conformity and failure **Bourdieu** Tony Schirato, Mary Roberts, 2020-07-28 Throughout his career French philosopher Pierre Bourdieu sought to interrogate what he described as the social unconscious the means by which power is held and transmitted across generations Bourdieu's work has been hugely influential in disciplines across the social sciences and humanities for decades yet Schirato and Roberts argue that few scholars are using his work to its full potential Bourdieu's work is so wide ranging that commentary tends to focus on specific theoretical concepts he developed or his books on particular fields of inquiry However he continued to develop these concepts in his work across his whole career and much of the richness of his thinking is lost if this isn't taken into account Drawing on recently released lectures Schirato and Roberts offer a systematic account of Bourdieu's full body of work from his early research in Algiers to his last lectures in Paris They show how Bourdieu continued to develop his concepts of habitus field capital power and socio cultural reproduction well into his later years They also offer a nuanced reading of Bourdieu's thinking about education class language knowledge and culture beyond the individual books Bourdieu published

on these topics This critical introduction to Bourdieu is essential reading for all Bourdieu scholars and for researchers and thinkers using Bourdieu's work in their own social and cultural analysis A terrific book which sets out a comprehensive overview of Bourdieu's oeuvre in a way that no other text I know has done Professor John Frow University of Sydney

Teaching Islamic Studies in the Age of ISIS, Islamophobia, and the Internet Courtney M. Dorroll, 2019-01-24 How can teachers introduce Islam to students when daily media headlines can prejudice students' perception of the subject Should Islam be taught differently in secular universities than in colleges with a clear faith-based mission What are strategies for discussing Islam and violence without perpetuating stereotypes The contributors of Teaching Islamic Studies in the Age of ISIS Islamophobia and the Internet address these challenges head on and consider approaches to Islamic studies pedagogy Islamophobia and violence and suggestions for how to structure courses These approaches acknowledge the particular challenges faced when teaching a topic that students might initially fear or distrust Speaking from their own experience they include examples of collaborative teaching models reading and media suggestions and ideas for group assignments that encourage deeper engagement and broader thinking The contributors also share personal struggles when confronted with students including Muslim students and parents who suspected the courses might have ulterior motives In an age of stereotypes and misrepresentations of Islam this book offers a range of means by which teachers can encourage students to thoughtfully engage with the topic of Islam

Constructing Place Sarah Menin, 2004-02-24 This book is a cutting edge study examining the attitudes to both nature and the built environment of the designer the client and the society in which an intervention be it architecture landscape design or a piece of art is made The legacy of the Modernist view of nature and the environment is also addressed and the degree to which such ideas continue to impinge on contemporary interventions is assessed

Pierre Bourdieu and Literacy Education James Albright, Allan Luke, 2010-04-26 In this volume scholars from around the world focus on how a Bourdieusian stance can enable a powerful sociocultural and cultural analysis of literacy education theory and practice and serve as an effective tool in analyzing relations of hierarchy and domination Pierre Bourdieu and Literacy Education is intended for researchers practitioners and graduate students in literacy education sociology of education and curriculum theory and as a text for advanced courses in these areas

Time, Duration and Change Franz Bockrath, 2023-11-22 This book studies various perspectives in the history of European philosophy on the relationship between time and movement Ever since the pre Socratic thinker Zeno of Elea linked time and space to understand bodily movement his so called paradoxes of motion have remained unsolved One of his most important critics the French philosopher Henri Bergson criticized the usual connection between time and space and established a new way of understanding time as duration *durée* Whereas Zeno presented an objectivist understanding of time Bergson emphasized its subjectivist meaning Both contradictory positions seem incompatible referring to pure intellect Zeno on the one hand or pure sensation Bergson on the other Looking at Hegel's Phenomenology this book shows that the outer and inner consciousness of

time became crucial to his principle of movement and change In his view time is an integral part of dialectical processes that are historically substantiated Hegel sought to subordinate pure concepts and ideas so that they would become indispensable moments of the self knowing spirit Cassirer appreciated the idealism of coming into being but rejected Hegel's concept of the absolute Instead he established his philosophy of symbolic forms in which the development of different perceptions and conceptions of time from situational affective experience to the mathematical system of relations determines the direction of the symbolic formation process In the end the sensitive concept of time is replaced by the relational concept of natural numbers in which all here and now experiences are embedded Finally Bourdieu attempts to reintegrate symbolic forms into social processes The book reflects on the concepts mentioned here by discussing their pros and cons in order to shed more light on the relationship between time and movement in European thought *Funk the Clock* Rahsaan Mahadeo,2024-05-15

Funk the Clock is about those said to be emblematic of the future yet denied a place in time Hence this book is both an invitation and provocation for Black youth to give the finger to the hands of time while inviting readers to follow their lead In revealing how time is racialized how race is temporalized and how racism takes time Rahsaan Mahadeo makes clear why conventional sociological theories of time are both empirically and theoretically unsustainable and more importantly why they need to be funkyed up with Through his study of a youth center in Minneapolis Mahadeo provides examples of Black youth constructing alternative temporalities that center their lived experiences and ensure their worldviews tastes and culture are most relevant and up to date In their stories exists the potential to stretch the sociological imagination to make the familiar i e time strange *Funk the Clock* forges new directions in the study of race and time by upending what we think we know about time while centering Black youth as key collaborators in rewriting knowledge as we know it The Author's Hand and the Printer's Mind Roger Chartier,2013-12-06

In Early Modern Europe the first readers of a book were not those who bought it They were the scribes who copied the author's or translator's manuscript the censors who licensed it the publisher who decided to put this title in his catalogue the copy editor who prepared the text for the press divided it and added punctuation the typesetters who composed the pages of the book and the proof reader who corrected them The author's hand cannot be separated from the printer's mind This book is devoted to the process of publication of the works that framed their readers representations of the past or of the world Linking cultural history textual criticism and bibliographical studies dealing with canonical works like Cervantes *Don Quixote* or Shakespeare's plays as well as lesser known texts Roger Chartier identifies the fundamental discontinuities that transformed the circulation of the written word between the invention of printing and the definition three centuries later of what we call literature *The Politics of Debt* Sjoerd van Tuinen,Arjen Kleinherenbrink,2020-01-31

The Politics of Debt brings together philosophers political scientists and economists and sets them the task of reflecting on the political role played by debt Focusing on the aftermath of the 2008 economic crisis particularly in the United States and Europe the book is split into groups It contains six essays and five

interviews that aim to fully comprehend the political consequences of the economic crisis and specifically of debt Death of the Public University? specialized erotic worlds has transformed the domain of intimate life Organized by appetites and dispositions related to race ethnicity class gender and age these erotic worlds are arenas of sexual exploration but also sites of stratification and dominion wherein actors vie for partners social significance and esteem These are what Adam Isaiah Green calls sexual fields which represent a semblance of social life for which he offers a groundbreaking new framework To build on the sexual fields framework Green has gathered a distinguished group of scholars who together make a strong case for sexual field theory as the first systematic theoretical innovation since queer theory in the sociology of sexuality Expanding on the work of Bourdieu Green and contributors develop this distinctively sociological approach for analyzing collective sexual life where much of the sexual life of our society resides today Coupling field theory with the ethnographic and theoretical expertise of some of the most important scholars of sexual life at work today Sexual Fields offers a game changing approach that will revolutionize how sociologists analyze and make sense of contemporary sexual life for years to come

Reading Race Relationally

Marlon Lieber, 2023-04-03 What does it mean to write African American literature after the end of legalized segregation In this study of Colson Whitehead's first six novels Marlon Lieber argues that this question has permeated the Pulitzer Prize winning author's writing since his 1999 debut The Intuitionist Drawing on Pierre Bourdieu's relational sociology and Marxist critical theory Lieber shows that Whitehead's oeuvre articulates the tension between the persistent presence of racism and transformations in the United States class structure which reveals new modes of abjection At the same time Whitehead imagines forms of writing that strive to transcend the histories of domination objectified in social structures and embodied in the form of habitus
