## **Pascals Lettres Provinciales A Study In Polemic:**

**Pascal's Lettres Provinciales** Richard Parish, 1989 The first comprehensive study to appear in English of the controversial Lettres provinciales Pascal's major polemical work undertaken as a defence of Port Royal and as an attack on the Society of Jesus The author first analyzes in detail the substance and structure of the letters themselves casting light in the process on the nature and function of polemic and on Pascal's mastery in the genre Secondly he examines the text in the light of other contemporary writing in discussing the mainly Jesuit counter polemic he adduces a good deal of material not easily accessible to scholarly investigation and thereby sets the Provinciales in the context of the broader polemical exchange then in exploring the links between the Provinciales and Pascal's Pensées he demonstrates a closer connection between those two seminal works than has generally been recognized and in so doing offers some insight into the problematic relationship between polemics and apologetics Book jacket

**The Cambridge Companion to Pascal** Nicholas Hammond, 2003-04-17 Blaise Pascal 1623-1662 occupies a position of pivotal importance in many domains philosophy mathematics physics religious polemics and apologetics In this volume a team of leading scholars presents the full range of Pascal's achievement and surveys the intellectual background of his thought and the reception of his work New readers and nonspecialists will find this the most convenient and accessible guide to Pascal currently available Advanced students and specialists will find a conspectus of recent developments in the interpretation of Pascal

**A New History of Penance** Abigail Firey, 2008 Using hitherto unconsidered source materials from late antiquity to the early modern period this volume charts new views about the role of penance in shaping western attitudes and practices for resolving social political and spiritual tensions as penitents and confessors negotiated rituals and expectations for penitential expression

**Catholic Particularity in Seventeenth-Century French Writing** Richard Parish, 2011-07-28 le christianisme est étrange Pascal's assertion that Christianity is strange provides the theme for Richard Parish's exploration of Catholic particularity as it was expressed in the writing of the French seventeenth century This was a period of quite exceptional fertility in a range of genres apologetics sermons devotional manuals catechisms martyr tragedies lyric poetry polemic and spiritual autobiography Parish examines a broad cross section of this corpus with reference to the topics of apologetics physicality language discernment polemics and salvation and draws evidence both from canonical figures Pascal Bossuet Fénelon St François de Sales Madame Guyon and from less easily available texts Parish aims to consider all those distinctive features that the heritage of the Catholic Reformation brought to the surface in France and to do so in support of the numerous ways in which Christian doctrine could be understood as being strange it is by turns contrary to expectations paradoxical divisive carnal and inexpressible These features are exploited imaginatively in the more conventional literary forms didactically in pulpit oratory and empirically in the accounts of personal spiritual experience In addition they are manifested polemically in debates surrounding penance authority inspiration and eschatology and often push orthodoxy to its limits and beyond in the

course of their articulation This volume provides an unsettling account of a belief system to which early modern France often unquestioningly subscribed and shows how the element of cultural assimilation of Catholic Christianity into much of Western Europe only tenuously contains a subversive and counter intuitive creed The degree to which that remains the case will be for the reader to decide     **The Places of Early Modern Criticism** Gavin Alexander, Emma Gilby, Alexander

Marr, 2021-04-29 What is criticism And where is it to be found Thinking about literature and the visual arts is found in many places in treatises apologies and paragoni in prefaces letters and essays in commentaries editions reading notes and commonplace books in images sculptures and built spaces within or on the thresholds of works of poetry and visual art It is situated between different disciplines and methods Critical ideas and methods come into England from other countries and take root in particular locations the court the Inns of Court the theatre the great house the printer s shop the university The practice of criticism is transplanted to the Americas and attempts to articulate the place of poetry in a new world And commonplaces of classical poetics and rhetoric serve both to connect and to measure the space between different critical discourses Tracing the history of the development of early modern thinking about literature and the visual arts requires consideration of various kinds of place material textual geographical and the practices particular to those places it also requires that those different places be brought into dialogue with each other This book brings together scholars working in departments of English modern languages and art history to look at the many different places of early modern criticism It argues polemically for the necessity of looking afresh at the scope of criticism and at what happens on its margins and for interrogating our own critical practices and disciplinary methods by investigating their history     **Pascal: Reasoning and**

**Belief** Michael Moriarty, 2020-02-13 This book is a study of Blaise Pascal s defence of Christian belief in the Pens es Michael Moriarty aims to expound and in places to criticize what he argues is a coherent and original apologetic strategy Setting out the basic philosophical and theological presuppositions of Pascal s project the present volume draws the distinction between convictions attained by reason and those inspired by God given faith It also presents Pascal s view of the contradictions within human nature between the wretchedness our inability to live the life of reason to attain secure and durable happiness and the greatness the power of thought manifested in the very awareness of our wretchedness His mind body dualism and his mechanistic conception of non human animals are discussed Pascal invokes the biblical story of the Fall and the doctrine of original sin as the only credible explanation of these contradictions His analysis of human occupations as powered by the twin desire to escape from painful thoughts and to gratify one s vanity is subjected to critical examination as is his conception of the self and self love Pascal argues that just as Christianity propounds the only explanation for the human condition so it offers the only kind of happiness that would satisfy our deepest longings He thus reasons that we have an interest in investigating its truth claims as rooted in the Bible and in history The closing chapters of this book discuss Pascal s view of Christian morality and the famous wager argument for opting in favour of Christian belief     **Quid est secretum?** Ralph

Dekoninck, Agnès Guiderdoni, Walter Melion, 2020-09-10 *Quid est secretum Visual Representation of Secrets in Early Modern Europe 1500 1700* is the companion volume to *Intersections 65 1 Quid est sacramentum Visual Representation of Sacred Mysteries in Early Modern Europe 1400 1700* Whereas the latter volume focused on sacramental mysteries the current one examines a wider range of secret subjects The book examines how secret knowledge was represented visually in ways that both revealed and concealed the true nature of that knowledge giving and yet impeding access to it In the early modern period the discursive and symbolical sites for the representation of secrets were closely related to epistemic changes that transformed conceptions of the transmissibility of knowledge Contributors Monika Biel Alicja Bielak C Jean Campbell Tom Conley Ralph Dekoninck Peter G F Eversmann Ingrid Falque Agn s Guiderdoni Koenraad Jonckheere Suzanne Karr Schmidt Stephanie Leitch Carme L pez Calder n Mark A Meadow Walter S Melion Eelco Nagelsmit Lars Cyril N rgaard Alexandra Onuf Bret L Rothstein Xavier Vert Madeleine C Viljoen Mara R Wade Lee Palmer Wandel and Caecilie Weissert *The Debate on Probable Opinions in the Scholastic Tradition* Rudolf Schuessler, 2019-03-25 In *The Debate on Probable Opinions in the Scholastic Tradition* Rudolf Schuessler portrays scholastic approaches to a qualified disagreement of opinions The book outlines how scholastic regulations concerning the use of opinions changed in the early modern era giving rise to an extensive debate on the moral and epistemological foundations of reasonable disagreements The debate was fueled by probabilism and anti probabilism in Catholic moral theology and thus also serves as a gateway to these doctrines All developments are outlined in historical context while special attention is paid to the evolution of scholastic notions of probability and their importance for the emergence of modern probability **The Cambridge History of Literary Criticism: Volume 3, The Renaissance** George Alexander Kennedy, Glyn P. Norton, 1989 This 1999 volume was the first to explore as part of an unbroken continuum the critical legacy both of the humanist rediscovery of ancient learning and of its neoclassical reformulation Focused on what is arguably the most complex phase in the transmission of the Western literary critical heritage the book encompasses those issues that helped shape the way European writers thought about literature from the late Middle Ages to the late seventeenth century These issues touched almost every facet of Western intellectual endeavour as well as the historical cultural social scientific and technological contexts in which that activity evolved From the interpretative reassessment of the major ancient poetic texts this volume addresses the emergence of the literary critic in Europe by exploring poetics prose fiction contexts of criticism neoclassicism and national developments Sixty one chapters by internationally respected scholars are supported by an introduction detailed bibliographies for further investigation and a full index *Jansenism and England* Thomas Palmer, 2018-03-02 *Jansenism and England* Moral Rigorism across the Confessions examines the impact in mid to later seventeenth century England of the major contemporary religious controversy in France which revolved around the formal condemnation of a heresy popularly called Jansenism The associated debates involved fundamental questions about the doctrine of grace and moral theology about the life of the Church and the

conduct of individual Christians Thomas Palmer analyses the main themes of the controversy and an account of instances of English interest arguing that English Protestant theologians who were in the process of working out their own views on basic theological questions recognised the relevance of the continental debates The arguments evolved by the French writers also constitute a point of comparison for the developing views of English theologians Where the Jansenists reasserted an Augustinian emphasis on the gratuity of salvation against Catholic theologians who over valued the powers of human nature the English writers examined here arguing against Protestant theologians who denied nature any moral potency emphasised man's contribution to his own salvation Both arguments have been seen to contain a corrosive individualism the former through its preoccupation with the luminous experience of grace the latter through its tendency to elide grace and moral virtue These assessments are challenged here Nevertheless these theologians did encourage greater individualism Focusing on the affective experience of conversion they developed forms of moral rigorism which represented in both cases an attempt to provide a reliable basis for Christian faith and practice in the fragmented intellectual context of post reformation Europe
