*Passing for Normal* Amy S. Wilensky, 2010-09-22 A powerful and wise account of a woman's lifelong struggle with Tourette's syndrome and obsessive compulsive disorder Affecting gripping no matter what form the reader's own struggles for acceptance may have taken Elle I am crazy But maybe I am not For most of her life these thoughts plagued Amy Wilensky as her mind lurched and veered in ways she didn't understand and her body did things she couldn't control While she excelled in school and led an otherwise normal life she worried that beneath the surface she was a freak that there was something irrevocably wrong with her A powerful witness to her own dysfunction Wilensky describes the strain it bore on her relationships with the people she thought she knew best her family her friends and herself Confronting the labels we apply to ourselves and others compulsive crazy out of control Amy describes her symptoms diagnosis and her treatment with courage and a healthy dose of humor gradually coming to terms with the absurdities of a life beset by irrational behavior This compelling narrative by turns tragic and comic broadly extends our understanding of the wondrously complex human mind and with subtlety and grace challenges our notion of what it is to be normal

**Compulsive Body Spaces** Diana Beljaars, 2022-02-10 *Compulsive Body Spaces* presents a spatial understanding of compulsion Providing a compelling account of the lives of 15 people with Tourette syndrome it demystifies the seemingly irrational purposeless and meaningless character of this behaviour It demonstrates how attending to the spatial circumstances under which compulsive acts like touching ordering and aligning objects take

place can produce valuable novel insights that complement neuroscientific psychiatric or psychological knowledge By paying attention to the sensory material and social environment of the body during its performance of compulsive acts the book establishes the ways in which configurations of bodies objects and spaces disrupt people s lives or allow them to thrive This collaborative qualitative study that is based on in depth interviews observations and mobile eye tracking places the book at the forefront of a new wave of patient emancipation in medical research and gives rise to a renewed consideration of what empathetic context sensitive care may look like in the 21st century In turn its insights give rise to a ground breaking spatial conceptualisation of wellbeing Considering the compulsive capacities of a broader humanity **Compulsive Body Spaces** highlights the compulsive dimension in bodily spatiality which underpins the very core theories of human life as embodied and performed This book will be of interest to students and scholars in science and technology studies human geography sociology health and social care medical humanities continental philosophy and disability studies
