

Passion Flowers

Jenny Rose Carey

Passion Flowers:

Passionflowers Ronald Boender, 2019-01-14 Pictorial Guide is a new and comprehensive photographic atlas with nearly 1000 new color photographs illustrating most of the wild species of *Passiflora* known to science. Bursting with a wealth of images of exotic species taken in the wild as well as those that most gardeners are likely to encounter in the horticultural trade, this book showcases elegant blossoms of these fantastic tropical vines, shrubs, and trees and captures the imagination with spectacular colors, dramatic forms, and amazing variations. Comprehensive and scientifically accurate, this survey of the genus *Passiflora* is the first reference book on passionflowers published in more than 15 years and the only pictorial reference guide of its kind. The splendor of more than 280 wild passionflower species as they appear in nature, as well as 11 hybrids, represents the culmination of the author's 30-year fascination with this exotic genus and his more than 120 trips to Costa Rica and Ecuador observing and collecting the vines. Simple to use, the species are arranged alphabetically. The geographic range is given for every species based on the latest verified identifications from world databases. At least one flower is shown for each entry, and very importantly, unlike other guides, a photograph of a leaf or often a fruit is shown. The author's special accumulated knowledge of which specific butterfly feeds on which kind of plant is shared through notes under the respective host plants. A colorful appendix to the coevolved *Heliconius* butterflies rounds out the volume. The author, Ronald Boender, is an expert on passionflower butterflies and a pioneer in breeding and exhibiting butterflies. In 1988, he developed and opened the first commercial butterfly farm and public exhibition in the Americas called Butterfly World in Coconut Creek near Fort Lauderdale, Florida. Quickly becoming a renowned expert on growing passionflowers, he developed the largest collection of species and has contributed much knowledge not only to horticulture but also the scientific understanding of the relationship between the vines and the butterflies. In 1990, he founded the *Passiflora Society International* (PSI) and until recent years was president and prime mover. Through his lifelong interest in nature photography, he started a collection of passionflower photos which has grown now into this pictorial atlas. Completed by renowned *Passiflora* authority Ronald Boender together with John MacDougal, Ph.D., and John Vanderplank, Ph.D., comprehensively highlights the breadth and beauty of the species occurring in the wild. Lavish contributions by 27 other photographers expand the photographic atlas to other climates, including cool-loving Andean species. Readers will delight in exploring page after page of amazing and intricate flowers and leaves of every color and form. This beautiful informational guide will be instructive and engaging to all readers: gardeners, hobbyists, and scientists alike. This is a wonderful gift for any nature lover or gardener or anyone interested in tropical plants or nature photography. *Passion Flowers* John Vanderplank, 1996. Whatever your level of interest or curiosity, Vanderplank has provided the information for further exploration. Separate chapters explain the classification and structure of passion flowers, the legend and etymology, cultivation, propagation, hybridization, pests, and diseases, and the unique interactions of butterflies and passion flowers. The bulk of the book provides

detailed information on 100 taxa including specific botanical descriptions along with a narrative covering their discovery distribution and the author's experience with these species or hybrids Appending the text is a useful identification key in chart form lists of addresses and suppliers a glossary and a brief bibliography John Vanderplank's *Passion Flowers* is the most comprehensive work on the subject in more than fifty years Steven Foster American Horticulturist review of the first edition Lost flower of the Andes is blooming in Britain This headline in the Daily Telegraph celebrated the last remaining example of *Passiflora lourdesae* a herbaceous climber from a rapidly developing region of Venezuela that was raised from a cutting by John Vanderplank the only successful attempt from a dozen cuttings sent to botanists around the world The story of this dramatic recovery from extinction is one of the delights of this new edition of *Passion Flowers* This edition adds 53 new species bringing the total number of species documented to over 150 and includes 41 new color photographs The book now illustrates nearly a quarter of all known species In addition there are 50 new line drawings all showcased in a new larger format

Passiflora Torsten Ulmer, John Mochrie MacDougal, 2004 As lushly illustrated as it is informative this book reveals the immense variation found among members of this extraordinary genus

Passion Flowers John Vanderplank, 2000 Thorough documentation and glorious illustrations of an exotic flower

Passion-flowers Julia Ward Howe, 1854
