**Relativization in Ojibwe** Michael D. Sullivan,2020-01-01 In Relativization in Ojibwe Michael D Sullivan Sr compares varieties of the Ojibwe language and establishes subdialect groupings for Southwestern Ojibwe often referred to as Chippewa of the Algonquian family Drawing from a vast corpus of both primary and archived sources he presents an overview of two strategies of relative clause formation and shows that relativization appears to be an exemplary parameter for grouping Ojibwe dialect and subdialect relationships Specifically Sullivan targets the morphological composition of participial verbs in Algonquian parlance and categorizes the variation of their form across a number of communities In addition to the discussion of participles and their role in relative clauses he presents original research linking geographical distribution of participles most likely a result of historic movements of the Ojibwe people to their present location in the northern midwestern region of North America Following previous dialect studies concerned primarily with varieties of Ojibwe spoken in Canada Relativization in Ojibwe presents the first study of dialect variation for varieties spoken in the United States and along the border region of Ontario and Minnesota Starting with a classic Algonquian linguistic tradition Sullivan then recasts the data in a modern theoretical framework using previous theories for Algonquian languages and familiar approaches such as feature checking and the split CP hypothesis

**Multiword expressions** Manfred Sailer ,Stella Markantonatou ,2018 Multiword expressions MWEs are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the

machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical Functional Grammar, Lexicon Grammar.

*Multiword expressions at length and in depth* Stella Markantonatou, Carlos Ramisch, Agata Savary, Veronika Vincze, 2018. The annual workshop on multiword expressions takes place since 2001 in conjunction with major computational linguistics conferences and attracts the attention of an ever growing community working on a variety of languages, linguistic phenomena, and related computational processing issues. MWE 2017 took place in Valencia, Spain, and represented a vibrant panorama of the current research landscape on the computational treatment of multiword expressions, featuring many high quality submissions. Furthermore, MWE 2017 included the first shared task on multilingual identification of verbal multiword expressions. The shared task with extended communal work has developed important multilingual resources and mobilised several research groups in computational linguistics worldwide. This book contains extended versions of selected papers from the workshop. Authors worked hard to include detailed explanations, broader and deeper analyses, and new exciting results which were thoroughly reviewed by an internationally renowned committee. We hope that this distinctly joint effort will provide a meaningful and useful snapshot of the multilingual state of the art in multiword expressions modelling and processing, and will be a point of reference for future work.

**A Dictionary of Roman Coins, Republican and Imperial** Seth William Stevenson, 1889. *Course in Nepali* David Matthews, 2013-01-11. Nepali has also been adopted by peoples of the Himalayan region who belong to different linguistic groups and is now understood throughout the whole of Nepal, the Darjeeling region of West Bengal, Sikkim, Bhutan, and parts of Tibet where it has functioned as a language of trade and commerce for well over two centuries. The aim of this course, which covers the whole grammar and all the constructions of modern Nepali, is to present a full description of both the spoken and written forms of modern standard Nepali and to enable the student to understand, speak and read most types of Nepali he or she is likely to encounter. The earlier lessons concentrate mainly on the spoken style and the conversation passages, whilst the later lessons concern religious, political, and literary topics. Nepal is a land which already provides great enjoyment to the increasing number of visitors from the west. A knowledge of the language leads to a deeper understanding of the culture of its people, and the object of *A Course in Nepali* is to provide the means of learning it without much difficulty. Earlier editions of this course have been the standard book for students at the School of Oriental and African Studies, and it is without question the established market leader. **The**

**Voynich Manuscript: an Elegant Enigma** M. E. D'Imperio, 2012-08-17 The reader may well wonder What still another paper on the Voynich manuscript So much has been written already on that most studies most curious and most mysterious manuscript upon which so many researchers have exhausted their faculties in vain As a relatively recent newcomer to the ranks of Voynich manuscript research the author retraced the steps of all his predecessors rediscovering their sources repeating their experiments growing excited over the same promising leads that excited them and learning only later that all these things have already been tried and had failed often several times The author does not wish to imply that he regrets any of his efforts In fact he little suspected when he was first introduced to the problem of the Voynich manuscript at Brigadier Tiltman's lecture in November 1975 that he would spend all his spare time for the next year on an intellectual and spiritual journey spanning so many centuries and ranging over so many aspects of art history philosophy and philology The fact remains that in spite of all the paper that other have written about the manuscript there is no complete survey of all the approaches ideas background information and analytic studies that have accumulated over the nearly fifty five years since the manuscript was discovered by Wilfrid M Voynich in 1912 Most of the papers have been written to advance or to refute a particular theory providing in passing a brief glance at others efforts primarily to sweep them out of the way Much vital information is to be found only in unpublished notes and papers inaccessible to most students The author felt that it would be useful to pull together all the information that he could obtain from all the sources and present them in an orderly fashion This monograph is arranged in four main sections First the presentation of a survey of all of the basic facts of the problem the givens as it were Second coverage of all the primary avenues of attack and the information relevant to each the external characteristics of the manuscript itself the drawings and the text Third a survey of the major claims of decipherment and other substantial analytic work carried out by various researchers Fourth a sketch of collateral and background topics which seem likely to be useful
