Pastoral Economics in the Kingdom of Naples John A. Marino, 1988 *Pastoral Economics in the Kingdom of Naples* John A. Marino, 1988 **New Approaches to Naples c.1500-c.1800** Helen Hills, 2016-04-22 Early modern Naples has been characterized as a marginal wild and exotic place on the fringes of the European world and as such an appropriate target of attempts by Catholic missionaries and others to civilize the city Historiographically bypassed in favour of Venice Florence and Rome Naples is frequently seen as emblematic of the cultural and political decline in the Italian peninsula and as epitomizing the problems of southern Italy Yet as this volume makes plain such views blind us to some of its most extraordinary qualities and limit our understanding not only of one of the world's great capital cities but also of the wider social cultural and political dynamics of early modern Europe As the centre of Spanish colonial power within Europe during the vicerealty and with a population second only to Paris in early modern Europe Naples is a city that deserves serious study Further as a Habsburg dominion it offers vital points of comparison with non European sites which were subject to European colonialism While European colonization outside Europe has received intense scholarly attention its cultural impact and representation within Europe remain under explored Too much has been taken for granted Too few questions have been posed In the sphere of the visual arts investigation reveals that Neapolitan urbanism architecture painting and sculpture were of the highest quality during this period while differing significantly from those of other Italian cities For long ignored or treated as the subaltern sister of Rome this urban treasure house is only now receiving the attention from scholars that it has so long deserved This volume addresses the central paradoxes operating in early modern Italian scholarship It seeks to illuminate both the historiographical pressures that have marginalized Naples and to showcase important new developments in Neapolitan cultural history and art history Those developments showcased here include bot **Rivers of the Sultan** Faisal H. Husain, 2021-03-05 The Tigris and Euphrates rivers run through the heart of the Middle East and merge in the area of Mesopotamia known as the cradle of civilization In their long and volatile political history the sixteenth century ushered in a rare era of stability and integration A series of military campaigns between the Mediterranean Sea and the Persian Gulf brought the entirety of their flow under the institutional control of the Ottoman Empire then at the peak of its power and wealth Rivers of the Sultan tells the history of the Tigris and Euphrates during the early modern period Under the leadership of Sultan S leyman I the rivers became Ottoman from mountain to ocean managed by a political elite that pledged allegiance to a single household professed a common religion spoke a lingua franca and received orders from a central administration based in Istanbul Faisal Husain details how Ottoman unification institutionalized cooperation among the rivers dominant users and improved the exploitation of their waters for navigation and food production Istanbul harnessed the energy and resources of the rivers for its security and economic needs through a complex network of forts canals bridges and shipyards Above all the imperial approach to river management rebalanced the natural resource disparity within the Tigris Euphrates

basin Istanbul regularly organized shipments of grain metal and timber from upstream areas of surplus in Anatolia to downstream areas of need in Iraq Through this policy of natural resource redistribution the Ottoman Empire strengthened its presence in the eastern borderland region with the Safavid Empire and fended off challenges to its authority Placing these world historic bodies of water at its center Rivers of the Sultan reveals intimate bonds between state and society metropole and periphery and nature and culture in the early modern world History of the Adriatic Egidio Ivetic,2022-05-27 The Adriatic is the small Mediterranean a sea within a sea part of the Mediterranean and at the same time detached from it a largely enclosed sea with stunning coastlines and a long history of commercial political and cultural exchange Silent witness to the flow of civilizations the Adriatic is the meeting point of East and West where many empires had their frontiers and some overlapped With Italy on one side and the Balkans on the other the Adriatic is the area where the Latin West became intertwined with the Greek and Ottoman East This book tells the history of the Adriatic from the first cultures of the Neolithic Age through to the present day All of the great civilizations and cultures that bordered and crossed the Adriatic are discussed Ancient Greece and Rome Byzantium and the Holy Roman Empire Venice and the Ottomans Catholicism Orthodox Christianity and Islam Byzantium was replaced by Venice queen of the Adriatic which reached its zenith at the beginning of the sixteenth century and maintained commercial and military hegemony in its Gulf sharing the sea with the Turks the Habsburgs the Pope and the Spanish vice kingdom of Naples It was Napoleon who ended Venice s reign in 1797 In the nineteenth century the Austrian Empire prevailed and Central Europe reached the Mediterranean through the Adriatic United Italy placed its most symbolic frontier in the eastern Adriatic clashing with Austria Hungary in the First World War The twentieth century was marked by the prolonged conflicts and eventually peace between Yugoslavia Albania and Italy Today the Adriatic is a region increasingly integrated into the European Union experiencing a new era of cooperation following the dramatic collapse of Yugoslavia Across centuries this book illustrates the rich cultural and artistic heritage of diverse civilizations as they left their mark on the cities shores and states of the Adriatic **A Companion to the**

Renaissance in Southern Italy (1350-1600) Bianca de Divitiis,2023-01-09 A Companion to the Renaissance in Southern Italy offers readers unfamiliar with Southern Italy an introduction to different aspects of the fifteenth and sixteenth century history and culture of this vast and significant area of Europe situated at the center of the Mediterranean Commonly regarded as a backward rural region untouched by the Italian Renaissance the essays in this volume paint a rather different picture The expert written contributions present a general survey of the most recent research on the centers of southern Italy as well as insight into the ground breaking debates on wider themes such as the definition of the city continuity and discontinuity at the turn of the sixteenth century and the effects of dynastic changes from the Angevin and Aragonese Kingdom to the Spanish Viceroyalty Taken together they form an essential resource on an important yet all too often overlooked or misunderstood part of Renaissance Italy Contributors Giancarlo Abbamonte David Abulafia Guido Cappelli

Chiara De Caprio Bianca de Divitiis Fulvio Delle Donne Teresa D Urso Dinko Fabris Guido Giglioni Antonietta Iacono Fulvio Lenzo Lorenzo Miletto Francesco Montuori Pasquale Palmieri Eleni Sakellariou Francesco Senatore Francesco Storti Pierluigi Terenzi Carlo Vecce Giuliana Vitale and Andrea Zezza *The Climate of Rebellion in the Early Modern Ottoman Empire* Sam White, 2011-08-15 The Climate of Rebellion in the Early Modern Ottoman Empire explores the serious and far reaching impacts of Little Ice Age climate fluctuations in Ottoman lands This study demonstrates how imperial systems of provisioning and settlement that defined Ottoman power in the 1500s came unraveled in the face of ecological pressures and extreme cold and drought leading to the outbreak of the destructive Celali Rebellion 1595 1610 This rebellion marked a turning point in Ottoman fortunes as a combination of ongoing Little Ice Age climate events nomad incursions and rural disorder postponed Ottoman recovery over the following century with enduring impacts on the region s population land use and economy

Cultures of Conflict Resolution in Early Modern Europe Stephen Cummins, Laura Kounine, 2017-05-15 Disputes discord and reconciliation were fundamental parts of the fabric of communal living in early modern Europe This edited volume presents essays on the cultural codes of conflict and its resolution in this period under three broad themes peacemaking as practice the nature of mediation and arbitration and the role of criminal law in conflicts Through an exploration of conflict and peacemaking this volume provides innovative accounts of state formation community and religion in the early modern period *The Cost of Empire* Antonio Calabria, 2002-08-08 A uniquely broad comprehensive and sophisticated analysis of an early modern fiscal system *Emperor Charles V, Impresario of War* James D. Tracy, 2002-11-14 Table of contents **Italy in the Age of the Renaissance** John M. Najemy, 2004-11-05 Italy in the Age of Renaissance offers a new introduction to the most celebrated period of Italian history in twelve essays by leading and innovative scholars Recent scholarship has enriched our understanding of Renaissance Italy by adding new themes and perspectives that have challenged the traditional picture of a largely secular and elite world of humanists merchants patrons and princes These new themes encompass both social and cultural history the family women lay religion the working classes marginal social groups as well as new dimensions of political history that highlight the growth of territorial states the powers and limits of government the representation of power in art and architecture the role of the South and the dialogue between elite and non elite classes This thematically organized volume introduces readers to the fruitful interaction between the more traditional topics in Renaissance studies and the new broader approach to the period that has developed in the last generation *The Oxford Handbook of Animals in Classical Thought and Life* Gordon Lindsay Campbell, 2014-08-28 The Oxford Handbook of Animals in Classical Thought and Life is the first comprehensive guide to animals in the ancient world encompassing all aspects of the topic by featuring authoritative chapters on 33 topics by leading scholars in their fields As well as an introduction to and a survey of each topic it provides guidance on further reading for those who wish to study a particular area in greater depth Both the realities and the more theoretical aspects of the treatment of animals in ancient times are covered in chapters which explore the

domestication of animals animal husbandry animals as pets Aesop's Fables and animals in classical art and comedy all of which closely examine the nature of human animal interaction More abstract and philosophical topics are also addressed including animal communication early ideas on the origin of species and philosophical vegetarianism and the notion of animal rights

Patrons and Adversaries Caroline Castiglione, 2005-02-03 The early modern Roman countryside was a site of contestation between great aristocratic families and an expanding papal political regime Rarely has the role of the inhabitants of this landscape the villagers been considered as part of that power struggle As Caroline Castiglione shows in this compelling revisionist work one Roman aristocratic family the Barberini was not squeezed out of governing by the extension of the papal bureaucracy but rather became increasingly engaged with it during the long eighteenth century Through their participation in the rural commune villagers in an extensive territory belonging to the Barberini became active participants in the governing of the countryside Villagers cultivated and exploited interference from the aristocratic family and the papal government but they also kept urban elites at bay defending their rights through the strategies of adversarial literacy Such literate practices drew on village mastery of local constitutions debates in the village assembly and brilliant use of the legal system of the papacy to thwart the designs of the Barberini Later villagers created and interpreted sources for themselves effectively challenging the elite monopoly on making and interpreting texts A lost world of increasingly savvy villagers irate nobles and exasperated bureaucrats emerges here in an engaging narrative that chronicles how seemingly marginalized villagers challenged the pragmatic control of the Roman countryside using texts and ideas that urban elites had exported to the countryside for other purposes

The Western Mediterranean Kingdoms David S H Abulafia, David Bates, 2014-06-17 A pioneering account of the dynastic struggle between the kings of Aragon and the Angevin kings of Naples which shaped the commercial as well as the political map of the

Pijuan, 2022-11-30 Beginning in the twelfth century taxation increasingly became an essential component of medieval society in most parts of Europe The state building process and relations between princes and their subject cities or between citizens and their rulers were deeply shaped by fiscal practices Although medieval taxation has produced many publications over the past decades there remains no synthesis of this important subject This volume provides a comprehensive overview on a European scale and suggests new paths of inquiry It examines the fiscal systems and practices of medieval Europe including essential themes such as medieval fiscal theory and the power to tax royal and urban taxation and Church taxation It goes on to survey the entire European continent as well as including comparative chapters on the non European medieval world exploring questions on how taxation developed and functioned what kinds of problems authorities encountered assessing their fiscal power and the circulation of fiscal cultures and practices across cities and kingdoms The book also provides a glossary of the most important types of medieval taxes giving an essential definition of key terms cited in the chapters The Routledge Handbook of Public Taxation in Medieval Europe will appeal to a large audience from seasoned scholars who need a comprehensive synthesis to students and younger scholars in search of an overview of this critical subject **Love,**

Self-Deceit and Money Koen Stapelbroek, 2008-04-05 Love drives and gives life to the commerce of mankind Thus the sixteen year old Ferdinando Galiani 1728 1787 presented his project to understand the sociable nature of man This observation a reflection of his own position on the relation between trade and virtue hinted at what the mature works of Galiani one of the most noteworthy economists and wits in eighteenth century Italy would eventually yield In Love Self Deceit and Money Koen Stapelbroek reconstructs the Early Neapolitan Enlightenment debate on the morality of market societies a debate that hinged on the preservation of Naples independent statehood in a global arena of commercial and military competition Galiani rejected the moralizing and mercantile ideas of his contemporaries regarding the dangers threatening Naples and in his Della moneta 1751 he justified the systems set in place by the Neapolitan government With reference to early previously unstudied lectures on self deceptive Platonic love Koen Stapelbroek examines Galiani s role in the wider debate arguing that his early moral philosophical and historical work suggests a great deal about his political economic stance including his assertion that money is the ultimate ordering principle in the universe As a study of one of the most idiosyncratic minds of the Enlightenment period Love Self Deceit and Money shows how diverse ideas of the development of individual passions into social dispositions commerce and reform politics dovetailed seamlessly in the intellectual climate of eighteenth century Europe **Coping with Crisis: The Resilience and Vulnerability of Pre-Industrial Settlements**

Daniel R. Curtis, 2016-05-13 Why in the pre industrial period were some settlements resilient and stable over the long term

while other settlements were vulnerable to crisis Indeed what made certain human habitations more prone to decline or even total collapse than others All pre industrial societies had to face certain challenges exogenous environmental hazards such as earthquakes or plagues economic or political hazards from outside such as warfare or expropriation of property or hazards of their own making such as soil erosion or subsistence crises How then can we explain why some societies were able to overcome or negate these problems while other societies proved susceptible to failure as settlements contracted stagnated were abandoned or even disappeared entirely This book has been stimulated by the questions and hypotheses put forward by a recent disaster studies literature in particular by placing the intrinsic arrangement of societies at the forefront of the explanatory framework Essentially it is suggested that the resilience or vulnerability of habitation has less to do with exogenous crises themselves but on endogenous societal responses which dictate a the extent of destruction caused by crises and the capacity for society to protect itself and b the capacity to create a sufficient recovery By empirically testing the explanatory framework on a number of societies between the Middle Ages and the nineteenth century in England the Low Countries and Italy it is ultimately argued in this book that rather than the protective functions of the state or the market or the implementation of technological innovation or capital investment the most resilient human habitations in the pre industrial period were those than displayed an equitable distribution of property and a well balanced distribution of power between social interest groups Equitable distributions of power and property were the underlying conditions in pre industrial societies that all
