Paterson And Zderad Vol 7 Humanistic Nursing Theory:

Humanistic Nursing Josephine Paterson, 2016-05-14 Concisely humanistic nursing practice theory proposes that nurses consciously and deliberately approach nursing as an existential experience. Then they reflect on the experience and phenomenologically describe the calls they receive, their responses, and what they come to know from their presence in the nursing situation. It is believed that compilation and complementary syntheses of these phenomenological descriptions over time will build and make explicit a science of nursing. Paterson and Zderad Nancy O'Connor, 1992-11-20 Nursing is placed within a humanistic framework in Paterson and Zderad's theory, which defines nursing as a nurturing response aimed at well-being. Three constructs of nursing, which describe the why and how of nursing practice, are identified: comfort, clinical, and all at once. In this volume, O'Connor explores the origin of the theory and its underlying assumptions. She also examines the major concepts of the metaparadigm of nursing, including the nursing process. *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1993 **Current Catalog** National Library of Medicine (U.S.), 1993-04 **Subject Guide to Books in Print**, 1996

Translated into sixteen languages, with more than 700,000 copies sold around the world. *In a Different Voice* has inspired new research, new educational initiatives, and political debate and

helped many women and men to see themselves and each other in a different light Carol Gilligan believes that psychology has persistently and systematically misunderstood women their motives their moral commitments the course of their psychological growth and their special view of what is important in life Here she sets out to correct psychology's misperceptions and refocus its view of female personality The result is truly a tour de force which may well reshape much of what psychology now has to say about female experience

Nursing as Therapy Richard McMahon,Alan Pearson,2013-11-11 Over the past 20years nursing has begun to rediscover some of its basic truths which have become obscured because of the rise in technology and medical knowledge this century One of these basic truths is the concern of this book that intelligent sensitive nursing does make a difference to the consumers of health care Like most essential truths this seems almost too obvious to be stated Nevertheless many nurses have become increasingly aware of a commonly held view that getting better or staying healthy is largely dependent upon the intervention of or monitoring by medical practitioners and paramedical therapists together with the technology they use and that nurses merely carry out the orders of such workers and keep things in order An apt analogy frequently used is that of the air journey The point of the journey is to get from A to B and is largely dependent upon the aeroplane i e the technology in health care and the crew in the cockpit i e

Theoretical Nursing Afaf Ibrahim Meleis,2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher **Nursing as Caring** Anne Boykin,2001 Describes a new theory of nursing as caring and caring as a way of nurses living in the world This theory provides a view that can be lived in all nursing situations and can be practiced alone or in combination with other theories Illustrates the practical meaning of the theory in a range of nursing situations discusses nursing service administration from the perspective of the theory and offers strategies for transforming nursing education based on nursing as caring Boykin is dean and professor at the Christine E Lynn Center for Caring College of Nursing Florida Atlantic University Schoenhofer teaches graduate nursing at Alcorn State University c Book News Inc Middle Range Theories Sandra Peterson,Timothy S.
