a golden age in space science as increasingly more entrepreneurs Elon Musk Richard Branson Jeff Bezos are seduced by the commercial potential of human access to space But *Beyond Earth* does not offer another wide eyed technology fantasy instead it is grounded not only in the human capacity for invention and the appeal of adventure but also in the bureaucratic political and scientific realities that present obstacles to space travel realities that have hampered NASA's efforts ever since the Challenger disaster In *Beyond Earth* the authors offer groundbreaking research and argue persuasively that not Mars but Titan a moon of Saturn with a nitrogen atmosphere a weather cycle and an inexhaustible supply of cheap energy offers the most realistic and thrilling prospect of life without support from Earth **How It Was for Me** Andrew Sean

Near-Earth Objects Donald K. Yeomans, 2016-11-08 An insider s look at the science of near Earth comets and asteroids Of all the natural disasters that could befall us only an Earth impact by a large comet or asteroid has the potential to end civilization in a single blow Yet these near Earth objects also offer tantalizing clues to our solar system s origins and someday could even serve as stepping stones for space exploration In this book Donald Yeomans introduces readers to the science of near Earth objects its history applications and ongoing quest to find near Earth objects before they find us In its course around the sun the Earth passes through a veritable shooting gallery of millions of nearby comets and asteroids One such asteroid is thought to have plunged into our planet sixty five million years ago triggering a global catastrophe that killed off the dinosaurs Yeomans provides an up to date and accessible guide for understanding the threats posed by near Earth objects and also explains how early collisions with them delivered the ingredients that made life on Earth possible He shows how later impacts spurred evolution allowing only the most adaptable species to thrive in fact we humans may owe our very existence to objects that struck our planet Yeomans takes readers behind the scenes of today s efforts to find track and study near Earth objects He shows how the same comets and asteroids most likely to collide with us could also be mined for precious natural resources like water and oxygen and used as watering holes and fueling stations for expeditions to Mars and the outermost reaches of our solar system

Great North Road Peter F. Hamilton, 2013-01-01 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY PUBLISHERS WEEKLY New York Times bestselling author Peter F Hamilton s riveting new thriller combines the nail biting suspense of a serial killer investigation with clear eyed scientific and social extrapolation to create a future that seems not merely plausible but inevitable A century from now thanks to a technology allowing instantaneous travel across light years humanity has solved its energy shortages cleaned up the environment and created far flung colony worlds The keys to this empire belong to the powerful North family composed of successive generations of clones Yet these clones are not identical For one thing genetic errors have crept in with each generation For another the original three clone brothers have gone their separate ways and the branches of the family are now friendly rivals more than allies Or maybe not

so friendly At least that's what the murder of a North clone in the English city of Newcastle suggests to Detective Sidney Hurst Sid is a solid investigator who'd like nothing better than to hand off this hot potato of a case The way he figures it whether he solves the crime or not he'll make enough enemies to ruin his career Yet Sid's case is about to take an unexpected turn because the circumstances of the murder bear an uncanny resemblance to a killing that took place years ago on the planet St Libra where a North clone and his entire household were slaughtered in cold blood The convicted slayer Angela Tramelio has always claimed her innocence And now it seems she may have been right Because only the St Libra killer could have committed the Newcastle crime Problem is Angela also claims that the murderer was an alien monster Now Sid must navigate through a Byzantine minefield of competing interests within the police department and the world's political and economic elite all the while hunting down a brutal killer poised to strike again And on St Libra Angela newly released from prison joins a mission to hunt down the elusive alien only to learn that the line between hunter and hunted is a thin one
