## **Path To Collective Madness A Study In Social Order And Political Pathology:**

**Path to Collective Madness** Dipak K. Gupta, 2001-06-30 Why did the Rwandan genocide take place How could parents feed their own children drinks laced with poison in Jonestown As we see many parts of the world being engulfed in fratricidal frenzy we wonder if it can happen in this country Gupta examines contemporary cases of genocide and mass murder and seeks to explain why certain societies are more prone to these actions and others are relatively immune Gupta sees a dialectical tension between our two identities the self and the collective The end of the medieval period was marked by the emergence of individualism in Europe With time the march of individualism engulfed the entire Western world and permeated every aspect of its culture tradition and academic paradigm Neoclassical economics is the embodiment of this single minded pursuit of the rationality of individualism However our psychobiological evolution has also imbued us with the irrepressible desire to form groups and to act upon its welfare The reason for this eternal conflict lies in our own struggle with our two identities When the pendulum swings to the extreme end of collectivism genocide and other forms of social abnormalities collective madness occur When we move too far into individualism people tend to seek something greater beyond selfish pursuits Through his panoramic view Gupta provides an explanation for both social order and political pathology that will be of interest to students scholars and other researchers involved with ethnic conflict collective behavior and conflict resolution

**Terrorism in Kenya and Uganda** Anneli Botha, 2016-11-02 This book analyzes some of the commonly accepted causes of radicalization within the context of four organizations in eastern Africa It identifies and discusses the facilitating agents needed to enable radicalization and recruitment and answers one of the most fundamental questions the public and scholars alike are confronted with Why are all people confronted with the same external circumstances not being radicalized Practitioners and policymakers will realize that although one can learn from the experiences of others developing and implementing effective counter radicalization strategies should be shaped around the unique circumstances of the specific organization

**The Expansion of Economics** Shoshana Grossbard-Shechtman, Christopher K. Clague, 2016-07-08 Economics like most other social sciences is not a pure discipline Indeed it has been enhanced by the fact that there is so much overlap between it and the related fields of business industrial relations political science social psychology and sociology This book is the first attempt to explain how work in economics has influenced and benefited from a merging of economic analysis with the research practices of these related fields of study With contributions from leading economists from around the world it demonstrates how economics is leading the way toward a more unified social science

Understanding Terrorism and Political Violence Dipak K. Gupta, 2008-03-25 This book explains the lifecycle of terrorist

organizations from an innovative theoretical perspective combining economics with social psychology. It provides a new approach to understanding human behaviour in organized society and then uses this to analyze the forces shaping the lifecycle of violent political movements. Economic and rational choice theorists assume that human beings are motivated only by self utility yet terrorism is ultimately an altruistic act in the eyes of its participants. This book highlights the importance of the desire to belong to a group as a motivating factor and argues that all of us face an eternal trade off between selfishness and community concern. This hypothesis is explored through four key groups: the IRA in Northern Ireland, Al Qaeda, Hamas and the Naxalites in India. Through this the book analyzes the birth, growth, transformation and demise of violent political movements and ends with an analysis of the conditions which determine the outcome of the war against terrorism. *Understanding Terrorism and Political Violence* will be essential reading for advanced students of terrorism studies and political science and of great interest to students of social psychology and sociology. Root Causes of Terrorism Tore Bjørgo, 2005-06-30. This team of international experts analyses the possibilities and limitations of preventing or reducing terrorism by addressing the factors that give rise to it and sustain it. The key questions raised include: what are the main circumstances that provide preconditions for the emergence of various types of terrorism? what are the typical precipit

*The Political Economy of Iran* Farhad Gohardani, Zahra Tizro, 2019-03-07. This study entails a theoretical reading of the Iranian modern history and follows an interdisciplinary agenda at the intersection of philosophy, psychoanalysis, economics and politics and intends to offer a novel framework for the analysis of socio-economic development in Iran in the modern era. A brief review of Iranian modern history from the Constitutional Revolution to the Oil Nationalization Movement, the 1979 Islamic Revolution and the recent Reformist and Green Movements demonstrates that Iranian people travelled full circle. This historical experience of socio-economic development revolving around the bitter question of 'Why are we backward' and its manifestation in perpetual socio-political instability and violence is the subject matter of this study. Michel Foucault's conceived relation between the production of truth and production of wealth captures the essence of hypothesis offered in this study. Foucault 1980:93-94 maintains that 'In the last analysis we must produce truth as we must produce wealth; indeed we must produce truth in order to produce wealth in the first place.' Based on a hybrid methodology combining hermeneutics of understanding and hermeneutics of suspicion, this monograph proposes that the failure to produce wealth has had particular roots in the failure in the production of truth and trust. At the heart of the proposed theoretical model is the following formula: the Iranian subject's confused preference structure culminates in the formation of unstable coalitions which in turn leads to institutional failure, creating a chaotic social order and a turbulent history as experienced by the Iranian nation in the modern era. As such, the society oscillates between the chaotic states of socio-political anarchy emanating from irreconcilable differences between and within social assemblages and their affiliated hybrid forms of regimes of truth in the springs of freedom and repressive states of order in the winters of discontent. Each time after the experience of

chaos the order is restored based on the emergence of a final arbiter Iranian leviathan as the evolved coping strategy for achieving conflict resolution This highly volatile truth cycle produces the experience of socio economic backwardness and violence The explanatory power of the theoretical framework offered in the study exploring the relation between the production of truth trust and wealth is demonstrated via providing historical examples from strong events of Iranian modern history The significant policy implications of the model are explored This monograph will appeal to researchers scholars graduate students policy makers and anyone interested in the Middle Eastern politics Iran development studies and political economy
