Intellectual Property and Traditional Knowledge in the

Global Economy Teshager W. Dagne, 2014-09-04 Arising from recent developments at the international level many developing countries indigenous peoples and local communities are considering using geographical indications GIs to protect traditional knowledge and to promote trade and overall economic development Despite the considerable enthusiasm over GIs in diverse quarters there is an appreciable lack of research on how far and in what context GIs can be used as a protection model for traditional knowledge based resources This book critically examines the potential uses of geographical indications as models for protecting traditional knowledge based products and resources in national and international intellectual

property legal frameworks By analysing the reception towards GIs from developing countries and advocates of development in the various legal and non legal regimes including the World Trade Organization World Intellectual Property Organization and the Convention on Biological Diversity and the Food and Agricultural Organization the book evaluates the development potential of GIs in relation to ensuing changes in international intellectual property law in accommodating traditional knowledge Teshager W Dagne argues for a degree of balance in the approach to the implementation of global intellectual property rights in a manner that gives developing countries an opportunity to protect traditional knowledge based products The book will be of great interest and use to scholars and students of intellectual property law public international law traditional knowledge and global governance Intellectual Property Rights, Trade and Biodiversity Graham Dutfield,2000 This text examines the international agreements governing trade in genetic resources crucial resources for world agriculture food security and large industries such as pharmaceuticals Intellectual Property Rights IPRs in these resources are critical for those involved in the trade including industry and developing countries The book analyzes the Convention on Biological Diversity CBD World Trade Organization agreements and other agreements It explains how they can be integrated into an equitable training regime Sustainable Resource Use Alex Smajgl,Silva Larson,2012-06-25 The way that humans organize both resource access and resource use is vital to the management of natural resources Within different contexts institutional arrangements such as the rules of common and private property rights become levers by which human behaviours can be modified and steered towards the goals of sustainable natural resource management Featuring contributions from leading thinkers in the field this groundbreaking volume examines institutional dynamics from the perspective of natural resource management The book is organized into four parts The first discusses institutional diversity and contextual change Following this institutional misfit is analysed with a strong focus on the long term impacts of colonial structures in the Asia Pacific region The book then discusses experiences with institutional dynamics in order to ease the tension of such misfits before examining future research needs Ultimately through careful argument and by deploying original research the authors make the case that institutional arrangements cannot be perceived as a set of parameters that can be optimized and locked in for the most efficient functioning of a system nor can institutions be evaluated outside the context in which they were developed This is powerful thought provoking and important reading for academics researchers policy makers and professionals in resource institutional and environmental economics and land use planning and policy across the full range of natural resource sectors from forestry to agriculture Published with CSIRO Cover image Blue Flower of Life c Theresa J Richardson 2006 Towards a "second Generation" in Environmental Laws in the Asian and Pacific Region Lin Heng Lye,Maria Socorro Z. Manguiat,2003 Laws in the twentieth century were based on economic growth and development This new century calls for the reassessment of all laws from an environmental perspective in consideration of such looming environmental concerns as global warming degradation of biodiversity and pollution This book captures some provoking thoughts raised during a

symposium on second generation environmental laws held in Japan in 2002 The wide range of articles will promote greater understanding of what has been achieved with the first generation of environmental laws what is needed for the second generation and how to bridge the two Intellectual Property Rights and Biodiversity Conservation Timothy M. This book presents the perspectives of policy makers and economists on a highly topical subject Plant breeding patents the ownership of biological innovation and associated intellectual property rights IPR are the subject of increased attention worldwide They are particularly relevant in the field of agricultural biotechnology but until recently evoked little policy analysis IPRs are particularly relevant in the field of agricultural biotechnology They are issues affecting public and private sector organizations and companies and are significant for developing as well as developed countries *The SAGE*

Handbook of Intellectual Property Matthew David,Debra Halbert,2014-11-18 This Handbook brings together scholars from around the world in addressing the global significance of controversies over and alternatives to intellectual property IP today It brings together over fifty of the leading authors in this field across the spectrum of academic disciplines from law economics geography sociology politics and anthropology This volume addresses the full spectrum of IP issues including copyright patent trademarks and trade secrets as well as parallel rights and novel applications In addition to addressing the role of IP in an increasingly information based and globalized economy and culture it also challenges the utility and viability of IP today and addresses a range of alternative futures **Intellectual Property, Human Rights and Development**

Duncan Matthews,2011-01-01 Each chapter analyses both policy areas access to medicines and agriculture genetic resources These three exceptionally rich fieldwork based case studies constitute the meat and the principal contribution of this book The book marks a major contribution for the empirical material alone Ken Shadlen Journal of Development Studies Duncan Matthews has produced a first rate in depth analysis of the role of NGOs in international and national intellectual property policy Based on extensive primary research this book provides a smart thoughtful perspective on the role of key developing country NGOs NGOs relationships with national policymakers and with multilateral institutions Everyone interested in the interface of intellectual property policy and human rights development access to medicines farmers rights and biodiversity should read this compelling account I highly recommend this excellent contribution to our understanding Susan K Sell George Washington University US One of the features of international negotiations has been the increasing participation of non governmental organizations In this important book Duncan Matthews shows the nature and extent of NGO influence in the negotiations over intellectual property Written with great clarity and drawing on interview data and case studies the book will be valuable to both scholars and practitioners working in international negotiation Peter Drahos Australian

National University This book reveals how non governmental organizations helped developing countries to better understand and mitigate the impact of the new standards of intellectual property protection that those countries were forced to adopt in the context of trade negotiations Based on comprehensive and rigorous research the author offers an outstanding piece that will not only be important for academics policy makers and students working in the area of intellectual property but also for those more broadly interested in the implementation of human rights coalition building scenarios and framing strategies

Carlos Correa University of Buenos Aires Argentina This is a valuable corrective to a debate that is too often premised on the perspective of rich and developed countries Focussing on the network of NGOs that supports developing countries Duncan Matthews fills a major gap in the analysis of international disputes about intellectual property His analysis rightly demolishes the position that developing countries have remained helpless in the face of developments in the global governance of IPRs and helps explain how the global politics of IPRs is shifting Christopher May Lancaster University UK This insightful and important new book explores the role played by non governmental organizations NGOs in articulating concerns at the TRIPS Council the WIPO the WHO the CBD COP and the FAO that intellectual property rights can have negative consequences for developing countries Duncan Matthews describes how coalitions of international NGOs have influenced the way that the relationship between intellectual property rights and development is understood often framing the message as a human rights issue to emphasize these concerns and ensure that access to medicines food security and the rights of indigenous peoples over their traditional knowledge are protected Based on extensive research undertaken in Geneva and in developing countries the book also reveals how NGOs and broader social movements in Brazil India and South Africa have played a crucial role in addressing the negative impacts of intellectual property rights by using human rights law as a practical tool before national courts and when seeking to influence national legislation and government policy Intellectual Property Human Rights and Development will appeal to academics practitioners activists international negotiators and postgraduate students in intellectual property law human rights law the international political economy of intellectual property rights and development studies
