**Regional Development in Europe** Jürgen Allesch, 1989      **Smart Specialisation** Dominique Foray, 2014-08-13 This is the first book on a new policy approach that has been widely adopted in Europe and beyond. It analyses the concept of smart specialisation and discusses the need for smart specialisation strategies, explains why the approach is new and different from more standard policy processes and explores what are the conditions for successful implementation. **Smart Specialisation Opportunities and Challenges for Regional Innovation Policy** describes the origin of the concept, explains when a smart specialisation policy is necessary, provides a detailed analysis of the design principles of the policy and discusses the pertinence of this approach according to regional development levels. Finally, the book discusses the practical implementation phase of the process based on the first feedback acquired from certain regions engaged in the preparation of their smart specialisation strategy. The book is original in that it provides the first full analysis of smart specialisation strategies both at theoretical and practical levels. It has been written at the critical period of the implementation of smart specialisation strategies in every region in Europe. The fact that the EU has adopted smart specialisation as a mandatory principle for every region and member states will make this book well received by and very useful for i) policy makers in regional and national administrations in Europe ii) policy makers in other parts of the world who are in charge of regional policy and have heard about the concept iii) consultants, analysts and experts who are active on the markets for smart specialisation diagnosis and expertise iv) scholars, researchers and graduate students working in the field of regional studies, technology policy and geography of innovation      **Regional Development Strategies** Jeremy Alden, Philip Boland, 2013-10-18 Regional development strategies have become the focus of attention in many countries in the 1990s. This textbook provides a conceptual, theoretical and empirical analysis of regional development strategies within a European context. It examines the various regional development strategies which are currently being pursued within the regions of Europe, defined in its loosest term to include East and West. The book describes how many different European regions are attempting to reduce regional disparities by engaging themselves in coherent and focused regional development strategies and there is also private sector approach to regional economic development. There are many case studies from Europe and from other parts of the world including Japan, thereby providing lessons that different countries and regions can learn from each other      Local Development and Economic Policy: a European Forum Maurizio Baussola, Enrico Ciciotti, 2005      **Regional Behaviour** Dimitrios C. Christopoulos, 2018-02-06 This title was first published in 2001. In the framework of the EU, a number of policies have been devised for regions in order to facilitate their balanced economic development. The author argues that the focus on regional planners and their actions in academic literature has obscured the importance of regional elites in this process. The author compares Western Scotland and the west of Crete, focusing on the wider regional political and business elites within these regions and attempting a comparison of elite attitudes within regions and between regions      Regional Development

McGee, 2001 Annotation Provides a wealth of concepts and practical experience from Asia Africa Europe and the Americas suggesting ways to implement development policies for those who are left behind **Developing Frontier Cities** Harvey Lithwick, Yehuda Gradus, 2013-04-17 The Unique Nature of Frontier Cities and their Development Challenge Harvey Lithwick and Yehuda Gradus The advent of government downsizing and globalization has led to enormous competitive pressures as well as the opening of new opportunities How cities in remote frontier areas might cope with what for them might appear to be a devastating challenge is the subject of this book Our concern is with frontier cities in particular In our earlier study *Frontiers in Regional Development* Rowman and Littlefield 1996 we examined the distinction between frontiers and peripheries The terms are often used interchangeably but we believe that in fact both in scholarly works and in popular usage very different connotations are conveyed by these concepts Frontiers evoke a strong positive image of sparsely settled territories offering challenges adventure unspoiled natural landscapes and a different and for many an attractive life style Frontiers are lands of opportunity Peripheries conjure up negative

images of inaccessibility inadequate services and political and economic marginality They are places to escape from rather than frontiers which is where people escape to Peripheries are places of and for losers
