## **Regional Integration In Early Modern Scandinavia:**

Regional Integration in Early Modern Scandinavia Finn-Einar Eliassen, Jørgen Mikkelsen, Bjørn Poulsen, 2001 In the Nordic countries regions and regionalism have played a central role in politics administration economic and cultural life for a long time The differences in voting behavior language religious views social structure and attitudes between districts regions and provinces within each country are often striking In addition to these internal regions there are also greater transnational regions cutting across state and national boundaries and incorporating parts of several present day states The editors of this book have brought together a number of the most active and experienced practitioners in this field inviting them to present some of the most interesting results from their own research and readings in regional history in a form accessible also to a non Nordic readership **The Cambridge History of Scandinavia: Volume 2, 1520-1870** E. I. Kouri, Jens E.

Olesen, 2016-03-24 Volume 2 of The Cambridge History of Scandinavia provides a comprehensive and authoritative account of the Scandinavian countries from the close of the Middle Ages through to the formation of the nation states in the mid nineteenth century Beginning in 1520 the opening chapters of the volume discuss the reformation of the Nordic states and the enormous impact this had on the social structures cultural identities and traditions of individual countries With contributions from 38 leading historians the book charts the major developments that unfolded within this crucial period of Scandinavian history Chapters address topics such as material growth and the centralisation of power in the sixteenth and seventeenth centuries as well as the evolution of trade foreign policy and client states in the eighteenth century Volume 2 concludes by discussing the new economic and social orders of the nineteenth century in connection with the emergence of the nation states **Performing Nordic Heritage** Lizette Gradén, 2016-05-13 The performance of heritage takes place in prestigious institutions such as museums and archives in officially sanctioned spaces such as jubilees and public monuments but also in more mundane ephemeral and banal cultural practices such as naming of phenomena viewing exhibitions or walking in the countryside This volume examines the performance of Nordic heritage and the shaping of the very idea of Norden in diverse contexts in North America the Baltic and the Nordic countries and examines the importance of these places as sites for creating and preserving cultural heritage Offering rich perspectives on a part of Europe which has not been the centre of discussion in the Anglophone world this volume will be of value to a wide readership including cultural historians museum practitioners policy makers and scholars of heritage ethnology and folkloristics **The Scandinavian**

**Early Modern World** Jonas Monié Nordin, 2020-05-14 The Scandinavian Early Modern World explores the early modern colonialism globalization and modernity in Scandinavia along with its colonies and its role in the shaping of the modern world Scandinavians played an active role in early modern globalization and were present as traders as colonialists and as consumers in competition and collaboration with indigenous agents and other colonial actors in America Africa and India This story is rarely told The joint study of history historical landscape and material culture from a Scandinavian vantage point

The Value of Arts and Culture for Regional Development Lisbeth Lindeborg, Lars Lindkvist, 2013-08-21 In this new volume 28 Scandinavian researchers and others who are active in arts and culture seek to answer the questions What has been the effect of regional and local investment in arts and culture And what positive and negative experiences have there been This book describes and analyzes the extent to which cultural investments at local and regional levels have stimulated development and led to essential processes of change for the community in general Of special interest is how different places manage to turn the tide What do their development processes involve Which ways and means do they use to go forward in order to change their paths and start anew These are just a few of the important questions addressed in this book One of the most important findings is that while you can never transfer the successful renewal of one place to another like a blueprint certain common patterns in the cultural processes are discernible The contributors to this book show the breadth of theoretical tools that can be used to increase awareness of the significance of culture for regional development Throughout the book readers will find a multitude of theoretical concepts from entrepreneurship theory organizational institutionalism and cultural economy to cultural planning and art management This book will appeal to scholars and practitioners of urban and regional studies and cultural and creative economics **In the Doorway to Development** Ragnhild

Hutchison, 2012-03-02 Drawing on literature such as the industrious revolution and consumer revolution this book is a thorough study of the economic and structural changes taking place in the Norwegian economy prior to the Industrial revolution *Denmark, 1513-1660* Paul Douglas Lockhart, 2007-08-23 One of the largest states in Europe and the greatest of the Protestant powers Denmark in the sixteenth and seventeenth centuries was at the height of its influence Embracing Norway Iceland portions of southern Sweden and northern Germany the Danish monarchy dominated the vital Baltic trade However its geopolitical importance far exceeded its modest resources Paul Douglas Lockhart examines the short and perhaps unlikely career of Denmark as the major power of northern Europe exploring its rise to the forefront of European affairs and its subsequent decline in fortunes following its disastrous involvement in the Thirty Years War Using the latest research from Danish and other Scandinavian scholars Lockhart focuses on key issues from the dynamic role of the Oldenburg monarchy in bringing about Denmark's European integration to the impact of the Protestant Reformation on Danish culture The multi national character of the Danish monarchy is explored in depth in particular how the Oldenburg kings of Denmark sought to establish their authority over their sizable and oftentimes contentious Norwegian Icelandic and

German minorities Denmark's participation in international politics and commerce is also investigated along with the power struggle between Denmark and its rival Sweden over Baltic dominion and the Danes' unique approach to internal governance

Iron-making Societies Maria Ågren, 1998-03-01 The title of this book has a double meaning on the one hand it deals with two very different societies both of which made iron in the early modern period On the other hand iron made these societies the needs of iron production and the resistance to these demands from local peasant communities gave the societies a special kind of cohesion and rationality This volume presents the findings of a joint team of Swedish and Russian scholars examining the social organization of work in early modern iron industry and their respective societies The comparison was carried out against the backdrop of the international discussion on proto industrialization its prerequisites and consequences There has however been a certain bias in much of that debate the focus being mainly on Western Europe particularly on Britain and on textile trades This book offers an important contribution to the debate in that it widens the perspective by discussing Northern and Eastern Europe and by studying the iron industry More particularly it examines actual production processes the organization of work social conflict questions of ownership and its evolution as well as the diffusion and organization of technical knowledge The comparative approach is consistently applied throughout with each chapter closely integrating the results relating to the two selected geographical areas thus showing ways of solving some of the problems arising from comparative history

*Urban Life in Nordic Countries* Heiko Droste, 2023-12-18 Based on empirical studies this book investigates the particular urban history of the North from the 17th century until today in a comparative Northern perspective *Urban Life in Nordic Countries* is the result of a conference on Urbanity in the Periphery held in Stockholm on the occasion of the 100th anniversary of the Institute of Urban History at Stockholm University aimed at establishing the field of the urban history of the North and creating a network of urban historians of the North With a broad range of contributions from Sweden Finland Denmark Norway and Estonia the volume seeks to further discourse on the region within national and transnational lenses and to highlight possibilities for new cooperation among researchers Urban history is a transdisciplinary subject engaging not only historians but also ethnologists sociologists urban planners and cultural geographers and this book targets all scholars whose work requires a historical understanding of the Northern town European urban historians outside the region will also find this text valuable as one of the few studies to consider the urban history of the continent from a North centered viewpoint

**Cities and Economy in Europe** Katalin Szende, Erika Szívós, Boglárka Weisz, 2024-02-29 Exploring new perspectives concerning regions traditionally considered on the margins of Europe this book fills a gap in current historiography through its analysis of cities space and economy from the High Middle Ages to the present Markets trade and economy in general have formed the backbone of urban life ever since the emergence of cities and towns but classical theorists have largely focused on developments in Western Europe Urban research in the last few decades has advanced in many ways to supersede and correct this still influential image and to include other parts of

Europe into the analytical framework Building on these emerging methodologies this volume pays close attention to the fringes of Europe in the East North West and South The essays discuss the development of various spaces as nodal points for the exchange and production of commodities that took place in cities and towns The scope of this work allows for a point of comparison to frequently studied examples in Europe encouraging readers to identify larger patterns beyond individual examples Cities and Economy in Europe Markets and Trade on the Margins from the Middle Ages to the Present is the perfect resource for students and researchers of economic and urban history

**The Urban Logistic Network** Giovanni Favero, Michael-W. Serruys, Miki Sugiura, 2019-11-20 This edited collection examines the formation of urban networks and role of gateways in Europe from the Middle Ages to the modern world In the past gateway cities were merely perceived as transport points only relevant to maritime shipping Today they are seen as the organic entities coordinating the allocation of resources and supporting the growth efficiency and sustainability of logistics including both the transport and distribution of goods and services Using different historical case studies the authors consider how logistics shaped urban networks and were shaped by them
