Regional Convention On Protection Of Human Rights:

International Human Rights Protection Marc Bossuyt, 2016 International Human Rights Protection is addressed to judges and lawyers diplomats and civil servants researchers and students It is based on the author's personal research and personal involvement with a wide range of subjects such as the basic concepts of civil and social rights discrimination and affirmative action issues of procedure and jurisdiction the death penalty and issues such as the protection of refugees minorities and victims of armed conflicts At the universal level the book introduces the reader to the labyrinth of United Nations Charter based and treaty based procedures As well as an overview of the Inter American and African systems it deals at the regional level particularly with the case law of the European Court of Human Rights in Strasbourg and also looks at the national level at the case law of the US Supreme Court and the South African Constitutional Court This book adopts a particularly critical approach to the so called dynamic interpretation of the European Convention on Human Rights by the Court of Strasbourg It is the author's feeling that judges in particular those belonging to courts specialising in human rights have a tendency to systematically support interpretations benefitting the applicants while overlooking too easily the far reaching implications of judgments for society as a whole The author instead puts forward a more balanced and more realistic approach which takes into account the difficulties democratic governments face in coping with the challenges of our present time and with the pressing needs of the realities of today's world Subject International Law Human Rights Law

The Inter-American System of Human Rights David John Harris, Stephen Livingstone, 1998 This book which can be used as a text for teaching purposes gives a fascinating and authoritative treatment both the rights protected by the Inter American system and of the way in which its institutions work An important part of the book is a thorough article by article account of the guarantee in the American Declaration of the Rights and Duties of Man and in the American Convention on Human Rights of civil political economic social and cultural rights in the light of the jurisprudence of the Inter American Commission on Human Rights and the Inter American Court of Human Rights and of the Commission's many country reports on the human rights situation in particular states There are also chapters on the rights of indigenous peoples amnesty laws and states of emergencies The evolution and current methods of work of the Commission and the Court are set out at length and their achievements are critically assessed The role of non governmental organisations is also examined in this context The book will be invaluable to all those interested in the protection of human rights in the Americas and international human rights law generally

Regional Human Rights Systems Christina M. Cerna, 2016-12-05 Over the past sixty years the regional human rights systems have surpassed the UN human rights bodies in affording protection to the victims of human rights violations Most of these systems have courts that are empowered to issue legally binding judgments and reparations for violations of human rights which states have been unwilling to accord the UN system The essays selected for this volume examine the structure and functioning of the principal regional human rights systems in the world today 1 the Inter American Commission and

Court of Human Rights 2 the European Court of Human Rights 3 the African Commission and Court of Human and Peoples Rights and 4 the ASEAN Intergovernmental Human Rights Commission These systems guarantee primarily civil and political rights Central to all four systems is the necessity of a democratic form of government to guarantee these rights although not all governments parties to these regional treaties are democracies These articles trace the history of these systems in particular the expansion of their membership to include almost all independent countries in the region and their evolution towards recognition of a right to democracy

The Cambridge Handbook of New Human Rights Andreas von Arnould, Kerstin von der Decken, Mart Susi, 2020-01-02 The book provides in depth insight to scholars practitioners and activists dealing with human rights their expansion and the emergence of new human rights Whereas legal theory tends to neglect the development of concrete individual rights monographs on new rights often deal with structural matters only in passing and the issue of new human rights has received only cursory attention in literature By bringing together a large number of emergent human rights analysed by renowned human rights experts from around the world and combining the analyses with theoretical approaches this book fills this lacuna The comprehensive and dialectic approach which enables insights from individual rights to overarching theory and vice versa will ensure knowledge growth for generalists and specialists alike The volume goes beyond a purely legal analysis by observing the contestation rhetorics the struggle for recognition of new human rights thus speaking to human rights professionals beyond the legal sphere

The Universal Declaration of Human Rights in the 21st Century Gordon Brown, 2016-04-18 The Global Citizenship Commission was convened under the leadership of former British Prime Minister Gordon Brown and the auspices of NYU's Global Institute for Advanced Study to re-examine the spirit and stirring words of The Universal Declaration of Human Rights The result this volume offers a 21st century commentary on the original document furthering the work of human rights and illuminating the ideal of global citizenship What does it mean for each of us to be members of a global community Since 1948 the Declaration has stood as a beacon and a standard for a better world Yet the work of making its ideals real is far from over Hideous and systemic human rights abuses continue to be perpetrated at an alarming rate around the world Too many people particularly those in power are hostile to human rights or indifferent to their claims Meanwhile our global interdependence deepens Bringing together world leaders and thinkers in the fields of politics ethics and philosophy the Commission set out to develop a common understanding of the meaning of global citizenship one that arises from basic human rights and empowers every individual in the world This landmark report affirms the Universal Declaration of Human Rights and seeks to renew the 1948 enterprise and the very ideal of the human family for our day and generation

The Protection of Vulnerable Groups under International Human Rights Law Ingrid Nifosi-Sutton, 2017-07-06 The protection of vulnerable groups varies under international human rights law Depending on the group at stake protection may be more or less advanced In some cases the international community has deemed it necessary to adopt conventions providing for the rights of certain vulnerable groups and establishing mechanisms to verify State compliance Other groups have not been the focus of States standard setting endeavours but their protection still falls within the scope of human rights treaties of general application and the mandate of their respective monitoring bodies This book takes an innovative approach to the investigation of the international legal protection of vulnerable groups Rather than examining the situation of a number of vulnerable groups and

applicable international or regional conventions this book reviews the overall scope of the protection of vulnerable groups under International Human Rights Law This book conceptualizes the protection of vulnerable groups as an underlying and essential component of International Human Rights Law through a systematic and comprehensive analysis of international human rights law instruments and relevant practice of international and regional human rights monitoring bodies The book illuminates how human rights monitoring bodies foster protection of vulnerable groups and their members at the domestic level and underscores and assesses vulnerability paradigms these bodies have elaborated The book also puts forward a legal definition of vulnerable groups This book will be of great interest to students and scholars of international human rights law
