

THE IMPACTS OF PUBLIC POLICIES FOR REGIONAL DEVELOPMENT IN PORTUGAL

OS EFEITOS DAS POLÍTICAS PÚBLICAS PARA O DESENVOLVIMENTO REGIONAL EM PORTUGAL

Teresa de Noronha

ABSTRACT

The major goal of this work is to evaluate the level of effectiveness of those efforts made by the European Commission towards the socio-economic cohesion in Europe by using the single case-study of Portugal.

This paper presents the long lasting efforts for regional development in the country by using some data that reports the received aids and their use from 1990 up to 2006. The analysis focuses on the desegregation of such data to regional level.

At the same time it is emphasised that, at a time when cohesion is no more the sole goal of European policy, Portugal faces the paradox of trying to raise regional capacities for global competition (without having yet defined what regional strategies are) and, at the same time, wishing to increase its potential scientific and technological capacity, mainly located in the very circumscribed areas of Lisbon and Porto. In order to illustrate such a situation, the exemplar case of the Programme PRIME was presented.

This is one of the best examples of the recent support a system, indirectly financed by European funds; PRIME was fully structured as a Portuguese policy instrument to support the modernization of the entrepreneurial tissue at national level. The provided data demonstrates how discussable the level of success of such programme is.

Our general conclusions will drive to a dual discussion: the asymmetric use of the financing systems provided by the E.C. and the north/south endemic dichotomy existing in the country generates a path dependency that does not reduce and a trend that should concern Portuguese policy makers deeper then it does.

Keywords: public policy, regional development, regional asymmetries, Portugal

RESUMO

O principal objectivo deste trabalho é avaliar o nível de eficácia dos esforços feitos pela União Europeia para a coesão socioeconómica da Europa, utilizando o caso de estudo de Portugal.

A investigação apresenta os esforços de longo prazo para o Desenvolvimento regional do país observando dados que reportam as ajudas recebidas pelo país entre 1990 e 2006. A análise enfatiza a desagregação desses dados a nível regional.

Simultaneamente, num momento em que a política de coesão já não é prioritária na política Europeia, Portugal enfrenta o paradoxo de ter de tentar aumentar a capacidade competitiva das suas regiões ao mesmo tempo que tem de ser capaz de melhorar o seu potencial científico e tecnológico (quase centrado nas regiões de Lisboa e Porto). O caso exemplar do programa PRIME é apresentado para ilustrar esta situação.

Este programa é um dos melhores exemplos do sistema de incentivos, indirectamente financiados pelos fundos Comunitários: o PRIME foi totalmente estruturado como um

Regional Impact Of Community Policies In Europe:

Regional Impact of Community Policies in Europe Willem Molle, Riccardo Cappellin, 1988 **The European Union and the Regions** Barry Jones, Michael Keating, 1995-05-25 Is Europe witnessing the death of the once mighty nation state If it is then two of the most powerful factors in its post war decline have been European integration and regionalism Both challenge the nation state s monopoly of authority one from above the other from below Although it is increasingly recognized that the two are connected This book provides a definitive examination of the new patterns of politics and policy that link the three levels of European Union nation state and region Looking at each member state in turn the authors emphasize the diversity of the European experience European integration has differing impacts on different regions In some it is seen as a threat centralizing power and increasing their peripherality To others it is an opportunity to by pass national governments and assert their personality The authors are sceptical of the Europe of the Regions scenario in which nation states fade away in favour of the other two levels But they do show how the Maastricht commitment to subsidiarity together with the twin forces of European integration and regional assertion are profoundly changing the politics of Europe as it moves into the twenty first century **The Regional Impact of Community Policies** Fritz Franzmeyer, 1991 The Regions and the European Community Robert Leonardi, 1993 The contributions to this volume analyse the role of sub national institutions in the regional economic development process in the Community s less developed countries Greece Ireland Portugal Spain and Italy They are structured on the basis of individual country reports providing background to the debate on decentralization in each national context and the regional role in economic development The volume also contains an extensive analysis of the impact of European Community sectoral policies on the alleviation of regional disparities and an in depth analysis of the EC s Integrated Mediterranean Programmes on the basis of a systematic content analysis of the programmes and field research conducted on six IMP programmes in Greece Italy and France *Regional Policy in Europe* S.S Artobolevskiy, 2012-10-12 Based on the author s extensive research in the field this book analyzes regional policy for the whole of Europe Comparing East and West it offers a new model of regional policy and gives an overview of the direction that it may take in Europe as a whole Topics covered include the evaluation of regional policy its main aims its infrastructure in Western Europe its form in Eastern Europe and the development of regional policy from 1917 to the 1990s The book is intended for professionals and academics working in the areas of regional studies economics and policy studies *European Regional Growth* Bernard Fingleton, 2013-06-29 Looking into the future and trying to visualize long run regional disparities is difficult There is no agreed single theory to guide our model building although some insight can be gained from analysis of the past and by looking at the different theoretical positions to see if there is any agreement at least in terms of outcome if not in terms of mechanism This is what is attempted in this book which brings together specialists with a common interest in European regional growth and in applying quantitative analytical and simulation techniques in order to provide different perspectives

on the topic Many of the Chapters in the book employ the methods of spatial econometrics Spatial econometrics is a suite of statistical and econometric tools dedicated to the analysis of spatial data in other words data that is set within the context of socio economic theories and which can be represented most informatively in mapped form These methods have emerged over the last half century from a series of influential papers and books in the fields of regional science spatial statistics and quantitative geography and are ripe for serious application in the context of the EU's development In particular they provide the means by which to analyze spatially indexed data where the time dimension is essentially suppressed because for instance the variables of interest are not available or are of questionable accuracy which is often the case when one is interested in regional rather than national variations across a number of countries

European Communities

John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community's target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992

The Regions and the New Europe

Martin Rhodes, 1995 The contributors argue that some regions such as Emilia Romagna Baden Wurttemberg and Rhone Alpes have been highly successful in launching regional development strategies Others such as the English and certain southern European regions lack the economic resources and institutional structures to follow these examples The book analyses the reasons for success and failure and considers the strategic development options open to the less developed European regions

European Regional Planning Strategy

Nicolas Momper, Council of Europe, European Conference of Ministers Responsible for Regional Planning, 1992-01-01 1 folded map col in back plastic pocket

Regions in Europe Patrick Le Gales, Christian Lequesne, 2006-02-27 Regions in Europe explores the state of regional politics in an increasingly integrated

Europe It argues that the predicted rise of increased political power at the regional level has failed to materialise and is fraught with paradox In doing so this study locates regions in relation to European integration globalisation the nation state local government and comparative and national perspectives Using case studies of the main players in Europe including Germany France UK Italy Spain the Netherlands Belgium the contributors show how and why European regions remain remarkably weak in European governance

Regions J. Nicholas Entrikin, 2017-05-15 This volume gathers a collection of the most seminal essays written by leading experts in the field which identify or signal many of the changing directions of regional research in geography during the past fifty years Various forms of new regionalism or new regional geography have emerged over the last several decades especially in political and economic geography but in general the region has been a concept in declining use Despite this the region has gained new currency in sub areas of political and economic geography and a so called new regionalism has emerged in studies of the changing nature of the nation state in a globalizing economy Taken together the essays in this volume provide the reader with a comprehensive overview of academic developments in this area of geographical research

Britain on the Edge of Europe Michael Chisholm, 2002-06-01 With the consolidation of the European Union and the opening of the Channel Tunnel how can Britain develop a central place in Europe and ensure its future prosperity Britain on the Edge of Europe describes Britain's post war involvement with the continent and assesses the country's chances of enjoying the benefits of the projected European boom Analysing the economic and political effects of Britain's edge location the author challenges orthodox notions of distance cost and competitiveness and assumptions about the likely regional impact on Britain At a time when British expectations of Europe are very much in the balance Britain on the Edge of Europe puts the country's trade position into perspective

European Regional Development Paweł Churski, Tomasz Herodowicz, Barbara Konecka-Szydłowska, Robert Perdał, 2021-11-18 This book offers a comprehensive overview of contemporary issues of regional development It places particular emphasis on its socio economic and socio political determinants which accompany the problem of existing and ever widening differences in the level of regional development in various parts of Europe In order to diagnose the scale of those differences and to indicate the main forces behind the divergence of development the authors propose an original systematisation of regional development factors drawing attention to the need to consider them within the framework of present day socio economic megatrends The proposed approach to the development factors is also used for the author's operationalisation of the concept of territorial capital which is at the centre of regional place based policy The wide spatial aspect of the analysis national and local and its extensive temporal scope 2004 2019 yields unique results and creates an important element of added value for this book which shows the regularities of the process of regional development in Europe at three spatial levels pan European national and intra regional Furthermore it indicates the challenges faced by regionalists who attempt to carry out research on different territorial levels with a diverse number of units 205 EU regions 16 Polish voivodeships 2 478 Polish local units and

extended observation periods 2004 2017 The solutions proposed by the authors who show the potential of overcoming the barriers resulting from limited access to complete and comparable statistical data series should be inspiring for many researchers The unique results of direct research carried out on a large sample of respondents and entrepreneurs via diverse field research techniques constitute a valuable source of information on local conditions that impact contemporary development processes in less developed regions Their value is even greater because they were carried out in a unique laboratory created by the authors for testing the regularity of formation and impact of socio economic development factors in various locally determined conditions of this process It consists of purposefully selected test units LAU2 Located in a less developed region they represent all growth types and functional test units identified in the course of the research Consequently the results obtained may be generalised and applied to other areas showing similar features of territorial capital The monograph is addressed primarily to a wide group of regionalists connected with economic and social sciences as well as to practitioners involved in the implementation of development policies at various levels

Main Economic Policy Areas of the EC - After 1992 P. Coffey, 2012-12-06 Main Economic Policy Areas of the EC After 1992 is a completely rewritten version of past editions It examines successes and problems associated with the EC's main economic policy areas and makes proposals for the future For the first time a chapter on the very important policy area of transport is included This volume is an indispensable course book and handbook for all individuals interested in the European Community's main policy areas at the beginning of the coming into effect of the Single European Market

Economic Transformation, Democratization and Integration into the European Union H. Gibson, 2001-02-01 The transformation from a closed and inward looking economy to an active integration into the European Union is one which a number of countries are facing This book examines the experience of southern European countries where such transformation has occurred within a short space of time and has been accompanied by important socio political developments including the consolidation of democracy The various contributors focus on the motivation for economic change the problems encountered and the lessons to be learnt

Regional Policy Nigel Copperthwaite, Colin Mellors, 2005-06-28 The European Community has committed itself to promoting economic and social cohesion across its regions Its expenditure via the structural funds for these purposes is set to double by 1993 A key component of such expenditure is the European Regional Development Fund which is receiving increasing attention from local and regional representatives and officials as well as from companies considering where to locate their businesses The integrated development operations of the EC involve important new initiatives at the local level This volume explains how the ERDF operates and its relationship to other sources of funding from the EC It offers comprehensive and up to date information in a readily accessible format Section II summarises the key EC policy documents involved and Section III gives a full listing of all the relevant documents across a range of different aspects

Rural Europe Keith Hoggart, Richard Black, Henry Buller, 2014-02-25 Examines the interaction of the economic political and social

change processes within Europe which are bringing about fundamental transformations in rural areas The authors expand on this view of rural Europe and place its significance within the broader field of rural studies Regional Science David Boyce, Peter Nijkamp, Daniel Shefer, 2012-12-06 Regional science as an integrating discipline for many scientific analyses concerning the element of space has a remarkable record of achievements in both breadth and depth The great many scientific journals in this field and the large number of regional science books mirror the appeal of this discipline in both the developed and the developing world The scientific organization in this area the Regional Science Association International is organizing a world conference every four years The 1989 Regional Science World Conference was held in an interesting setting viz kibbutz Ramat Rachel on the outskirts of Jerusalem The organization of this meeting was undertaken by the Israeli Section of the Regional Science Association under the supervision of Professor Rafi Bar El Development Study Center Rehovoth The meeting turned out to be a great success and provided an extremely interesting cross section of new developments in the area of regional science It was decided afterward to publish a set of representative papers from this meeting in one volume The present book brings together these papers which were duly selected after a careful screening and refereeing process The editors wish to thank all referees for their willingness to assist them in the task of producing this volume Many thanks also go to Rita Hittema for her skillful copy editing and word processing of the manuscript

Governance, Institutional Change and Regional Development Mike Danson, Henrick Halkier, Greta Cameron, 2024-11-01 This title was first published in 2000 This volume addresses the prominent role given to institution building institutional change and governance in the regional development strategies and policies The establishment of the Scottish Parliament Welsh and Northern Ireland Assemblies and the arrival of regional development agencies in England highlighted the need to put the initiatives into some context drawing on experience from across Europe on the critical factors in the determination of the potential and success of regions Central to the discussions presented here by a group of European experts are the question of governance how does an ongoing process of institution building affect the ways in which regions and localities are governed including questions of democracy participation regional self determination public private partnerships networks and accountability and the consequences of new modes of governance and institutional change for regional development strategies and policies particularly in the context of large scale industrial restructuring and city region and urban regeneration *The Regional Dimension in European Public Policy* Reiner Martin, 1999-05-09 This book analyses EU regional policy and its co ordination with other European and national public policies namely investment grants research and development policy and transport policy The analysis identifies shortcomings within EU regional policy as well as co ordination problems with other public policies
