Regional Institutions And Governance In The European Union:

Regional Institutions and Governance in the European Union José Magone, 2003-08-30 European integration has profoundly changed the relationship between national and subnational governments and has led to the emergence of the Europe of the Regions This edited volume highlights some of the problems involved in the integration of the three main levels of governance in the European Union the regional national and supranational level The contributors address recent developments in various regions and examine the way these regions have adjusted to the growing importance of the European Union s multilevel governance system Among the issues discussed are the emergence and institutionalization of new regional political systems such as those of Scotland Wales and Flanders the channels available to the regions for influencing the EU policy process in relation to their constituencies and horizontal projects of integration among regions which make the whole multilevel governance system more flexible as well as more complex

Regional Governance in the EU Gabriele Abels, Jan Battke, 2019 The role of regions in the European Union has been frequently debated since the 1980s This comprehensive book provides a thorough overview of the issue from a variety of perspectives analysing regional governance and territorial dynamics in the EU and its member states Focusing on the implications of the democratisation regionalisation nexus it argues that a Europe with the regions may promote good governance and ameliorate the democratic deficits of the EU

Local Government in the European Union Marius Guderjan, Tom Verhelst, 2021-09-30 This book addresses the bigger picture of local European relations and adds a new dimension to existing studies on multilevel governance and the Europeanisation of local government Drawing from a combination of European integration theories and operational approaches it introduces the idea of an integration cycle in which local government responds to the top down impact of the EU internally horizontally and vertically This volume presents a wide range of empirical examples to demonstrate how local authorities across Europe have changed their practices orientation and preferences and adapted their institutions and organisation Not only do cities towns and counties cooperate with each other across borders and through transnational networks and partnerships but by mobilising formally and informally local actors participate in and influence European governance and contribute to the future trajectories of European integration thereby completing the integration cycle

Local and Regional Governance in Europe Janerik Gidlund, Magnus Jerneck, 2000 The European political landscape is one of constant flux and it is this alternating integration and disintegration which influences the basic conditions in which political power is exercised This book argues that the interests of the cities and regions of Europe are increasingly influenced by European supranational institutions rather than the nation state and that governance in Europe is shifting to a regional and local level This shift of influence implies potential for economic development and new political strategies but also poses a serious threat to national identity and the traditional sovereignty of the state Focusing on processes of internationalisation and regionalisation the book discerns fascinating peculiarities in the Nordic response to a radically changing environment

The authors take a comparative approach to four Nordic countries and examine the efforts involved at local and regional level to safeguard interests Their analysis and conclusions make fascinating reading for students and scholars of government and public policy and for civil servants and policymakers across Europe
