Mid Thirteenth-Century England Peter Coss, 2024-09-03 Despite the multidirectional nature of modern research the interpretation of the political history of thirteenth century England has remained locked into a traditional framework bequeathed by the mid twentieth century historian R F Treharne and embellished by the emphases and accentuations of his present day successors Characterised by its conception of community its constitutionalism its ready identification of a national enterprise and its predilection for idealism and progressive thinking this framework remains close to the Whig interpretation of English history It is reinforced by the continuation of reverence for the baronial leader Simon de Montfort In contrast Peter Coss offers here an alternative approach to the period which is anchored in social mores and cultural values More emphasis is placed upon the interests ambitions and needs of contemporaries upon social networks of various kinds and upon how interests both clashed and cohered as people strove to improve or preserve their situations This was a crisis born of political instability but in the context of institutional administrative and legal growth that is to say at a particular point in the evolution of the state Drawing on a wide range of sources the book reconsiders the generation of the crisis the factors which influenced its course and its partial resolution In short it explores the anatomy and physiology of a troubled

Cooper,Christopher W. Hughes,Philippe De Lombaerde,2007-12-21 This book explores the relationship between regionalization and global governance surveying the theoretical debates economic dimensions security considerations and governing structures **Hybridisation of Political Order and Contemporary Revisionism** Nik Hynek,Vít Střítecký,2022-08-01 This volume

argues that contemporary political and security revisionism should not be considered a homogenous attack against the international order but rather a bag of tailor made strategies to exploit opportunities found in various highly localised contexts. Scholars with backgrounds in Security Studies, Area Studies, International Relations and Political Theory are brought to examine revisionist tendencies in Central Eastern Europe, Post Soviet Space, China and the Transatlantic Space. In doing so they try to remedy the existing disciplinary separatism or policing which has obfuscated any theorisation of the connections between international and domestic politics for many decades. Part of the analytical focus is on novel phenomena especially the utilization of cyberspace and new social media and technological innovation. One of the conclusions of this volume is that the rise in contemporary revisionism shows the oft forgotten importance of the first image of international politics: political leaders in other words do indeed matter. The fact that they matter is only reinforced when they represent regional or even great powers and especially revisionist regimes and states with the propensity to produce complex effects. The chapters in this book were originally published as a special issue of the journal *Europe Asia Studies* **Intergovernmental Perspective**, 1975. Each issue concentrates on a different topic.

Liberties and Identities in the Medieval British Isles Michael Prestwich, 2008. In depth examinations of the role played by liberties across the British Isles.

Regional Identities in North-East England, 1300-2000 Adrian Gareth Green, A. J. Pollard, 2007. Is North East England really a coherent and self conscious region? The essays collected here address this topical issue from the middle ages to the present day.

The Regionalist Movement in France, 1890-1914 Julian Wright, 2003. This is the first full academic study of the political thought of the French regionalist movement in the Belle Epoque. Julian Wright has examined the private papers of Jean Charles Brun, founder of the Federation Regionaliste Francaise in detail. He has rethought the conceptual basis of regionalism through Charles Brun's intellectual biography showing that it penetrated the political debates of the period as a commonplace in Republican arguments about state reform. Despite the often made association of regionalism with the right, Dr Wright reveals the diversity of political views expressed and demonstrates that the connection to left wing federalism was emphatically present in the intellectual background. Interwoven with this discussion is an examination of the personal mission of Charles Brun. He saw himself as a reconciler using his regionalism within a mission to heal the divisions of French politics and society. He argued that France's instability stemmed from an obsession with reforms that followed a priori political models and that politicians who sought to rethink the shape of the Republic needed to attend to the cultural or economic realities expressed in France's regions. Charles Brun and his regionalist movement continue to have resonance in current debates about decentralization in France.

Regional Fictions Stephanie Foote, 2001-03-29. Out of many, one: e pluribus unum is the motto of the American nation and it sums up neatly the paradox that Stephanie Foote so deftly identifies in *Regional Fictions*. Regionalism, the genre that ostensibly challenges or offers an alternative to nationalism, in fact characterizes and perhaps even defines the American sense of nationhood. In particular, Foote argues that the colorful

local characters dialects and accents that marked regionalist novels and short stories of the late nineteenth century were key to the genre's conversion of seemingly dangerous political differences such as those posed by disaffected Midwestern farmers or recalcitrant foreign nationals into appealing cultural differences. She asserts that many of the most treasured beliefs about the value of local identities still held in the United States today are traceable to the discourses of this regional fiction and she illustrates her contentions with insightful examinations of the work of Sarah Orne Jewett, Hamlin Garland, Gertrude Atherton, George Washington Cable, Jacob Riis and others. Broadening the definitions of regional writing and its imaginative territory, *Regional Fictions* moves beyond literary criticism to comment on the ideology of national, local, ethnic and racial identity.

The European Union and Interregionalism Mr Mathew Doidge, 2013-03-28. The European Union and Interregionalism is the most comprehensive study of interregionalism to date, providing a vigorous analysis of its role and functions in the architecture of global governance and of the place of qualitative differences between regional actors in shaping interregional relationships. Regionalism itself is an established phenomenon with regional politics becoming increasingly institutionalised. As a result, with the EU as forerunner, regions have begun to exert themselves in the external policy space, developing networks of relations including prominently interregional relations. We have thus seen the emergence of a new governance space at the interregional level, banded on one side by sites of global governance and on the other by governance at the regional level. Important questions challenging the current literature of these interregional structures include: do interregional relationships conform to theoretical expectations and what patterns of engagement and interaction are emerging within the EU's core interregional partnerships and are these replicated elsewhere? Exploring interregionalism beyond the core Europe-Asia partnerships, including the network of relations centred on ASEAN, this book should be read by all those engaged in consideration of interregional structures to understand how patterns of EU-centred interregional engagement rather than being *sui generis* are increasingly evident in the broader network of interregional relationships.

Regionalism in World Politics Louise L'Estrange Fawcett, Andrew Hurrell, 1995. This book brings together the many different institutions and ideas to be found under the label of regionalism; it places the revival of regionalism in a broader historical perspective; it asks whether there are common factors behind the revival of regionalism in so many different parts of the world; and it analyzes the cumulative impact of different brands of regionalism on international order. Leading specialists examine recent developments in regional cooperation in different parts of the world. They take a critical look at recent trends towards the new regionalism and regionalization, assessing their origins, their present and future prospects and their place in the evolving international order. As well as concentrating on specific regions including Pacific Asia, the Americas, Europe and the Middle East, the book looks at theories of regionalism, the balance between regionalization and globalization in the world economy, the relation between regional organizations and the United Nations, and the relationship between the revival of regionalism and questions of identity and nationalism.
