Regionalization For Development And Accession To The European Union:

Regionalization for Development and Accession to the European Union Gérard Marcou, 2002 *Enlargement of the European Union* Allan F. Tatham, 2009-01-26

The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture, history and economics has supplanted the long dominant theme of widening and deepening, particularly since the Union's expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between widening and deepening and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity; judicial capacity; and legal approximation in accession states; capacity of the EU to absorb new Member States; and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations, e.g. Greece, Spain, Portugal, Malta, and Cyprus; the still inconclusive negotiations with Turkey; and the Western Balkan states; and political factors involved in the non-accession of Norway, Iceland, and Switzerland. Assembling powerful evidence and applying incisive analysis, the author's conclusion shows that, absent further and major EU institutional reform, it will be difficult for an enlarging Union to continue to deliver the goods. A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe, this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials, and policymakers in the EU Member States.

EU Accession and Spanish Regional Development Carolyn Marie Dudek, 2005

Policymakers saw European Community membership as a way for Spain to secure democracy and promote economic development throughout the country. Nevertheless, regional economic disparities still persist in Spain almost twenty years after it entered the Community, despite significant European allocation of funds to remedy underdevelopment. How did the policies of the European Union impact Spain? What lessons can new EU members learn from Spain's experience within the European Union? Using rich empirical evidence and an innovative comparative analysis, this book examines the regional experiences of Galicia and the Valencian Community in Spain. The political dynamics and persistence of clientelism, which affect policymaking and policy implementation within each region, are particularly considered. These cases provide new insight to explain why regional economic differences persist in Spain despite efforts to alleviate them. Historically grounded and detailed, this study analyzes the process of accession and the ignored long-term ramifications of accession negotiations and treaties; it focuses on the often overlooked contradiction between European regulations and regional development policies and questions whether EU

membership has been as beneficial as policymakers thought it would be Europeanization and Regionalization in the EU's Enlargement to Central and Eastern Europe J. Hughes, G. Sasse, 2004-10-12 This book is a study of EU conditionality and compliance during the enlargement to the Central and Eastern European candidate countries EU conditionality for membership is widely understood as having been a driving force for Europeanization providing incentives and sanctions for compliance or non compliance with EU norms such as the Copenhagen Criteria and the adoption of the *acquis communautaire* By taking regional policy and regionalization as a case study this book provides a comparative analysis of the effects of conditionality on the Central and East European countries and explores the many paradoxes and weaknesses in the use of EU conditionality over time **Regionalism Contested** Henrik Halkier, 2016-12-05 As we move further into the 21st century the prominence of regions can no longer be taken for granted A certain skepticism has developed with regard to the feasibility of marginal regions achieving self sustained growth and states have maintained their role as regulators of economic and social activities Thus the notion of the region and its significance is currently much debated and contested Illustrated with a wide range of European case studies this volume brings together the main strands of these contestations as economic political and social actors attempt to institutionalise their vision of their region as the dominant form of territorial governance It questions both the external delimitation and the internal constitution of regions and critically analyses the societal processes circumscribing ways in which regions are created maintained and undermined The volume provides a wide range of analytical perspectives to enable an understanding of the current mosaic of regionalism in Europe **EU Cohesion Policy** John Bachtler, Peter Berkowitz, Sally Hardy, Tatjana Muravska, 2016-10-26 The Open Access version of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9781315401867> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license This book brings together academics members of European institutions and regional and national level policymakers in order to assess the performance and direction of EU Cohesion policy against the background of the most significant reforms to the policy in a generation Responding to past criticisms of the effectiveness of the policy the policy changes introduced in 2013 have aligned European Structural and Investment Funds with the Europe 2020 strategy and introduced measures to improve strategic coherence performance and integrated development EU Cohesion Policy Reassessing performance and direction argues that policy can only be successfully developed and implemented if there is input from both academics and practitioners The chapters in the book address four important issues the effectiveness and impact of Cohesion policy at European national and regional levels the contribution of Cohesion policy to the Europe 2020 strategy of smart sustainable and inclusive growth the importance of quality of government and administrative capacity for the effective management of the Funds and the inter relationships between institutions territory and place based policies The volume will be an invaluable resource to students academics and policymakers across economics regional studies European studies and international relations **Mobilizing Regions,**

Mobilizing Europe Sebastian M. Buettner, 2013-10-23 Regional development strategies are becoming more similar all around Europe even though regional differences are more pronounced than ever and many European regions have become more autonomous actors This thesis of a peculiar standardized diversification of sub national space in the modern European Union is the point of departure of this book Based upon the analytical premises of Stanford School Sociological Institutionalism Sebastian M B ttner studies regional mobilization in contemporary Europe from a new and innovative perspective He highlights the importance of scientific expertise and global scientific models in contemporary regional development practice and exemplifies their significance with the example of region building in Poland in the course of EU integration This new wave of regional mobilization is not just conceived as an effect of local national or European politics but as an expression of a larger conceptual shift in governing society and space This well researched and clearly argued book not only provides fresh insights into region building and regionalization in contemporary European space but also contributes to the new sociology of Europeanization It will be an illuminating read for scholars and students in Sociology European and EU studies International Relations Cultural Studies Geography Regional Science Polish Studies and related subject areas

Democratization and the European Union Leonardo Morlino, Wojciech Sadurski, 2010-05-31 This book examines in depth the impact of the EU on aspects of the quality of democracy in eight selected post communist countries Considering both the political and legal aspects of the dynamics among institutions and focussing on inter institutional accountability the book analyses how constitutional designs have been effectively implemented to achieve this and to what extent this was the result of EU action In order to make a comparative assessment of the EU on democracies the book features detailed case studies according to their different status vis vis the EU including older new member states Poland and Hungary newer new member states Romania and Bulgaria potential candidates Albania and Serbia and neighbour and remote neighbour states Ukraine and Armenia Each chapter addresses a range of dimensions and most relevant domains of inter institutional accountability that is executive legislative relationships constitutional justice decentralisation and regionalism and the role of ombudsman or other relevant authorities Seeking to assess how important the role of the EU has been in influencing the modes and characteristic of democracies and fundamental rights established in these regions this book will be of interest to students and scholars of comparative politics EU politics Post communist studies and democratization studies Regional Dynamics in Central and Eastern Europe Francesco Palermo, Sara Parolari, 2013-01-30 This book presents a contemporary broad assessment of the main dilemmas of regional development and regional policy in Central and Eastern Europe considering the influence of internal and external pressures on the regionalization process in this area *Crafting Democracy* Jennifer A. Yoder, 2013-02-07 A decade after the fall of the Iron Curtain and the beginning of democratization and marketization in East Central Europe a handful of countries introduced territorial and administrative reforms and created regional self governments autonomous subnational level assemblies elected by universal suffrage This comparative study of

Poland the Czech Republic Slovakia and Hungary explores the reasons for these reforms and their consequences for post communist democracies In the context of the long standing development of regions in Western Europe Jennifer A Yoder argues that a new approach is needed to explain recent regional reforms and their wide variability in post communist Europe Her study offers a nuanced and authoritative account of a category of reforms that gets to the heart of democratization after communism how to distribute authority within a new system Driven to Change Antoaneta L. Dimitrova,2004 Will joining the European Union help achieve prosperity stability and democracy in Central and Eastern Europe This book addresses this question by analysing how the European Union has approached this enlargement Specifically the book shows how in its enlargement to the East the European Union has tried to guide the post communist states of Central and Eastern Europe towards new institutions and changing rules In addressing the little explored link between post communist transformations and enlargement the book presents the effects of enlargement governance extended by the EU on domestic processes of reform and transformation With its rich empirical overview of the reform challenges to various sectors the author presents various scenarios of the interaction of EU rules with post communist reform In contrast to other books on enlargement this one relies on the perspective of scholars from Eastern Europe to illustrate the importance of the accession process to reform

Politics in the European Union Ian Bache,Stephen George,Simon Bulmer,2011-02-17 This is an account of the main developments in the process of European integration It provides coverage of theory history member states institutions and policies drawing on academic debates including issues of legitimacy and globalisation **The Regional Dimension of the European Union** Charlie Jeffery,2015-03-24 Decision making within the EU has moved to a third regional level of government emerging in the EU policy process alongside the first Union and second member state levels Multi level governance can increasingly be identified These papers describe and analyse this third level **Regional Development and Spatial Planning in an Enlarged European Union** Neil Adams,2016-04-01 The expansion of the European Union in 2004 has had significant consequences for both existing and new members of the Union New member states are assimilating into a new institutional and policy framework while the changing geography of Europe provides a different context for policy development in pre 2004 member states One of the more important fields in which these changes are impacting is regional development The admission of the new countries changes patterns of economic and social disparities across the territory of the European Union which in turn demands that existing approaches to regional development are reconsidered An approach which has proved to be one of the most innovative is spatial planning This book brings together a team of academics and policy makers from across the new Europe involved in regional development and spatial planning Providing insights into different approaches it offers a valuable opportunity to compare experiences across European borders **Overcoming Fragmentation in Southeast Europe** Panayiotis Getimis,2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these

economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration Regional Development in Northern Europe Mike Danson, Peter de Souza, 2012-02-07 This book draws on work from across northern Europe and is parallel and complementary to the network itself By establishing an intellectual and practically orientated framework and platform and by bringing together contributions defining the state of the art and potential development paths in the field it is the first volume to offer a systematic and scientific view from the periphery **Romania and the European Union** Tom Gallagher, 2013-07-19 According to Tom Gallagher Romania's predatory rulers the heirs of the sinister communist dictator Ceausescu have inflicted a humiliating defeat on the European Union He argues convincingly that Brussels was tricked into offering full membership to this Balkan country in return for substantial reforms which its rulers now refuse to carry out This book unmaskes the failure of the EU to match its visionary promises of transforming Romania with the shabby reality Benefiting from access to internal reports and leading figures involved in a decade of negotiations it shows how Eurocrats were outwitted by unscrupulous local politicians who turned the EU's multi level decision making processes into a laughing stock The EU's famous soft power turned out to be a mirage as it was unable to summon up the willpower to insist that this key Balkan state embraced its standards of behaviour in the political and economic realms The book unravels policy failures in the areas of justice administrative and agricultural reform and shows how Romania moved backwards politically during the years of negotiations Governance in Transition Ján Buček, Andrew Ryder, 2015-04-15 This book looks at experience in government restructuring and devolution from a variety of national and international perspectives both within the European Union and elsewhere focusing on lessons learned and ways forward Since the 1980s there has been a global trend to give more power to local governments Even in Korea and the United Kingdom the most centralised countries in the OECD local government powers have increased with substantial economic benefits Within the European Union the principle of subsidiarity has enshrined the idea of devolution New member states particularly in central and eastern Europe have significantly created new and self sufficient local and regional governments However this process has been complicated Devolution is not a panacea in its own right and need not lead to economic growth While it can encourage savings through collaboration it can also lead to confused lines of authority and can complicate policy formation and implantation Devolution can strain local budgets forcing local governments to rely on their own sources of finance rather than central government

transfers Suburbanisation rural depopulation the growth of some regions and the decline of others have raised new problems particularly related to inter governmental cooperation among local governments and different levels of government In many cases an increased number of governments has increased administrative costs *Handbook on Cohesion Policy in the EU* Simona Piattoni, Laura Polverari, 2016-08-26 This Handbook covers all major aspects of EU Cohesion policy one of the most significant areas of intervention of the European Union Over five parts It discusses this policy s history and governing principles the theoretical approaches from which it can be assessed the inter institutional and multi level dynamics that it tends to elicit its practical implementation and impact on EU member states its interactions with other EU policies and strategies and the cognitive maps and narratives with which it can be associated An absolute must for all students of the EU

The European Union's 2007 Enlargement Cristina Chiva, David Phinnemore, 2014-07-10 This book fills a significant gap in recent literature on European Union politics by examining the EU s other eastern enlargement completed in 2007 with the accession of Bulgaria and Romania It focuses on both the process and the effects of the 2007 enlargement within the wider context of the post communist countries accession to the EU and more broadly within the context of the history of EU enlargement The book brings together in depth analyses of a wide range of issues both from a comparative perspective and through single case studies Individual contributions shed new light onto EU enlargement through a theoretical re evaluation of the strategic action paradigm as well as through historical analyses of the 2007 enlargement and of its implications for future EU enlargements Further insight into the process of EU enlargement is gained through systematic exploration of the impact of accession on policy making and institutional structures in Bulgaria and Romania Altogether the contributions exemplify the multi faceted nature of EU enlargement and accession as well as the extent to which the process of acceding to the EU is not completed with membership either for the EU or for the candidate countries This book was published as a special issue of Perspectives on European Politics and Society
