In this award winning environmental history of Cuba since the age of Columbus Reinaldo Funes Monzote emphasizes the two
processes that have had the most dramatic impact on the island's landscape deforestation and sugar cultivation During the
first 300 years of Spanish settlement sugar plantations arose primarily in areas where forests had been cleared by the royal
navy which maintained an interest in management and conservation for the shipbuilding industry The sugar planters won a
decisive victory in 1815 however when they were allowed to clear extensive forests without restriction for cane fields and
sugar production This book is the first to consider Cuba's vital sugar industry through the lens of environmental history
Funes Monzote demonstrates how the industry that came to define Cuba and upon which Cuba urgently depended also
devastated the ecology of the island The original Spanish language edition of the book published in Mexico in 2004 was
awarded the UNESCO Book Prize for Caribbean Thought Environmental Category For this first English edition the author
has revised the text throughout and provided new material including a glossary and a conclusion that summarizes important

Hernández, 2020-08-26 La literatura científica acerca del agua es cuantiosa Probablemente no exista otro objeto natural tan
visitado por tantos autores en la ciencia Sin embargo los estudiosos del agua tal y como está presente en todo el entorno
humano no abundan El presente libro es precisamente un tratado simplificado hecho por un científico tan admirable como
Juan Reynerio Fagundo y su colectivo de trabajo Se trata de uno de esos pocos estudiosos de casi todo lo que tiene que ver
con el agua que nos sustenta la de nuestra vida diaria y la de nuestra ciencia desde las cuevas cársticas cubanas hasta los

polos de la Tierra y en el libro nos dice cómo tenemos que enterarnos de ella y de sus cualidades para que nos sirva. Además en este libro el agua como compuesto químico es solo una parte de la historia. Cuando aparece para nosotros se presenta con componentes disueltos que le otorgan algunas de las cualidades que más necesitamos. Más allá del carbono y el silicio que tan esenciales son para la vida, ser intrascendentes si no se presentaran con el agua.

Slavery behind the Wall Theresa A. Singleton, 2016-10-05

A significant contribution in Caribbean archaeology. Singleton weaves archaeological and documentary evidence into a compelling narrative of the lives of the enslaved at Santa Ana de Biajacas. Patricia Samford, author of *Subfloor Pits and the Archaeology of Slavery in Colonial Virginia*, presents results of the first historical archaeology in Cuba by an American archaeologist since the 1950s revolution. Singleton's extensive historical research provides rich context for this and future archaeological investigations, and the entire body of her pioneering research provides comparative material for other studies of African American life and institutional slavery in the Caribbean and the Americas. Leland Ferguson, author of *God's Fields: Landscape, Religion, and Race in Moravian Wachovia*, Singleton's enlightening findings on plantation slavery life will undoubtedly constitute a reference point for future studies on Afro-Cuban archaeology. Manuel Barcia, author of *The Great African Slave Revolt of 1825: Cuba and the Fight for Freedom in Matanzas*, Cuba had the largest slave society of the Spanish colonial empire. At Santa Ana de Biajacas the plantation owner sequestered slaves behind a massive masonry wall. In the first archaeological investigation of a Cuban plantation by an English speaker, Theresa Singleton explores how elite Cuban planters used the built environment to impose a hierarchical social order upon slave laborers. Behind the wall, slaves reclaimed the space as their own, forming communities, building their own houses, celebrating gambling, and even harboring slave runaways. What emerged there is not just an identity distinct from other North American and Caribbean plantations but

a unique slave culture that thrived despite a spartan lifestyle Singleton's study provides insight into the larger historical context of the African diaspora global patterns of enslavement and the development of Cuba as an integral member of the larger Atlantic World
