Cancer Registry E. Grundmann, E. Pedersen, 2012-12-06 The Pros and Cons of Cancer Registration E Grundmann It may seem strange for somebody to hold a symposium on cancer registration and then submit a paper under the heading The Pros and Cons of Cancer Registration Indeed this may be quite amazing to those

of my colleagues who have been endeavoring for years or decades to provide a world wide system of cancer registration To be quite frank this is exactly what I intended Generally speaking as scientists we are convinced that the work we do is worth while We are in fact supported in this attitude by pub lic opinion if one bears in mind that science is future oriented It may be said that science is a way for building the future and that progressive mindedness is to use a modern word in Never theless we may somehow hesitate at this fashionable word After all science is not in in the way this word is interpreted by the younger generation Indeed this younger generation is much too sceptical whenever confronted with anything done by the older generation and science is pursued primarily by the establishment Rather it is in to criticize the system of society and if possible to overcome this system which is responsible not only for many evils but also for many illnesses
