Robin W. Winks

Regreening The National Parks:

Regreening the National Parks Michael Frome, 1992 Shows how the original mission of the National Park service has been undermined by commercialization and politicization in an argument that will evoke controversy as the service celebrates its seventy fifth anniversary

Reshaping Our National Parks and Their Guardians Kathy Mengak, 2012 This biography of the seventh director of the National Park Service brings to life one of the most colorful powerful and politically astute people to hold this position George B Hartzog Jr served during an exciting and volatile era in American history Appointed in 1964 by Secretary of the Interior Stewart Udall he benefited from a rare combination of circumstances that favored his vision which was congenial with both President Lyndon Johnson's Great Society and Udall's robust environmentalism Hartzog led the largest expansion of the National Park System in history and developed social programs that gave the Service new complexion During his nine year tenure the system grew by seventy two units totaling 27 million acres including not just national parks but historical and archaeological monuments and sites recreation areas seashores riverways memorials and cultural units celebrating minority experiences in America In addition Hartzog sought to make national parks relevant and responsive to the nation's changing needs

Our National Parks and the Search for Sustainability Bob R. O'Brien, 2011-01-20 A study of the US National Park Service's efforts to allow for as many visitors as possible in the parks that are kept in as natural a state as possible Yosemite Valley in July of 1967 would have had to be seen to be believed There was never an empty campsite in the valley you had to create a space for yourself in a sea of cars tents and humanity The camp next to ours had fifty people in it with rugs hung between the trees incense burning and a stereo set going full volume Scenes such as this will probably never be repeated in Yosemite or any other national park yet the urgent problem remains of balancing the public's desire to visit the parks with the parks need to be protected from too many people and cars and too much development In this book longtime park visitor and professional geographer Bob O'Brien explores the National Park Service's attempt to achieve sustainability a balance that allows as many people as possible to visit a park that is kept in as natural a state as possible O'Brien details methods the NPS has used to walk the line between those who would preserve vast tracts of land for no use and those who would tap the Yellowstone geysers to generate electricity His case studies of six western crown jewel parks show how rangers and other NPS employees are coping with issues that impact these cherished public landscapes including visitation development and recreational use

The Environmental Case Judith A. Layzer, Sara R. Rinfret, 2023-06-05 Answers to environmental issues are not black and white Debates around policy are often among those with fundamentally different values and the way that problems and solutions are defined plays a central role in shaping how those values are translated into policy The Environmental Case captures the real world complexity of creating environmental policy and this much anticipated Sixth Edition contains 14 carefully constructed cases including a new study of the Salton Sea crisis Through her analysis Sara Rinfret continues the work of Judith Layzer and

explores the background players contributing factors and outcomes of each case and gives readers insight into some of the most interesting and controversial issues in U S environmental policymaking Regreening the Bare Hills David Lamb,2010-10-14 In *Regreening the Bare Hills* Tropical Forest Restoration in the Asia Pacific Region David Lamb explores how reforestation might be carried out both to conserve biological diversity and to improve the livelihoods of the rural poor While both issues have attracted considerable attention in recent years this book takes a significant step by integrating ecological and silvicultural knowledge within the context of the social and economic issues that can determine the success or failure of tropical forest landscape restoration Describing new approaches to the reforestation of degraded lands in the Asia Pacific tropics the book reviews current approaches to reforestation throughout the region paying particular attention to those which incorporate native species including in multi species plantations It presents case studies from across the Asia Pacific region and discusses how the silvicultural methods needed to manage these new plantations will differ from conventional methods It also explores how reforestation might be made more attractive to smallholders and how trade offs between production and conservation are most easily made at a landscape scale The book concludes with a discussion of how future forest restoration may be affected by some current ecological and socio economic trends now underway The book represents a valuable resource for reforestation managers and policy makers wishing to promote these new silvicultural approaches as well as for conservationists development experts and researchers with an interest in forest restoration Combining a theoretical research perspective with practical aspects of restoration the book will be equally valuable to practitioners and academics while the lessons drawn from these discussions will have relevance elsewhere throughout the tropics *National Parks* ,1992 Preserving Yellowstone's Natural Conditions James A. Pritchard,2022-10 In this new edition James A Pritchard has added a summary of recent developments in wildlife science and management and discusses historical continuities in the role of Yellowstone Park as a wildlife refuge and conservator Forum for Applied Research and Public Policy ,1994 *Preserving Public Lands for the Future* William R. Lowry,1998-10-01 Comparing national efforts to preserve public lands William R Lowry investigates how effectively and under what conditions governments can provide goods for future generations Providing intergenerational goods ranging from balanced budgets to space programs and natural environments is particularly challenging because most political incentives reward short term behavior Lowry examines the effect of institutional structure on the public delivery of these goods He offers a theoretical framework accounting for both the necessary conditions public demand political stability and official commitment to long term delivery and constraining factors the tensions between public agencies and politicians as well as between different levels of government that determine the ability of a nation to achieve long term goals In support of this argument Lowry evaluates data on park systems from more than one hundred countries and provides in depth case studies of four the United States Australia Canada and Costa Rica to show how and why the delivery of intergenerational goods can vary For each of the cases

he reviews background information discusses constraints on agency behavior and assesses expansion of the park systems and restoration of natural conditions at specific locations This extensive comparative analysis of the preservation of public lands offers new insights into the capability of nations to pursue long term goals *General Technical Report PNW-GTR*,2002 **Adjusting for Radiotelemetry Error to Improve Estimates of Habitat Use** Scott L. Findholt,2002 *Western Public Lands And Environmental Politics* Charles Davis,2018-05-04 First Published in 2018 An explanation of changes in US Congress policies that affect the management of rangeland timber energy mineral and wilderness resources in the West of the country The contributors examine policy decisions within the context of political economic and demographic forces

Selling Yellowstone Mark Daniel Barringer,2002 For as long as they have existed the national parks have been the scene of some of the most intensive commercial activity in the American West *Selling Yellowstone* recounts the story of such activities in our oldest park from the 1870s through the 1960s It is the first book to examine critically the role of business in the development of America s national parks demonstrating how profit driven entrepreneurs shaped the physical landscape of what is generally perceived as unaltered wilderness Jacket *Nature's Burdens* Daniel Nelson,2017-05-15 *Nature s Burdens* is a political and intellectual history of American natural resource conservation from the 1980s into the twenty first century a period of intense political turmoil shifting priorities among federal policymakers and changing ideas about the goals of conservation Telling a story of persistent activism conflict and frustration but also of striking achievement it is an account of how new ideas and policies regarding human relationships to plants animals and their surroundings have become vital features of modern environmentalism In the 1960s and 1970s Congress embraced the largely dormant movement to preserve distinctive landscapes and the growing demand for outdoor recreation establishing an unprecedented number of parks monuments and recreation areas The election of Ronald Reagan and a shift to a Republican controlled Senate brought this activity to an abrupt halt and introduced a period of intense partisanship and legislative gridlock that extends to the present In this political climate three developments largely defined the role of conservation in contemporary society environmental organizations have struggled to defend the legal status quo private land conservation has become increasingly important and the emergence of potent scientific voices has promoted the protection of animals and plants and injected a new sense of urgency into the larger cause These developments mark this period as a distinctive and important chapter in the history of American conservation Scrupulously researched scientifically and politically well informed concise and accessibly written *Nature s Burdens* is the most comprehensive examination of recent efforts to protect and enhance the natural world It will be of interest to environmental historians environmental activists and any general reader interested in conservation **Regreening the Built Environment** Michael A. Richards,2024-09-18 Now in its second volume *Regreening the Built Environment* provides an overview of physical and social environmental challenges that the planet is facing and presents solutions that restore ecological processes reclaim open space foster social equity and facilitate a green

economy Healing the planet requires a combination of strategies networked across multiple scales of development including buildings sites communities and regions Case studies from a range of locations in the United States Denmark Vietnam Germany South Korea Switzerland France and the United Kingdom among others demonstrate how existing gray infrastructure can be retrofitted with green infrastructure and low impact development techniques From this the author shows how a building can be designed that creates greenspace or generates energy likewise a roadway can be a parkway an alley can be a wildlife corridor and a parking surface can be a garden This new edition also includes case studies that have successfully reconnected communities that were fragmented by unjust planning practices and irresponsible patterns of development resilient design solutions in response to natural disasters passive design strategies that can make interior spaces more efficient and healthier and expanded discussions on capturing carbon renewable energy agriculture waste public transit and adaptive reuse including innovative ideas on how to reimagine the shopping mall in the era of e commerce The strategies presented in this book will stimulate discussions within the design profession and will be of great interest to students and practitioners of environmental studies architecture landscape architecture and urban design

Yellowstone and the Snowmobile Michael J. Yochim, 2009 The first scholarly study of winter use in any national park examines the history of the conflict between the National Park Service and various interest groups over snowmobile use in Yellowstone a highly politicized value driven battle that has taken a serious toll on the NPS's ability to protect the park

Laurance S. Rockefeller Robin W. Winks, 2013-04-15 Despite his status as a scion of one of the wealthiest and most famous families in the United States and an enormously successful businessman in his own right Laurance S Rockefeller is unknown to all but a small circle of Americans Yet while he has been neither Vice President nor Governor nor chairman of the world's largest bank his contribution to society has been at least as great as that of his more famous brothers In Laurance S Rockefeller Catalyst for Conservation noted historian Robin W Winks brings Laurance to the forefront offering an intimate look at his life and accomplishments While Rockefeller has played a vital role in the business world as one of the most astute venture capitalists of our time providing seed money for among other endeavors Eastern Airlines Intel Corporation and Apple Computers his driving passion throughout his life has been the environment In addition to the millions of dollars he has donated and the numerous conservation organizations he has helped to found he served under five consecutive presidents in environmental advisory capacities Perhaps most significantly Rockefeller served under Presidents Eisenhower and Kennedy as chairman of the Outdoor Recreation Resources Review Commission ORRRC brilliantly orchestrating an assessment of the recreation and conservation needs and wants of the American people and the policies and programs required to meet those needs The reports issued by the Commission represent a groundbreaking achievement that laid the framework for nearly all significant environmental legislation of the following three decades Winks uses a combination of historical insight and extensive access to Rockefeller and government archives to present the first in depth examination of Laurance Rockefeller's life and work His

deftly argued and gracefully written volume explains and explores Rockefeller's role in shaping the transition from traditional land conservation to a more inclusive environmentalism. It should compel broader interpretation of the history of environmental protection and is essential reading for anyone concerned with the past or future of conservation in America.

Selected References Concerning the USDA Forest Service, 1995 *Wolf Mountains* Karen R. Jones, 2002 This book documents the changing tenets of landscape preservation and species protection in preserves of the United States and Canada through a capacious study of canine history. BOOK JACKET Mission Mystique Charles T. Goodsell, 2010-10-19 In an era filled with mistrust for big government and big business, Charles Goodsell goes against this grain to draw attention to public agencies admired for what they do and how well they do it. In his groundbreaking new book, Goodsell places renewed focus on organizational mission and its potential to be a strong energizing force in government, one that animates a workforce internally and attracts admiration and talent externally. He offers a normative template for the mystique that underlies this phenomenon and highlights, in six rich case studies, a driving sense of purpose, a cultural and motivational richness, and a capacity for tolerating dissent while still innovating and learning. Analyzing what works best and what doesn't, Goodsell provides a metric through which agency mystique can be evaluated and modeled. Goodsell's fresh take on public agencies not only defines good public administration in terms of ethical conduct, constitutional accountability, and performance effectiveness but argues that the field must add the crucial standard of institutional vitality.
