MacAvoy, 2008-10-01 divOver the past six decades federal regulatory agencies have attempted different strategies to regulate the natural gas industry in the United States All have been unsuccessful resulting in nationwide gas shortages or massive gas surpluses and costing the nation scores of billions of dollars In addition partial deregulation has led the regulatory agency to become more involved in controlling individual transactions among gas producers distributors and consumers In this important book Paul MacAvoy demonstrates that no affected group has gained from these experiments in public control and that all participants would gain from complete deregulation Although losses have declined with partial deregulation in recent years current regulatory practices still limit the growth of supply through

the transmission system MacAvoy's history of the regulation of natural gas is a cautionary tale for other natural resource or network industries that are regulated or are about to be regulated

DIV The Parties in Court Robert C. Wigton, 2013-12-11 Robert C. Wigton's *The Parties in Court* American Political Parties under the Constitution provides a comprehensive overview of the legal status of American political parties through an analysis of the many court opinions both state and federal in American history that have dealt with parties. The work concludes with suggestions for resolving the persistent problem of placing American political parties within our democratic system of government.

Regulating Content Michael Holoubek, Dragana Damjanovic, Matthias Traimer, 2007-01-01 A complex network of regulatory systems has arisen around the provision of media in Europe. In this connection regulating content is a focal point as content is not only of economic but of vital cultural importance. At Community level a wide variety of measures have been taken to promote this branch of industry especially in fields in which new and innovative digital technologies are used to enhance the market potential of content and creative products and services. This important book focuses on regulatory interventions in the content industry under Community law. It offers an in-depth perspective on the functioning of the European legal framework for the content industry its guiding principles and its explicit and sometimes more fluid interface with policy areas falling largely into Member States' competences. In this aspect the book can also be read as an analysis of the impact of the cooperation between European and Member State regulation when economic as well as social democratic and cultural policy goals are at stake. Among the areas of content regulation covered are legal definitions related to the content industry branches of the content industry broken down according to content category and distribution system the division of competences between the EC and the Member States in cultural affairs Community projects relevant to the content industry competition rules relating to distribution market entry and access regulation in the electronic communication markets specific regulation for such considerations as the protection of minors protection of health protection of consumers and protection of personal rights ensuring and safeguarding functioning market structures in the content markets and harmonization and coordination measures. The basis of this book was a research project commissioned by the Austrian Federal Chancellery in preparation for a seminar supported by the European Commission in connection with Austria's Council Presidency in the first half of 2006. As a systematic overview and analysis of the legal bases of European content regulation this book will be of extraordinary value to

practitioners policymakers officials and academics in the fields of media and communications law Beyond that the work sheds a clear and defining light on an area that has an important role to play in the future economic growth and the development of a competitive business environment in Europe *Implementation of the Toxic Substances Control Act, the PCB Rule, and Federal Hazardous Substance Laws Concerning the Performance of the Environmental Protection Agency in the Matter of the Texas Eastern Gas Pipeline Company* United States. Congress. Senate. Committee on Environment and Public Works. Subcommittee on Superfund and Environmental Oversight, 1988 **Searching the Law, 3d Edition** Frank Bae, Edward Bander, Francis Doyle, Joel Fishman, Paul Richert, 2021-12-13 Regulation and Markets Daniel F. Spulber, 1989 Regulation and Markets provides the up to date integrated analysis of regulatory policies and the administrative process that is needed in today's field of regulation economics The book takes a modern perspective using the tools of industrial organization and game theory It is the only unified treatment of the field and combines theoretical models with consideration of public policy issues in the areas of antitrust price regulation environmental regulation product quality and workplace safety The discussion considers both the welfare effects of regulation and the institutional aspects of the administrative regulatory process Developments in the fields of law and political science have been integrated in a rigorous manner into the economic framework Sections of the book address administrative process and market allocation competition and pricing under increasing returns to scale administrative regulation of markets and antitrust enforcement The conclusion evaluates regulatory policy and deregulation Extensive literature citations throughout enhance the book's value as a reference

Teaching Materials on the Laws of Corporations Harry G. Henn, 1986 Investing in EU Energy Security Henrik Bjørnebye, 2010-01-01 La 4e de couverture indique Since the introduction a quarter century ago of market based investments in the production of electricity and other critical services our awareness of the underlying issues affecting the supply and consumption of energy has changed radically No longer can Europe or any region rely on over capacity of electricity generation and inexpensive primary energy fuels or disregard the signs of potentially catastrophic climate change The author of this timely and sharply focused book shows that in the light of our current knowledge ensuring new investments and the right investments in electricity generation constitutes an urgent energy policy challenge facing the EU over the coming decades He accordingly makes the case for a serious reconsideration of the market facilitation and market intervention rules under electricity market legislation in the EU In the first detailed legal analysis of the EU's internal electricity market framework for investments in electricity generation facilities from the perspective of security of supply this book covers such legal issues as the following in precise detail applicability of the Treaty on the Functioning of the European Union TFEU security of supply as a ground for exemption on the basis of public security justifications of public intervention the applicability of EU State aid provisions to investments in energy security requirements imposed by EU law on Member States for ensuring cost efficient investments in European supply security facilitation of renewable energy sources and cogeneration

in the environmental interest the Court of Justice's approach to Member State interventions the Court's decisions on restrictions on free movement in the environmental interest Member States right to launch tendering procedures for new generation capacity Member States right to impose public service obligations in the general economic interest on certain undertakings and relationship between the provisions of the TFEU and those of the Euratom Treaty in relation to investments in nuclear power generation Throughout the study in addition to his analysis of the decisions of the Court of Justice and the Court of First Instance the author takes into account legal literature and Union reports preparatory works and working papers The book demonstrates convincingly that today's energy supply challenges must be based on a broader balancing of security competitiveness and sustainability interests It suggests that the internal electricity market provisions of the Electricity Directive and the Security of Electricity Supply Directive would benefit from focusing more intensely on requiring investments in technologies and primary energy sources that will help mitigate climate change and reduce European energy import dependency and less on the need for ensuring cost efficient investments through market based means Through its detailed analysis of EU law in an area of great significance to both market participants and the public sector Investing in EU Energy Security will be welcomed by legal advisors whether working for the EU electricity industry or public agencies responsible for implementation of internal electricity market measures as well as by academics in this hugely important field of current research

The Lochner Court, Myth and Reality Michael J. Phillips, 2000-11-30 Conventional wisdom holds that the Lochner Court illegitimately used the Constitution's due process clauses to strike down Progressive legislation designed to protect the poor and powerless against big business This book systematically examines all of the U S Supreme Court's substantive due process cases from 1897 through 1937 and finds that they do not support long held beliefs about the Lochner Court The Court was more Progressive than commonly imagined striking down far fewer laws on substantive due process grounds than is generally believed The laws it overturned were not invariably social legislation and relatively few due process cases involved freedom of contract Moreover Holmes despite his reputation as a Great Dissenter joined many of the cases striking down government action The book attacks three familiar normative criticisms of the Lochner Court It asserts that 1 the Court's substantive due process decisions almost certainly were not motivated by a conscious desire to assist business by suppressing social legislation only sometimes did the justices' nostalgia for laissez faire lead to this result 2 the conservative justices' understanding of business and government often exceeded that found in the typical Brandeis Brief and 3 most applications of Lochner era substantive due process cannot readily be described as illegitimate assertions of judicial power lacking justification in the due process clauses
