Regulating Doctors Fees Competition Benefits And Controls Under Medicare Aei Studies 518:

Regulating Doctors' Fees H. E. Frech, 1991 Thirteen contributions discuss physician markets and Medicare benefits alternatives for setting and adjusting fee schedules and lessons learned from research theory and experience **Current Catalog** National Library of Medicine (U.S.), 1992 First multi year cumulation covers six years 1965-70 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1992 **Incentives and Choice in Health Care** Frank A. Sloan, Hirschel Kasper, 2008-05-16 Leading scholars in the field of health economics evaluate the role of incentives in health and health care decision making from the perspectives of both supply and demand A vast body of empirical evidence has accumulated demonstrating that incentives affect health care choices made by both consumers and suppliers of health care services Decisions in health care are affected by many types of incentives such as the rate of return pharmaceutical manufacturers expect on their investments in research and development or disincentives such as increases in copayments patients must make when they visit physicians or are admitted to hospitals In this volume leading scholars in health economics review these new and important results and describe their own recent research assessing the role of incentives in health care markets and decisions people make that affect their personal health The contexts include demand decisions choices made by individuals about health care services they consume and the health insurance policies they purchase and supply decisions made by medical students practicing physicians hospitals and pharmaceutical manufacturers Researchers and students of health economics and policy makers will find this book a valuable resource both for learning economic concepts particularly as they apply to health care and for reading up to date summaries of the empirical evidence General readers will find the book's chapters accessible interesting and useful for gaining an understanding of the likely effects of alternative health care policies Contributors Henry J Aaron Ernst R Berndt John Cawley Julie M Donohue Donna Gilleskie Brian R Golden Gautam Gowrisankaran Chee Ruey Hsieh Hirschel Kasper Thomas G McGuire Joseph P Newhouse Sean Nicholson Mark V Pauly Anna D Sinaiko Frank Sloan Selected Acquisitions Robert Crown Law Library, 1992

Handbook of Health Economics A J. Culyer, J. P. Newhouse, 2000-07-19 The Handbook of Health Economics provide an up to date survey of the burgeoning literature in health economics As a relatively recent subdiscipline of economics health economics has been remarkably successful It has made or stimulated numerous contributions to various areas of the main discipline the theory of human capital the economics of insurance principal agent theory asymmetric information econometrics the theory of incomplete markets and the foundations of welfare economics among others Perhaps it has had an even greater effect outside the field of economics introducing terms such as opportunity cost elasticity the margin and the production function into medical parlance Indeed health economists are likely to be as heavily cited in the clinical as in the economics literature Partly because of the large share of public resources that health care commands in almost every developed country health policy is often a contentious and visible issue elections have sometimes turned on issues of health

policy Showing the versatility of economic theory health economics and health economists have usually been part of policy debates despite the vast differences in medical care institutions across countries The publication of the first Handbook of Health Economics marks another step in the evolution of health economics **Journal of Economic Literature** ,1992

Lewis, *Public Affairs Information Service Bulletin* Public Affairs Information Service,1984 Evaluation of the Oregon Medicaid Proposal United States. Congress. Office of Technology Assessment,1992 As part of an eventual statewide set of health insurance reform measures the State of Oregon has proposed implementing a demonstration program with Federal cofunding that would change the State s existing Medicaid program in three fundamental ways It would 1 expand coverage to include all persons with incomes up to 100 percent of the Federal poverty level 2 enroll all covered persons in some form of managed care such as with a health maintenance organization or a gatekeeperprimary care physician and 3 determine acute and primary health care benefits according to a ranked list of services with actual benefits dependent on the level of program funding Foreword p III Bulletin of the Public Affairs Information Service Public Affairs Information Service,1984 OECD Health Policy Studies Pharmaceutical Pricing Policies in a Global Market OECD,2008-09-24 This report assesses how pharmaceutical pricing and reimbursement policies have contributed to the achievement of certain health policy objectives and it examines the national and transnational effects of these policies *Vibrant and Healthy Kids* National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood Development: A Health Equity Approach,2019-12-27 Children are the foundation of the United States and supporting them is a key component of building a successful future However millions of children face health inequities that compromise their development well being and long term outcomes despite substantial scientific evidence about how those adversities contribute to poor health Advancements in

neurobiological and socio behavioral science show that critical biological systems develop in the prenatal through early childhood periods and neurobiological development is extremely responsive to environmental influences during these stages. Consequently social economic cultural and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science Practice and Policy to Advance Health Equity builds upon and updates research from Communities in Action Pathways to Health Equity 2017 and From Neurons to Neighborhoods: The Science of Early Childhood Development 2000. This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

A Roadmap to Reducing Child Poverty National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Board on Children, Youth, and Families, Committee on Building an Agenda to Reduce the Number of Children in Poverty by Half in 10 Years, 2019-09-16. The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. A Roadmap to Reducing Child Poverty reviews the research on linkages between child poverty and child well-being and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.

Strategic assessment 2020 Thomas F. Lynch III, 2020. *The Oxford Handbook of the Economics of the Biopharmaceutical Industry* Patricia M. Danzon, Sean Nicholson, 2012-04-24. This volume examines the economics of the biopharmaceutical industry with eighteen chapters by health economists.
