Regulating Social Europe Antonio Lo Faro, 2000 Taking an interdisciplinary approach this analysis of European collective bargaining places it within the broader institutional context of the phenomenon usually referred to as EC regulatory deficit It concludes that European collective bargaining should be viewed as a construction of EC law **Regulating Social Europe**

Antonio Lo Faro, 2000-04-01 A large part of the legal debate about European social integration has been focussed on social dialogue and in particular on the role of European collective agreements as formerly regulated by the Maastricht Agreement on Social Policy but now incorporated into the Amsterdam Treaty In this volume an attempt is made to conceptualise the function of European collective bargaining based on an analysis of the Treaty provisions specifically dealing collective bargaining but going beyond the Treaty in several respects Taking an inter disciplinary approach the book seeks to broaden the analysis of European collective bargaining placing it within the broader institutional context of the phenomenon usually referred to as EC regulatory deficit Against this background the author gives proper recognition to the different factors legal theoretical institutional political and industrial relations oriented which converge in the field of European collective bargaining The author concludes that in the overall context of a general redefinition of Community regulatory strategies European collective bargaining should be viewed not as evidence of an incomplete supranational legal pluralism but rather as a construction of Community law **Social and Labour Rights in a Global Context** Bob Hepple, 2002-08-29 The active

Articles 138 and 139 of the EC Treaty Christian Welz, 2008-01-01 Describes analyses and assesses the European social dialogue from a combined theoretical and normative perspective and applies theoretical strands stemming from industrial relations EC law and political theory to an understanding and assessment of the genesis actors processes and outcomes of the European social dialogue through 2007 **European Labour Law** Brian Bercusson, 2009-07-09 European Labour Law

explores how individual European national legal systems in symbiosis with the European Union produce a transnational labour law system that is distinct and genuinely European in character Professor Brian Bercusson describes the evolution of this system its national transnational and global contexts and its institutional and substantive structures The collective industrial relations dimension of employment is examined and the labour law of the EU as manifested in for example European works councils is analysed Important subjects which have traditionally received little attention in some European labour law systems are covered for example the fragmentation of the workforce into atypical forms of employment Attention is also given to the enforcement of European labour law through administrative or judicial mechanisms and the European social dialogue at intersectoral and sectoral levels This new edition has been extensively updated as the EU's influence on this area of social policy continues to grow *Social Rights and Market Freedom in the European Constitution* Stefano Giubboni, 2006-01-12 This is an account of the development of European labour and social security law as it interrelates with the evolution of market integration in the European Union Giubboni presents from a labour law perspective a case study of the changes the European Community European Union has undergone from its origins to the present day and of the ways these changes have affected the regulation of European Welfare States at national level Drawing on the idea of embedded liberalism Giubboni analyses the infiltration of EC competition and market law into national systems of labour and social security law and provides a normative framework for conceptualising the transformation of regulatory techniques implemented at the EU level This important interdisciplinary contribution to research in EU social law illustrates how the vision of social protection and solidarity is changing **National Remedies Before the Court of Justice** Michael Dougan, 2004-12-31 This book includes detailed discussion of issues such as Member State liability in damages Community control over national limitation periods and the principles governing state aid and competition law enforcement *The Impact of European Rights on National Legal Cultures* Miriam Aziz, 2004-07-01 This book contributes to the debate about the impact of European Community Law on the national constitutional orders and cultures of the respective Member States The author examines the doctrine of sovereignty as a mechanism within which this impact may be best assessed and in particular how it underwrites the tension between European Union rights and the rights provided by the respective legal orders of the Member States In particular the book focuses on political social and civil rights drawing from T H Marshall's typology In endorsing an appropriate analytical framework the book challenges both existing law and secondary literature in order to argue that the terminology the concepts and the tools which are used to assess the impact of the EC law on the national constitutional orders are to be selected with great care This is particularly apposite given the complexity of constitutional diversity in terms of national constitutions and their reception of EC law It is also important because of the variety of approaches involved in the constitutional adjustment of the *acquis* of the Union within the context of the increasing drive to constitutionalisation of the Union on the one hand and enlargement on the other The Evolution of EU Law Paul

Labour Laws and Global Trade B. A. Hepple, 2005-03-25 This book provides a comprehensive analysis of the new methods of transnational labour regulation that are emerging in response to globalisation

Europe's Constitutional Mosaic Neil Walker, Josephine Shaw, Stephen Tierney, 2011-06-14 This book emerged from an extended seminar series held in Edinburgh Law School which sought to explore the complex constitutional arrangements of the European legal space as an inter connected mosaic There has been much recent debate concerning the constitutional future of Europe focusing almost exclusively upon the EU in the context of the failed Constitutional Treaty of 2003 5 and the subsequent Treaty of Lisbon The premise of the book is that this focus while indispensable offers only a partial vision of the complex constitutional terrain of contemporary Europe In addition it is essential to explore other threads of normative authority within and across states embracing internal challenges to state level constitutional regimes the growing jurisprudential assertiveness of the Council of Europe regime through the ECHR and various democracy building measures as well as Europe's ever thicker relations both with its border regions and with broader international institutions especially those of the United Nations Together these developments create increasingly dense networks of constitutional authority within the European space This fluid and multi dimensional dynamic is difficult to classify and indeed may seem in many ways impenetrable but that makes the explanatory challenge all the more important

and pressing Without this fuller picture it becomes impossible to understand the legal context of Europe today or the prospects of ongoing changes The book brings together a range of experts in law legal theory and political science from across Europe in order to address these complex issues and to supply illustrative case studies in the topical areas of the constitutionalisation of European labour law and European criminal law
