Regulating The European Environment

Hubert Heinelt

Regulating The European Environment:

European Environmental Law Suzanne Kingston, Veerle Heyvaert, Aleksandra Čavoški, 2017-07-20 EU Environmental Law is a critical comprehensive and engaging account of the essential and emerging issues in European environmental law and regulation today Suitable for advanced undergraduate and postgraduate students the book delivers a thematic and contextual treatment of the subject for those taking courses in environmental law environmental studies regulation and public policy and government and international relations Placing the key issues in context EU Environmental Law takes an interdisciplinary and thematic approach to help students to better understand the implementation and enforcement of environmental law and policy across Europe It offers an accessible overview and links theory with practical applications that will allow students to contextualise the outcomes of legal rules and their impact on public and private behaviours It provides a definitive account of the subject examining traditional topics such as nature conservation law waste law and water law alongside increasingly important fields such as the law of climate change environmental human rights law and regulation of GMOs and nanotechnology

European Union External Environmental Policy Camilla Adelle, Katja Biedenkopf, Diarmuid Torney, 2017-11-14 This book considers the environmental policies that the EU employs outside its borders Using a systematic and coherent approach to cover a range of EU activities environmental issues and geographical areas it charts the EU's attempts to shape environmental governance beyond its borders Key questions addressed include What environmental norms rules and policies does the EU seek to promote outside its territory What types of activities does the EU engage in to pursue these objectives How successful is the EU in achieving its external environmental policy objectives What factors explain the degree to which the EU attains its goals The book will be of interest to students and academics as well as practitioners in governments both inside and outside of the EU the EU institutions think tanks and research institutes

Regulating the European Environment Thomas Handler, 1994 Environmental regulation imposes strict limits on business activity but it also offers opportunities to gain an advantage in the market and to meet industry compliance requirements Understanding the limitations and the market potential is difficult and time consuming but also important and rewarding Regulating the European Environment cuts straight through the uncertainties It is designed not to be exhaustive but to provide an initial understanding of the general shape of the mass of rules and legislation in Europe and to provide a basis for further detailed analysis of the subject if required

The Legal Regulation of Environmental Crime Valsamis Mitsilegas, Elena Fasoli, Fabio Giuffrida, Malgosia Fitzmaurice, 2022-01-17 The Legal Regulation of Environmental Crime The International and European Dimension provides a comprehensive analysis of the international and EU legal regimes for tackling environmental crime The book includes an in depth analysis of the major international conventions as they relate to the regulation of environmental crime CITES Basel MARPOL and provides a holistic overview of the evolution and content of EU law in the field of environmental crime covering substantive criminal law harmonisation

judicial cooperation and the role of EU criminal justice bodies and agencies Europol Eurojust and the EPPO in fighting environmental crime Further the book addresses key recent policy and legislative developments in the field and offers a timely contribution to legal reform in view of the publication of new proposals on legislation on environmental crime at EU level

Global Environmental Health in the 21st Century Institute of Medicine, Board on Population Health and Public Health Practice, Roundtable on Environmental Health Sciences, Research, and Medicine, 2007-03-08 Biological threats like SARS and natural disasters like the tsunami in Indonesia have devastated entire regions and quickly exhausted budgetary resources As the field of environmental health continues to evolve scientists and others must focus on gaining a better understanding of the links between human health and various environmental factors and on creating new paradigms and partnerships needed to address these complex environmental health challenges facing society

Global Environmental Health in the 21st Century From Governmental Regulations to Corporate Social Responsibility Workshop Summary discusses the role of industry in environmental health examines programs designed to improve the overall state of environmental health and explores how governmental and corporate entities can collaborate to manage this industry Stakeholders in both the public and private sectors are looking for viable solutions as the complexity of societal problems and risks associated with management and varying regulatory standards continue to increase

Global Environmental Health in the 21st Century draws critical links and provides insight into the current shape of global environmental health The book recommends expanding environmental management systems EMS to encompass a more extensive global network It also provides a complete assessment of the benefits and costs resulting from implementation of various environmental management systems

The Politics of Precaution David Vogel, 2012-04-29 The Politics of Precaution examines the politics of consumer and environmental risk regulation in the United States and Europe over the last five decades explaining why America and Europe have often regulated a wide range of similar risks differently It finds that between 1960 and 1990 American health safety and environmental regulations were more stringent risk averse comprehensive and innovative than those adopted in Europe But since around 1990 the book shows global regulatory leadership has shifted to Europe What explains this striking reversal David Vogel takes an in depth comparative look at European and American policies toward a range of consumer and environmental risks including vehicle air pollution ozone depletion climate change beef and milk hormones genetically modified agriculture antibiotics in animal feed pesticides cosmetic safety and hazardous substances in electronic products He traces how concerns over such risks and pressure on political leaders to do something about them have risen among the European public but declined among Americans Vogel explores how policymakers in Europe have grown supportive of more stringent regulations while those in the United States have become sharply polarized along partisan lines And as European policymakers have grown more willing to regulate risks on precautionary grounds increasingly skeptical American policymakers have called for higher levels of scientific certainty before imposing additional regulatory controls on business

Regulating Risks in the European Union Maria Weimer,Anniek de Ruijter,2017-10-05 A growing body of EU law and regulation is preoccupied with the protection of EU citizens from health and environmental risks Which chemicals are safe and should be allowed on the market How should the EU respond to public health emergencies such as Ebola and other infectious diseases Regulatory responses to these questions confront deep uncertainty limited knowledge and societal contestation In a time where the use of scientific expertise in EU policy making is particularly contested this book offers a timely contribution to both the academic and policy debate on the role of specialised expertise in EU public decision making on risk and technology as well as on its intertwinement with executive power It draws on insights from law governance political sciences and science and technology studies bringing together leading scholars in this field Contributions are drawn together by a shared theoretical perspective namely by their use of co production as an analytical lens to study the intricate interplay between techno scientific expertise and EU executive power By so doing this collection produces highly original insights into the development of the EU administrative state as well as into the role of regulatory science in its construction This book will be useful to scholars practitioners and policy makers working on risk regulation and the role of expertise in public decision making

Comparative Environmental Law and Regulation Nicholas A. Robinson,Elizabeth Burleson (LL. M.),Lin Heng Lye,1996 Regulating Europe Giandomenico Majone,2002-11-01 Regulating Europe explains why economic and social regulation is rapidly becoming the new frontier of public policy and public administration in Europe both at the national and EU levels Statutory regulation implemented by independent regulatory bodies is replacing not only older forms of state intervention but also to some extent the redistributive policies of the welfare state Thus Regulating Europe is an examination of the emergence of the regulatory state as the successor of the Keynesian welfare state of the past Contributions emphasize the parallelism of policy developments at the national and European levels Part one provides the necessary theoretical background including a new model of demand and supply of Community regulation The second part presents a series of case studies of particular regulatory policies and institutions in the UK Germany France Spain and the EU Part three evaluates current policy and institutional developments pointing out how the lack of a tradition of statutory regulation in Europe affects the design of the new institutions Special attention is devoted to the issue of the democratic accountability of expert politically independent agencies a problem which contrary to widespread opinion is as severe at the national level as it is in Brussels It is suggested that the requirements of democratic accountability and of subsidiarity cannot be met by re nationalizing European policies much less by increasing the current level of centralization A more promising solution is the development of regulatory networks closely integrating national and supranational regulators

Climate Change Policy in the European Union Andrew Jordan,Dave Huitema,Harro van Asselt,Tim Rayner,Frans Berkhout,2010-04-29 The European Union EU has emerged as a leading governing body in the international struggle to govern climate change The transformation that has occurred in its policies and institutions has profoundly affected climate change politics at the

international level and within its 27 Member States But how has this been achieved when the EU comprises so many levels of governance when political leadership in Europe is so dispersed and the policy choices are especially difficult Drawing on a variety of detailed case studies spanning the interlinked challenges of mitigation and adaptation this volume offers an unrivalled account of how different actors wrestled with the complex governance dilemmas associated with climate policy making Opening up the EU s inner workings to non specialists it provides a perspective on the way that the EU governs as well as exploring its ability to maintain a leading position in international climate change politics **A Guide to EU**

Environmental Law Josephine van Zeben, Arden Rowell, 2020-10-27 Written by two internationally respected scholars this unique primer distills European Union environmental law and policy into a practical guide for a nonlegal audience as well as for lawyers trained in other jurisdictions The first part explains the basics of the European legal system including key actors types of laws and regulatory instruments The second part describes the EU s overarching legal strategies for environmental management and delves into how the EU addresses the specific environmental issues of pollution ecosystem management and climate change Chapters include summaries of key concepts and discussion questions as well as informative spotlights offering brief overviews of topics With a highly accessible structure and useful illustrative features A Guide to EU Environmental Law provides a long overdue synthetic resource on EU environmental law for students and for anyone working in environmental policy or environmental science **EU Chemicals Regulation** Steven Vaughan, 2015-07-31 This

perceptive book provides an exploratory explanatory and normative account of the EU Regulation on the Registration Evaluation Authorisation and Restriction of Chemicals REACH and its regulator the European Chemicals Agency ECHA W

Environmental Policy in the European Union Andrew Jordan, 2012 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy Comprising five comprehensive parts it includes in depth case studies of contemporary policy issues such as climate change genetically modified organisms and trans Atlantic relations as well as an assessment of how well the EU is responding to new challenges such as enlargement environmental policy integration and sustainability The book s aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors Risk Analysis and Governance

in EU Policy Making and Regulation Bernardo Delogu, 2016-05-02 This book provides an easy but comprehensive and rigorous access to the main concepts terminology methods and procedures of risk analysis intended for all those involved in the EU policy and regulatory decision making on risks It establishes a common ground of knowledge which enables a more informed dialogue on risks a closer collaboration between decision makers and scientists and a better appraisal of the potential and limits of risk science The book also brings together in an accessible way much multidisciplinary knowledge which had been dispersed over many technical documents and specialist books The EU is in the front line of health safety and

environmental risk management GMOs food safety hazardous chemicals climate change radiation hazards are just a few of the popular risk issues addressed by the EU through policy and regulatory measures The risk analysis paradigm including risk assessment management and communication has been at the core of the EU decision making for a long time already EU Institutions strive for a science based approach to risk management Nevertheless the dialogue and collaboration on risk issues between policy makers stakeholders and scientists are still difficult and the potential and limits of science in support of decision making as well as the basic concepts of risk analysis are not fully understood outside the narrow specialist circles

European Union Environment Policy and New Forms of Governance Hubert Heinelt, 2019-11-11 This title was first published in 2001 Outlining the results of a three country study this text examines the impact of EU policy on the domestic political and institutional environment It tests ideas about new forms of governance that reflect the values of participation and empowerment of local interests particularly through a close scrutiny of the environmental impact process The book also analyzes the responses of the business sector in three countries Germany Greece and Great Britain to the introduction of a voluntary environmental management system the eco management and audit scheme *EU Regulation of GMOs* Maria Lee, 2009-01-01 Lee s book is a valuable addition to the literature for those wishing to broaden their understanding of the range of legal disciplines involved in GMO regulation Tracey Epps European Review of Agricultural Economics Maria Lee s work is a successful attempt to illustrate the big legal issues behind the regulation of genetically modified organisms GMOs This study which is thorough and well documented is particularly welcomed in view of the need for a dialogue between different legal specialisms for which GMOs are a relevant area of research The book provides a very interesting and insightful examination of the legal problems raised by GMOs I would warmly recommend its reading to academics and practitioners who are interested in European risk regulation law environmental law biotechnology and trade law Sara Poli European Law Review Genetically modified organisms GMOs are an extraordinary innovation They raise great expectations of economic prosperity and improved capacity to address pressing problems of poverty and environmental degradation whilst simultaneously raising great concerns about the type of social and physical world they promise Finding space in regulation to consider the full range of issues provoked by GMOs is a huge challenge This book explores the EU s elaborate regulatory framework for GMOs which extends far beyond the process of their authorisation or not for the EU market embracing disparate legal disciplines including intellectual property consumer protection and civil liability The regulation of GMOs also highlights questions of EU legitimacy in a context of multi level governance both internally towards national and local government and externally in a world where technologies and their regulation have global impacts This book will be of interest to academics and students in both law and social sciences as well as practising lawyers and policy makers It addresses questions that are significant for those involved in environmental or food issues as well as specialists in GMOs

Trade Regulation and Policy in the EU Internal Market Maletić, Isidora, 2022-06-21 Exploring the importance of the EU

Services Directive Directive 2006 123 this book provides an expansive insight into the controversial legislation regulating the internal market in services whilst examining the challenges of positive harmonisation In addition by analysing the functioning and judicial interpretation of the directive it considers EU trade regulation values and the broader significance of EU regulation in global regulatory standard setting **The Reality of Precaution** Jonathan Baert Wiener, 2011 First Published in 2010 Routledge is an imprint of Taylor Francis an informa company Regulating the Collaborative Economy in the European Union Digital Single Market Marco Inglese, 2019-11-11 This book critically assesses how the rise of the collaborative economy in the European Union Digital Single Market is disrupting consolidated legal acquisitions such as classical internal market categories as well as the applicability of consumer protection data protection and labour and competition law It argues that the collaborative economy will sooner or later require some sort of regulatory intervention from the European Union This regulatory intervention far from stifling innovation will benefit online platforms service providers and users by providing them with a clearer and more predictable environment in which to conduct their business Although primarily intended for academics this book also appeals to a wider readership including but not limited to national and international regulators private firms and lobbies as well as online platforms consumer associations and trade unions

Environmental Policy and Politics in the European Union Tom Delreux, Sander Happaerts, 2016-03-25 This brand new textbook provides a concise and informative overview of environmental policy and politics in the European Union It includes a thorough analysis of the traditional areas of environmental concern such as pollution and natural resources as well as newer environmental issues including GMOs and climate change Throughout this clear and readable introduction the authors emphasize the interdependence between EU environmental policy and changes at the global level focusing in particular on the EU's role in global environmental governance The authors' didactic approach means this text will be invaluable to undergraduate and postgraduate students of environmental politics policies and governance in the EU as well as MA programmes with a global focus including international relations and EU studies
