Regulating Europe:

Regulating Europe Giandomenico Majone, 2002-11-01 Regulating Europe explains why economic and social regulation is rapidly becoming the new frontier of public policy and public administration in Europe both at the national and EU levels. Statutory regulation implemented by independent regulatory bodies is replacing not only older forms of state intervention but also to some extent the redistributive policies of the welfare state. Thus Regulating Europe is an examination of the emergence of the regulatory state as the successor of the Keynesian welfare state of the past. Contributions emphasize the parallelism of policy developments at the national and European levels. Part one provides the necessary theoretical background including a new model of demand and supply of Community regulation. The second part presents a series of case studies of particular regulatory policies and institutions in the UK, Germany, France, Spain and the EU. Part three evaluates current policy and institutional developments pointing out how the lack of a tradition of statutory regulation in Europe affects the design of the new institutions. Special attention is devoted to the issue of the democratic accountability of expert politically independent agencies, a problem which contrary to widespread opinion is as severe at the national level as it is in Brussels. It is suggested that the requirements of democratic accountability and of subsidiarity cannot be met by re-nationalizing European policies much less by increasing the current level of centralization. A more promising solution is the development of regulatory networks closely integrating national and supranational regulators. **Regulating Europe**

Routledge is an imprint of Taylor Francis, an informal company. **Regulating Risks in the European Union** Maria Weimer, Aniek de Ruijter, 2017-10-05. A growing body of EU law and regulation is preoccupied with the protection of EU citizens from health and environmental risks. Which chemicals are safe and should be allowed on the market? How should the EU respond to public health emergencies such as Ebola and other infectious diseases? Regulatory responses to these questions confront deep uncertainty, limited knowledge and societal contestation. In a time where the use of scientific expertise in EU policy making is particularly contested, this book offers a timely contribution to both the academic and policy debate on the role of specialised expertise in EU public decision making on risk and technology as well as on its intertwinement with executive power. It draws on insights from law, governance, political sciences and science and technology studies, bringing together leading scholars in this field. Contributions are drawn together by a shared theoretical perspective, namely by their use of co-production as an analytical lens to study the intricate interplay between techno-scientific expertise and EU executive power. By so doing, this collection produces highly original insights into the development of the EU administrative state as well as into the role of regulatory science in its construction. This book will be useful to scholars, practitioners and policy makers working on risk regulation and the role of expertise in public decision making. Governing Europe in a Globalizing World Laurent Warloutzet, 2017-08-16. The complex relationship

between globalization and European integration was largely shaped in the 1970s. During this decade globalization began for the first time to threaten Western European prosperity. Using an innovative approach the book shows how western Europeans coped with the challenges of globalization during a time of deep economic crisis during the period 1973-1986. It examines the evolution of economic and social policies at the national, European and global level and expands beyond the European Economic Community (EEC) by analysing the various solutions envisaged by European decision makers towards regulating globalization including the creation of the Single Market. Based on extensively examined archives of transnational actors, international organizations and focusing on the governments of France, Germany and the UK as well as the European Commission, the book uncovers deep previously unknown economic divisions among these actors and the roles they played in the success of the EEC. This book will be of key interest to students, scholars and practitioners of political science, European studies, history, comparative politics, public policy and economic history.

Governing Europe Jack Hayward, Anand Menon, 2003-03-20. *Governing Europe* is intended to be the leading advanced survey of politics in Western Europe. It examines in detail all aspects of political life in Western Europe from public protest to core executives, social policy to Europe's place in the world. It brings together a world class team of leading scholars from the United Kingdom, continental Europe and North America. The contributions provide not only a sophisticated introduction to the various issues covered but also a detailed discussion of the major theoretical and empirical debates and developments in the field. The book therefore provides both a comprehensive overview and a series of original contributions to scholarly debate. The focus is on European core executives, public administration, parties and organised interests, democracy and popular participation, public policy and the changing European state. It will be essential reading to scholars and students alike. The volume is intended as a tribute to the late Vincent Wright of Nuffield College, Oxford University.

Regulating the Collaborative Economy in the European Union Digital Single Market Marco Inglese, 2019-11-11. This book critically assesses how the rise of the collaborative economy in the European Union Digital Single Market is disrupting consolidated legal acquisitions such as classical internal market categories as well as the applicability of consumer protection, data protection and labour and competition law. It argues that the collaborative economy will sooner or later require some sort of regulatory intervention from the European Union. This regulatory intervention far from stifling innovation will benefit online platforms, service providers and users by providing them with a clearer and more predictable environment in which to conduct their business. Although primarily intended for academics, this book also appeals to a wider readership including but not limited to national and international regulators, private firms and lobbies as well as online platforms, consumer associations and trade unions.

The Politics of Precaution David Vogel, 2012-04-29. *The Politics of Precaution* examines the politics of consumer and environmental risk regulation in the United States and Europe over the last five decades, explaining why America and Europe have often regulated a wide range of similar risks differently. It finds that between 1960 and 1990 American health safety and

environmental regulations were more stringent risk averse comprehensive and innovative than those adopted in Europe But since around 1990 the book shows global regulatory leadership has shifted to Europe What explains this striking reversal David Vogel takes an in depth comparative look at European and American policies toward a range of consumer and environmental risks including vehicle air pollution ozone depletion climate change beef and milk hormones genetically modified agriculture antibiotics in animal feed pesticides cosmetic safety and hazardous substances in electronic products He traces how concerns over such risks and pressure on political leaders to do something about them have risen among the European public but declined among Americans Vogel explores how policymakers in Europe have grown supportive of more stringent regulations while those in the United States have become sharply polarized along partisan lines And as European policymakers have grown more willing to regulate risks on precautionary grounds increasingly skeptical American policymakers have called for higher levels of scientific certainty before imposing additional regulatory controls on business

Governing Europe's Marine Environment Michael Gilek, 2016-03-03 Governing Europe's Marine Environment is a coherent up to date multidisciplinary analysis of current approaches and challenges to the sustainable governance of Europe's marine environment Structured in three parts Part 1 outlines general theoretical ideas about governance governing and governability and serves as a starting point for analysing the development of marine governance in Europe from the perspective of different disciplines Part 2 includes studies of EU marine governance Part 3 focuses on Europe's regional seas namely the Baltic Sea the North Sea the Black Sea and the Mediterranean Sea This book presents a better understanding of the fragmented governance of marine governance in Europe and in particular the tension between the Europeanization of regional seas and the regionalization of EU policies **Governing Finance in Europe** Adrienne Héritier, Magnus G.

Schoeller, 2020-08-28 How do regulatory structures evolve in EU financial governance Incorporating insights from a variety of disciplines Governing Finance in Europe provides a comprehensive framework to investigate the dynamics leading to centralisation decentralisation and fragmentation in EU financial regulation *EU Asylum Policies* Natascha

Zaun, 2017-02-22 This book fills a significant lacuna in our understanding of the refugee crisis by analyzing the dynamics that lie behind fifteen years of asylum policies in the European Union It sheds light on why cooperation has led to reinforced refugee protection on paper but has failed to provide it in practice Offering innovative empirical theoretical and methodological research on this crucial topic it argues that the different asylum systems and priorities of the various Member States explain the EU's lack of initiative in responding to this humanitarian emergency The author demonstrates that the strong regulators of North Western Europe have used their powerful bargaining positions to shape EU asylum policies decisively which has allowed them to impose their will on Member States in South Eastern Europe These latter countries having barely made a mark on EU policies are now facing significant difficulties in implementing them The EU will only identify potential solutions to the crisis the author concludes when it takes these disparities into account and establishes a

functioning common refugee policy This novel work will appeal to students and scholars of politics immigration and asylum in the EU The New Old World Perry Anderson, 2011-11-07 The New Old World looks at the history of the European Union the core continental countries within it and the issue of its further expansion into Asia It opens with a consideration of the origins and outcomes of European integration since the Second World War and how today's EU has been theorized across a range of contemporary disciplines It then moves to more detailed accounts of political and cultural developments in the three principal states of the original Common Market France Germany and Italy A third section explores the interrelated histories of Cyprus and Turkey that pose a leading geopolitical challenge to the Community The book ends by tracing ideas of European unity from the Enlightenment to the present and their bearing on the future of the Union The New Old World offers a critical portrait of a continent now increasingly hailed as a moral and political example to the world at large **EU**

Regulatory Decision Making and the Role of the United States Oliver Ziegler, 2012-09-05 Oliver Ziegler raises the question of what role economic interests of the United States play in the regulatory decision making process of the European Union Critics often assume that U S dominance in the world economy fueled by a powerful business elite has significantly affected EU regulations at the expense of environmental and consumer protection standards The author falsifies this proposition He shows first that the EU often adopts regulations against the explicit opposition of the U S thereby ignoring the principles of transatlantic regulatory cooperation Second he demonstrates that business interests in the EU are usually not homogenous and often come second to environmental and consumer concerns In addition the author shows the increasing role of the European Parliament in EU regulatory decision making **Regulating Cartels in Europe** Christopher

Harding, Julian Joshua, 2010 One of the most contentious and high profile aspects of EU competition law and policy has been the regulation of those serious competition or antitrust violations now often referred to as hard core cartels Such cartel activity typically involves large and powerful corporate producers and traders operating across Europe and beyond and comprise practices such as price fixing bid rigging market sharing and limiting production in order to ensure market stability and maintain and increase profits There is little disagreement now in terms of competition theory and policy at both international and national levels regarding the damaging effect of such trading practices on public and consumer interests and such cartels have been subject to increasing condemnation in the legal process of regulating and protecting competition Regulating Cartels in Europe provides critical evaluation of the way in which European level regulation has evolved to deal with the activities of such anti competitive business cartels They trace the historical development of cartel regulation in Europe comparing the more pragmatic and empirical approach favored in Europe with the more dogmatic and uncompromising American policy on cartels In particular the work considers critically the move towards the use of fully fledged criminal proceedings in this area of legal control examining evolving aspects of enforcement policy such as the use of leniency programs and the deployment of a range of criminal law and other sanctions This new edition of the work covers

emerging themes and arguments in the discipline including the judicial review of decisions against cartels the criminological and legal basis of the criminalization of cartel conduct and the range and effectiveness of sanctions used in response to cartel activity

Regulating and Supervising European Financial Markets Mads Andenas, Gudula Deipenbrock, 2016-08-16 The book analyses the institutions of the European financial market supervision and the challenges of financial markets The current European supervisory structure for financial markets represents a major development in European supervisory history Its operation however has to be explored and analysed critically Has it gone far enough to provide a sufficiently comprehensive and resilient system to reduce or mitigate systemic risks and handle financial crises Some claim it has gone too far already Fresh and rigorous critical legal and economic analysis from an independent scholarly perspective are needed to assess whether the institutional design of the European supervisory architecture has proved itself to be an efficient and effective model This book discusses many dimensions of the structure and workings of the European system from various angles providing different dimensions The book makes an important contribution to the limited literature on financial market supervision

Regulatory Convergence in EU Securities Regulation Iris H.-Y. Chiu, 2008-01-01 Offers a new approach to the legal issues raised by the drive for convergence in securities regulation The author offers an informed and insightful examination of the implications for regulatory and policy design if regulatory convergence were to be rigorously implemented

Regulating Europe Giandomenico Majone, 1989

Beyond the EU Regulatory State Andrea Prontera, 2019-08-16 The EU's growing dependence on natural gas and Russian resources energy security has become a hot discussion topic in academia and in policy circles in Brussels Washington and many European capitals However most of the books on the subject use a very descriptive and or normative approach and very few attempt to theorise EU energy security outside of mainstream conceptualisations of the EU as an international actor This book closes an important gap in the literature and offers a fresh perspective on EU energy studies and it will be an important contribution to the debate on the development of European integration and the EU's role in international relations in the wake of the crisis in EU politics and in light of the EU's increasingly complex external environment Due to its interdisciplinary features the book combines EU studies international affairs political economy and energy studies and the topics covered this book will be of special interest to scholars of the international political economy of energy and to those interested in European politics and EU international relations

Governing European Communications Maria Michalis, 2007-10-08 The liberalization of communications markets especially from the 1980s onward has witnessed increased regulatory activity within but also above the national state By examining the European case concentrating on the European Union the most advanced example of regionalism Governing European Communications enhances understanding of the trend toward above the national state regulation its drivers and its limitations Analyzing in detail the origins dynamics and evolution of European level communications governance in the postwar era Michalis offers a single comprehensive and up to date account of telecommunications and television policies and

regulation and their technological convergence Regulatory Delegation in the European Union Emmanuelle Mathieu, 2016-09-08 This book addresses the regulatory capacity of the EU as it responds to the huge challenge of realizing the single market. It explores its weaknesses, the EU regulatory networks, expert committees and EU agencies formed in response, and the exceptionally large and complex transnational regulatory system which has resulted. It defines the EU regulatory space as a multi-faceted phenomenon of institutional expansion whose shape varies across sectors and changes over time. Empirically based on the exploration of how regulatory delegation has emerged and evolved in three key EU policies: food safety, electricity and telecommunications, the book disentangles and links together the functional, institutional and power distributional factors and their interplay over time into a unified explanation of the many faces of the EU regulatory space.
