Regulating European Drug Problems:

Regulating European Drug Problems Nicholas Dorn, 2023-09-20 Throughout Europe from town halls and regional governments through national Parliaments and ministries to the high institutions of the European Union there runs a vigorous debate on organised crime municipal safety and private conduct Drug problems and what to do about them often occupy center stage at these debates Throughout the 1990s the focus of legal attention has been primarily on the criminal law New criminal offenses have been created partly in response to influences from above from international and European agreements and partly in response to pressure from below concerns of citizens at national and sub national levels But although criminal law certainly is important as far as the development of drug controls is concerned it is by no means the whole story There is a parallel history a regulatory one consisting of the increasing use of administrative measures some of which are directly concerned with drugs while others are more general but equally applicable These responses together with civil law variously function as adjuncts to criminal law or as alternatives to it in relation to drug trafficking at European and national levels drug related public nuisance as it concerns citizens at municipal level and drug users After charting existing measures in the legal orders of Member states and of the Community Regulating European Drug Problems looks at prospects for administrative drug controls after Amsterdam in the context of the development of the Single Market cooperation against crime and insecurity subsidiarity and human rights At a practical level the study offers provocative ideas to policy makers and administrators working at the intersection of city level national and European responses to drugs For scholars and students the book offers comparative legal research and European synthesis and forges new links between fields of law suppression of organised crime and economic and social regulation Treating Drug Problems, 1990 **Regulating Europe** Giandomenico Majone, 2002-11-01 Regulating Europe explains why economic and social regulation is rapidly becoming the new frontier of public policy and public administration in Europe both at the national and EU levels Statutory regulation implemented by independent regulatory bodies is replacing not only older forms of state intervention but also to some extent the redistributive policies of the welfare state Thus Regulating Europe is an examination of the emergence of the regulatory state as the successor of the Keynesian welfare state of the past Contributions emphasize the parallelism of policy developments at the national and European levels Part one provides the necessary theoretical background including a new model of demand and supply of Community regulation The second part presents a series of case studies of particular regulatory policies and institutions in the UK Germany France Spain and the EU Part three evaluates current policy and institutional developments pointing out how the lack of a tradition of statutory regulation in Europe affects the design of the new institutions Special attention is devoted to the issue of the democratic accountability of expert politically independent agencies a problem which contrary to widespread opinion is as severe at the national level as it is in Brussels It is suggested that the requirements of democratic accountability and of subsidiarity cannot be met by re nationalizing European policies

much less by increasing the current level of centralization A more promising solution is the development of regulatory networks closely integrating national and supranational regulators

Economic Aspects of Gambling Regulation: EU and US Perspectives Tom Coryn, Cyrille J.C.F. Fijnaut, Alan Littler, 2007-12-31 The dynamic discussions which took place at the Colloquium on the Economic Aspects of Gambling Regulation EU and US Perspectives hosted by Tilburg University are reflected in this book It brings together a wide range of perspectives from the contemporary debate surrounding the regulation of gambling from within the context both of the EU and the USA Not only does the book encompass both ends of the spectrum of the current discussion it also brings together the perspectives of academics lawyers and operators Debates surrounding the regulation of gambling have been increasing in terms of frequency and ferocity at the national European and international levels Within the Member States of the European Union there has been considerable debate as to the appropriate method of regulating gambling in particular with a view to securing revenue streams for good causes Concurrently infringement proceedings of the European Commission and the case law of the European Court of Justice have the potential to disrupt chosen regulatory approaches and thus long established revenue flows This is but one of the economic aspects to the regulation of gambling which to date has not been explored within Europe to the extent seen in the United States Lessons which European jurisdictions can learn from American experiences in this field and discussions on the state of the art of gambling economics in Europe today form the basis of this dynamic book

Money Laundering Counter-measures in the European Union Valsamis Mitsilegas, 2003-01-01 The past fifteen years witnessed the emergence globally of a plethora of legislative measures aimed at countering money laundering These developments have been inextricably linked with the growing international focus on newly perceived and or prioritised global security threats such as organised crime and terrorism with money laundering counter measures deemed essential to counter these threats Taking these developments into account this book examines in detail the evolution and content of money laundering counter measures in the European Union These measures constitute a new paradigm of security governance achieved through three principal methods criminalisation consisting in the emergence of new criminal offences responsabilisation consisting in the mobilisation of the private sector to co operate with the authorities in the fight against money laundering and the emphasis on the administration of knowledge through the establishment of new institutions the financial intelligence units with extensive powers to administer a wide range of information provided by the private sector This paradigm may pose significant challenges to fundamental legal principles and to well established social structures and the book attempts to address this balance This up to date analysis includes the provisions of the new EU money laundering Directive which was formally adopted in December 2001

Better Regulation Stephen Weatherill, 2007-06-28 The discourse of Better Regulation is a hot topic intimately associated with the drive for cost savings and a more efficient economy In the UK and in the EU rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand and commercial freedom and the potential for innovation on the other But who is the regulator listening to and what effect does this have on the regulatory pattern governing the integrating EU market What is best practice in the matter of regulatory assessment The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation the accountability issues involved and problems of enforcement It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy makers politicians and the business community has turned instead to the quest for Better Regulation or perhaps it might be said a Better European Union
