Regulating The Global Information Society:

Regulating the Global Information Society Christopher T. Marsden, 2000 This work explores the regulation of the Internet from an interdisciplinary perspective In depth coverage includes areas such as international political economy law politics economics and sociology Global Information Society Mark I. Wilson, Aharon Kellerman, Kenneth E. Corey, 2013-04-11 We have been living and working in the information society for decades yet still we struggle to understand and keep up in the face of its constant flux and vast scope In this unique interdisciplinary text three scholars at the forefront of this dynamic field provide a clear conceptual framework and interpretation of the global information society They explain the three pillars of the information society technology knowledge and mobility and the global information society as a whole both as an interconnected web and a regionally distinct phenomenon Offering a nuanced understanding of this complex subject this book will enable students to navigate and thrive in the dynamic and evolving world of information and communication technology The Internet Society II Konrad Morgan, C. A. Brebbia, J. Michael Spector, 2006 This book explores the technical social and cultural implications of the emerging Information and communication technologies addressing the technological and scientific development within education commerce governance and security with a special emphasis on the impact on individuals culture and society Bringing together papers from the Second International Conference on Advances in Education Commerce Data and Information Privacy Psychology Gender Culture New Learning **The Information Society:**

Innovation, Legitimacy, Ethics and Democracy In Honor of Professor Jacques Berleur s.j. Philippe Goujon, Sylvain Lavelle, Penny Duquenoy, Kai Kimppa, Veronique Laurent, 2007-11-15 This volume honors the professional life of Jacques Berleur He is known for his extensive work within the IFIP community to expose the nature of the ethical dilemmas of a society increasingly reliant on complex ICT infrastructures to raise awareness of the social challenges this poses and to influence action compatible with the ethical values of western democracy **Governing Global Electronic Networks**

William J. Drake, Ernest J. Wilson (III.), 2008-12-05 In this volume experts analyze the global governance of electronic networks emphasizing international power dynamics and the concerns of nondominant actors Each chapter concludes with a set of policy recommendations for the promotion of an open dynamic and more equitable network order

Communications Damian Tambini, 2001 **The Making Available Right** Cheryl Foong, 2019 p p1 margin 0 0px 0 0px 0 0px font 10 0px Arial The right of copyright owners to make their content available to the public is crucial in an environment driven by access The Making Available Right provides in depth analysis of this exclusive right and offers insights on how we can approach the right in a more transparent and principled manner This thought provoking book brings together detailed analysis of the law and a broader consideration of copyright s fundamental aims and will be of interest to judges practitioners and scholars concerned about how copyright deals with access going forward **Protecting Children in the Digital Era** Eva Lievens, 2010-07-26 From the mid 1990s onwards concerns regarding the exposure of children to

harmful content in the increasingly digital media environment intensified Soon thereafter policy makers across Europe realised that alternative regulatory instruments such as self and co regulation might be more appropriate than traditional legislation to address this matter of public interest Taking the complex and delicate nature of protecting minors into account this book provides an in depth legal analysis of the alternative regulatory instruments that can be used to regulate content in the digital era with particular attention to the protection of fundamental rights such as freedom of expression privacy and procedural guarantees internal market regulation competition rules and implementation requirements World Rule Jonathan GS Koppell,2010-10 World Rule is essential reading for scholars managers and policy makers interested in the rules that underpin the global economy Koppell authoritatively and convincingly explains the origins of the dense network of global rules and elucidates their effects on both markets and practices his theoretical insights into the politics of organizations are profound Ravi Abdelal Harvard Business School *A Normative Theory of the Information Society* Alistair S. Duff,2012-03-12 There is a clear need for a systematic integrative and rigorous normative theory of the information society In this book Duff offers a prescriptive theory to help to guide the academic and policy communities as they debate the future shape of emerging post industrial information based societies He argues that information policy needs to become anchored in a left liberal philosophy which foregrounds a feasible permutation of the core ideals of freedom equality and brotherhood The information society if it is to be worth having at all cannot be allowed to be largely the outcome of the free play of market forces and technological determinism The social structure including the information economy must be subjected to a regulatory axiological system as explicated by some leading proponents of social democracy This text will be of interest to scholars and students at the cutting edge of information studies journalism and media computer science sociology politics philosophy management and law Regulating Code Ian Brown,Christopher T. Marsden,2013-03-01 The case for a smarter prosumer law approach to Internet regulation that would better protect online innovation public safety and fundamental democratic rights Internet use has become ubiquitous in the past two decades but governments legislators and their regulatory agencies have struggled to keep up with the rapidly changing Internet technologies and uses In this groundbreaking collaboration regulatory lawyer Christopher Marsden and computer scientist Ian Brown analyze the regulatory shaping of code the technological environment of the Internet to achieve more economically efficient and socially just regulation They examine five hard cases that illustrate the regulatory crisis privacy and data protection copyright and creativity incentives censorship social networks and user generated content and net neutrality The authors describe the increasing multistakeholderization of Internet governance in which user groups argue for representation in the closed business government dialogue seeking to bring in both rights based and technologically expert perspectives Brown and Marsden draw out lessons for better future regulation from the regulatory and interoperability failures illustrated by the five cases They conclude that governments users and better functioning markets need a smarter prosumer law approach

Prosumer law would be designed to enhance the competitive production of public goods including innovation public safety and fundamental democratic rights

Cyberethics Richard A. Spinello, 2014 This fully revised and updated fifth edition offers an in depth and comprehensive examination of the social costs and moral issues emerging from ever expanding use of the Internet and new information technologies Focusing heavily on content control free speech intellectual property and security this book provides legal and philosophical discussions of these critical issues It includes new sections on Luciano Floridi's macroethics gatekeepers and search engines censorship anti piracy legislation patents and smartphones Real life case studies including all new examples focusing on Google Facebook video games reader's rights and the LulzSec Hackers provide real world context

Transnational Advocacy Networks in the Information Society Derrick L. Cogburn, 2017-01-11 This book examines the role of transnational advocacy networks in enabling effective participation for individual citizens in the deliberative processes of global governance Contextualized around the international conference setting of the United Nations sponsored World Summit on the Information Society WSIS in 2003 and 2005 the book sees epistemic communities and information and communication technologies ICTs as critical to the effectiveness of this important organizational form Historically governments have dominated the official conference diplomacy surrounding these World Summits However reflecting the UN General Assembly resolution authorizing WSIS transnational civil society and private sector organizations were invited to participate as official partners in a multistakeholder dialogue at the summit alongside the more traditional governments and international organizations This book asks are transnational advocacy networks active in the global information society influential partners in these global governance processes or merely symbolic tokens or pawns Cogburn explores the factors that enabled some networks such as the Internet Governance Caucus to persist and thrive while others failed and sees linkages with epistemic communities such as the Global Internet Governance Academic Network and ICTs as critical to network effectiveness

The Global Flow of Information Ramesh Subramanian, Eddan Katz, 2011-08-01 The Internet has been integral to the globalization of a range of goods and production from intellectual property and scientific research to political discourse and cultural symbols Yet the ease with which it allows information to flow at a global level presents enormous regulatory challenges Understanding if when and how the law should regulate online international flows of information requires a firm grasp of past present and future patterns of information flow and their political economic social and cultural consequences In *The Global Flow of Information* specialists from law economics public policy international studies and other disciplines probe the issues that lie at the intersection of globalization law and technology and pay particular attention to the wider contextual question of Internet regulation in a globalized world While individual essays examine everything from the pharmaceutical industry to television to information warfare against suspected enemies of the state all contributors address the fundamental question of whether or not the flow of information across national borders can be controlled and what role the law should play in regulating global information flows Contributors Frederick M Abbott C

Television Eli M. Noam, Jo Groebel, Darcy Gerbarg, 2003-09-12 Internet TV is the quintessential digital convergence medium
 linking television telecommunications the Internet computer applications games and more Soon venturing beyond the
 convenience of viewer choice and control Internet TV will enable and encourage new types of entertainment education and
 games that take advantage of the Internet s interactive capabilities What Internet TV is today and can be in the future forms
 the context for this book Arising from collaboration between the Columbia Institute for Tele Information CITI and the
 European Institute for the Media EIM this volume investigates the advent of widely available individual broadband Internet
 communications and their impact on the development of Internet TV Editors Eli Noam Jo Groebel and Darcy Gerbarg have
 collected seminal papers by leaders from the U S and European media and technology industries that offer a critical look at
 the impact of interactivity on television content and address the need for media organizations to create interactive
 programming in this untapped realm with unclear consumer interest and desires Each section of the volume fleshes out key
 issues and concepts of television and the Internet Part I Infrastructure Implications of Internet TV discusses questions about
 the required network capacity for various quality grades to deliver individualized broadband to homes Part II Network
 Business Models and Strategies addresses the business challenges of making Internet TV a financial success Part III Policy
 examines policy issues including copyright and regulation Part IV Content and Culture reviews available content those
 creating it and how consumers view Internet TV content Part V Future Impacts considers future global prospects for Internet
 TV content creation and distribution Internet Television is an essential resource for professionals and scholars in new
 technology and media studies media policy telecommunication broadcasting and related areas It is also appropriate for
 graduate seminars in telecommunications media and new technologies and broadcasting and the Internet Governance,
Regulation and Powers on the Internet Eric Brousseau, Meryem Marzouki, Cécile Méadel, 2012-04-23 An interdisciplinary
 survey of the issues surrounding the governance of the Internet *Digital Terrestrial Television in Europe* Allan
 Brown, Robert G. Picard, 2004-09-22 Digital technology for the production transmission and reception of television is expected
 to replace analogue transmission throughout the world The timetable for this transition is uncertain and different projections
 have been made for virtually every country in the world This book gives the exhaustive details of the issues of this
 changeover in Europe and elsewhere The details are placed within the context of the massive changes which the television
 industry has been subjected to over the past 25 years The rollout of digital terrestrial television DTTV in Europe is a

significant issue for every country included in this survey. It is of such importance because DTTV is the centerpiece of many governments' policies toward making Europe the world leader in new information and communication technologies. These same governments are all wrestling with the issues of how to use the technology in ways that create both commercial and non-commercial value. European perspectives on the social, cultural, and political nature of broadcasting vary significantly from those in other parts of the world and require that the introduction of DTTV should be handled differently to its introduction elsewhere. There are enormous technical, political, and economic aspects to be considered and these vary from country to country in Europe. The two editors bring a perspective to this study as media economists who come to the European scene from other parts of the world. The book covers DTTV in depth and it also includes discussions of cable, satellite, broadband, and Internet technology for comparison.

Routledge Handbook of Media Law Monroe E.

Price, Stefaan Verhulst, Libby Morgan, 2013-01-04. Featuring specially commissioned chapters from experts in the field of media and communications law, this book provides an authoritative survey of media law from a comparative perspective. The handbook does not simply offer a synopsis of the state of affairs in media law jurisprudence; rather, it provides a better understanding of the forces that generate media rules, norms, and standards against the background of major transformations in the way information is mediated as a result of democratization, economic development, cultural change, globalization, and technological innovation. The book addresses a range of issues including Media Law and Evolving Concepts of Democracy, Network neutrality and traffic management, Public Service Broadcasting in Europe, Interception of Communication and Surveillance in Russia, State secrets, leaks, and the media. A variety of rule-making institutions are considered, including administrative and judicial entities within and outside government, but also entities such as associations and corporations that generate binding rules. The book assesses the emerging role of supranational economic and political groupings as well as non-Western models such as China and India, where cultural attitudes toward media freedoms are often very different. Monroe E. Price is Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania and Joseph and Sadie Danciger Professor of Law and Director of the Howard M. Squadron Program in Law, Media, and Society at the Cardozo School of Law. Stefaan Verhulst is Chief of Research at the Markle Foundation. Previously, he was the co-founder and co-director with Professor Monroe Price of the Programme in Comparative Media Law and Policy (PCMLP) at Oxford University, as well as senior research fellow at the Centre for Socio-Legal Studies. Libby Morgan is the Associate Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania.

Media Pluralism and European Law Ewa Komorek, 2012-12-01. Although there appears to be no firm legal basis in the Treaties for EU legislative action aimed specifically at protecting media pluralism, this book opens a number of promising avenues along which a viable legal regime protecting media pluralism may be achieved in the EU. With particular focus on broadcasting, the book examines existing albeit fragmented legislative and regulatory measures in

competition law and other areas that contribute to this goal and sets forth ways to strengthen monitoring and transparency generate soft law with hard statements introduce a pluralism test in the EU Merger Regulation promote more public service media and foster media literacy Among many other issues arising in the course of the discussion the author describes and elucidates the following various types of integration of media companies and the different ways they affect pluralism and diversity limitations of must carry rules and principles of interoperability the diverging priorities of different European organizations institutions and bodies and contradictory lobbying efforts from industry actors The author places herself on the culture side of the culture commodity dilemma showing why it is vital for regulators to preserve media pluralism by counteracting excessive media concentration and safeguarding quality and diversity of content In this era which is transforming media and communications industries worldwide with an ever increasing plethora of delivery means without respect to national borders this book is an essential resource for regulators and other concerned policymakers as well as for lawyers working with any aspect of media
