nanotechnology as a lens through which to understand contemporary democracy in both theory and practice Arguing that democracy is at stake where nanotechnology is defined as a problem Laurent examines the sites where nanotechnology is discussed and debated by scientists policymakers and citizens It is at these sites where the joint production of nanotechnology and the democratic order can be observed Focusing on the United States France and Europe and various international organizations Laurent analyzes representations of nanotechnology in science museums collective discussions in participatory settings the making of categories such as nanomaterials or responsible innovation in standardization and regulatory arenas and initiatives undertaken by social movements He contrasts American debates in which the concern for public objectivity is central with the French state experiment the European goal of harmonization and the international concern with a global market In France public debate proceeded in response to public protest and encountered a radical critique of technological development the United States experimented with an innovative approach to technology assessment The European regulatory approach results in lengthy debates over political integration the United States relies on the adversarial functioning of federal agencies Because nanotechnology is a domain where concerns over anticipation and participation are pervasive Laurent argues nanotechnology and science and technology studies more generally provides a relevant focus for a renewed analysis of democracy

A New Social Ontology of Government Daniel Little, 2020-07-07 This book provides a better understanding of some of the central puzzles of empirical political science how does government express will and purpose How do political institutions come to have effective causal powers in the administration of policy and regulation What accounts for both plasticity and perseverance of political institutions and practices And how are we to formulate a better understanding of the persistence of dysfunctions in government and public administration failures to achieve public goods the persistence of self dealing behavior by the actors of the state and the apparent ubiquity of corruption even within otherwise high functioning governments

Regulatory Freedom and Indirect Expropriation in Investment Arbitration Aniruddha Rajput, 2018-12-20 Many investment arbitration cases involve a challenge to a regulatory measure of a host state on the basis of indirect expropriation The practice of arbitral tribunals is diverse and unsettled In recent years States have been trying to clarify the relationship between regulatory freedom also known as police powers and indirect expropriation by revising provisions on indirect expropriation in their investment treaties This book provides the first focused analysis of indirect expropriation and regulatory freedom drawing on a broad range of the jurisprudence of investment tribunals The nature of regulatory freedom in international law has been explained on the bases of jurisprudence of international courts and tribunals such as the International Court of Justice ICJ Permanent Court of International Justice PCIJ dispute resolution bodies of the World Trade Organisation WTO European Court of Human Rights While showing how cases involving standoff between regulatory freedom and indirect expropriation can be resolved in practice the book goes on to present a conceptual framework for interpreting the nuances of this relationship The book

provides a detailed responses to the following complex questions To what extent do states retain regulatory freedom after entering into investment treaties What is the scope of regulatory freedom in general public international law What are the elements of regulatory freedom and standard of review How to draw a dividing line between regulatory freedom and indirect expropriation Whether the sole effects doctrine or the police powers is the appropriate method for distinguishing between regulatory freedom and indirect expropriation While addressing these questions the author analyses different theoretical approaches that reflect upon the relationship between regulatory freedom and indirect expropriation and how far they assist in understanding these potentially overlapping concepts their relationship with each other and the method for distinguishing between them Given the dense network of around three thousand bilateral investment treaties BITs that impose an obligation to protect foreign investments in a State this book will help practitioners identify through analysis of cases from diverse fields how a situation may be categorized either as regulatory freedom or as indirect expropriation The analysis will also be of value to government officials and lawyers involved in negotiating and re negotiating investment treaties and to arbitrators who have to decide these issues Scholars will welcome the book s keen insight into the contentious relationship between a customary international law norm and a treaty norm
