Regulation Of Network Utilities The European Experience:

Regulation of Network Utilities Claude Henry, Michel Matheu, Alain Jeunemaître, 2001 Propelled by deep technical economic and cultural changes network utilities have in the last twenty years entered a new era Since competition has been widely introduced and promoted we have experienced a radical change in the structure of the industries and the role of the state authorities Their role in managing monopolies has evolved into regulating new forms of markets which has resulted in the creation of independent regulatory authorities These new public bodies work with governments to try and reconcile the needs of competition and public service missions This suggests the use of recent developments in economic theory to handle complex problems This volume offers an exploration by scholars and regulators of the new regulatory regimes across Europe The first part presents the pioneering experiences of the United Kingdom and Sweden The United Kingdom has quickly chosen to establish powerful and independent individual regulators Reforms in Sweden have been more gradual and regulators have in the first instance acted mainly as mediators Part two is devoted to second wave developments that took place in various European countries i e France Germany Italy and Spain countries where the legal tradition is less conducive to the concept of independent regulators There the regulators are often but not always less powerful and meet more obstacles in their efforts to prevent either the formation of oligopolies or the resistance of incumbent monopolies In Germany another problem has emerged as the federal tradition prevents the creation of independent regulators in certain key sectors The contributions in the third part of the volume throw some light on the problems of coordinating national regulations One can observe the continuous emergence of modes of cooperation between national regulators as well as European authorities Faced with certain categories of problem the European authorities are themselves led to act as common regulators The countries of central and eastern Europe which are progressively converging towards the general economic model of the West are more and more concerned with the accompanying regulation problems Last but not least the Internet raises worldwide problems of regulation that are beginning to be seriously considered

Regulating Content Michael Holoubek, Dragana Damjanovic, Matthias Tramer, 2007-01-01 A complex network of regulatory systems has arisen around the provision of media in Europe In this connection regulating content is a focal point as content is not only of economic but of vital cultural importance At Community level a wide variety of measures have been taken to promote this branch of industry especially in fields in which new and innovative digital technologies are used to enhance the market potential of content and creative products and services This important book focuses on regulatory interventions in the content industry under Community law It offers an in depth perspective on the functioning of the European legal framework for the content industry its guiding principles and its explicit and sometimes more fluid interface with policy areas falling largely into Member States competences In this aspect the book can also be read as an analysis of the impact of the cooperation between European and Member State regulation when economic as well as social democratic and cultural policy goals are at stake Among the areas

of content regulation covered are legal definitions related to the content industry branches of the content industry broken down according to content category and distribution system the division of competences between the EC and the Member States in cultural affairs Community projects relevant to the content industry competition rules relating to distribution market entry and access regulation in the electronic communication markets specific regulation for such considerations as the protection of minors protection of health protection of consumers and protection of personal rights ensuring and safeguarding functioning market structures in the content markets and harmonization and coordination measures The basis of this book was a research project commissioned by the Austrian Federal Chancellery in preparation for a seminar supported by the European Commission in connection with Austria's Council Presidency in the first half of 2006 As a systematic overview and analysis of the legal bases of European content regulation this book will be of extraordinary value to practitioners policymakers officials and academics in the fields of media and communications law Beyond that the work sheds a clear and defining light on an area that has an important role to play in the future economic growth and the development of a competitive business environment in Europe

Corporate Power and Regulation Sandra Eckert, 2019-05-24 A novel insightful and provocative foray into the abilities capacities and limits of corporate power on the one hand and public power and capacities on the other hand Eckert offers new and refined insights on core issues in the theories of public and private interest regulation David Levi Faur Hebrew University of Jerusalem Israel This impressive book breaks important ground in the regulatory governance literature by bringing in a fresh corporate perspective Based on a set of fascinating case studies of European regulation Eckert compellingly unpacks key facets of corporate power A must read for regulation scholars who often neglect the targets of regulation Burkard Eberlein York University Canada This book offers systematic and empirically fascinating insights into the regulatory power of corporations which unfolds outside the traditional political arenas Its policy effects have important implications for the target groups of regulation the general public and the democratic political process as such The conceptualization and use of rich empirical sources make for a compelling read Adrienne Hritier European University Institute Italy This book takes a fresh look at corporate power in the regulatory process It examines how corporations seek to prevent shape make or revoke regulation The central argument is that in doing so corporations utilise distinct power resources as experts innovators and operators By re-emphasising the proactive role of business the book complements our acquired knowledge of policymakers capacity to put pressure on or delegate power to private actors Empirically the book covers European consumer and environmental policies and conducts case studies on the chemical paper home appliance ICT and electricity industries A separate chapter is dedicated to the assumption that Brexit will lead to an unprecedented result of EU regulation being lifted and how this could put corporate power in regulation at risk This book provides a new perspective on the policy implications of corporate power to scholars students and practitioners alike

International Handbook on Industrial Policy P. Bianchi, 2008-01-01 This timely and much needed Handbook reconsiders

an old topic from a fresh perspective raising a number of new interesting and worthwhile issues in the wake of ten years of globalization This comprehensive analysis illustrates that old style industrial policies whereby the government directly intervened in markets and was often the producer itself are no longer relevant Structural changes occurring in economies summarized in the term globalization are triggering the definition and implementation of new industrial policies The contributors leading experts in their field unite to evaluate this shift of over a decade ago Employing various empirical and methodological approaches with a strong theoretical underpinning this world wide study of the state of the art of industrial policy issues is an invaluable reference tool It has been enthusiastically received by a wide ranging audience including scholars researchers and policy makers with an interest in industrial economics and policy business studies and policies for growth competitiveness and development

Outsourcing Rulemaking Powers Cedric Jenart, 2022-01-20 Within democratic states parliaments have always been regarded as playing a pivotal role in the creation of rules Through its composition parliament represents the opinions and interests of society which it serves through the legislative process But in an increasingly globalized world nation states

are confronted with issues that require international cooperation expert knowledge and flexibility to resolve Rather than taking the lead parliaments are increasingly settling for a managerial position and have begun to outsource their rulemaking powers and other constitutional responsibilities rather than exercising them themselves Outsourcing Rulemaking Powers identifies the shared constitutional principles that determine the limits to the outsourcing of rulemaking powers It asks fundamental questions of its readers such as which powers should be outsourced And to whom What mechanisms are in place to guarantee the quality of the rules they make Through the examination of multiple countries this book argues that there should be minimal legal safeguards to which all rules must heed in particular those made by autonomous public or private actors Offering a bridge between traditional constitutional law and transnational private law this book will be of interest to both practitioners and scholars within the global communities of comparative constitutionalism global administrative law and transnational private law

Renegotiating Authority in EU Energy and Climate Policy Anna Herranz-Surrallés, Israel Solorio, Jenny Fairbrass, 2021-09-30 In the context of multiple crises EU Energy and Climate policy is often identified as one of the few areas still exhibiting strong integration dynamics However this domain is not exempt from contestation and re-nationalization pressures This collection seeks to understand those contradictory integration and disintegration tendencies by problematizing the notion of authority When why and by whom is EU authority in Energy and Climate policy conferred and contested What strategies are used to manage authority conflicts and to what effect These questions are examined in some of the knottiest aspects of EU energy and climate policy for example the adoption of the landmark Governance of the Energy Union Regulation the long drawn out attempts to complete the EU's internal energy market the struggle to achieve ambitious EU targets in renewable energy and energy efficiency beyond 2020 the blurring of economic and security instruments in external energy policy or the heated discussions over the Nord Stream 2 gas pipeline The chapters in this book were originally published as a special issue of the Journal of European Integration

Utility Regulation in Competitive Markets Colin Robinson, 2007-01-01 Utility Regulation in Competitive Markets is the latest book in the annual series published in association with the Institute of Economic Affairs and the London Business School which critically reviews the state of utility regulation and competition policy This significant new volume contains incisive chapters on a number of prominent concerns including changes in the British system of utility regulation the spectrum allocation question liberalization of EU energy markets security of supply issues reform in the European postal sector the future of rail regulation the cost of capital and Ofcom's strategic approach to regulation Chapters on each topic are followed by comments from regulators competition authority chairmen and other experts in the relevant fields By confronting the most important international developments in utility regulation the authors offer practical policy recommendations for an effective way forward This book will be of great value to practitioners policymakers and academics alike who are concerned with regulation deregulation and policies to promote competition

Privatization Experiences in the European Union Marko

Köthenbürger,2006 Experts evaluate the varied outcomes of privatization experiences in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The trend toward privatization which began with privatization experiments in the UK under Margaret Thatcher and the deregulation of the telecommunications sector in the United States has attracted the attention of policymakers over the past two decades Privatization is broadly supported by most academic economists but the results of actual privatization efforts seem mixed In the UK for example telecom rates fell sharply after privatization but privatized rail service was widely perceived to have declined dramatically in quality In this CESifo volume international experts examine the experiences of 10 EU countries evaluating the real outcomes of privatization policies in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The effects of privatization which includes not only changes in ownership of public activities and entities but also liberalization of markets and deregulation are difficult to distinguish from the effects of other economywide influences The studies in this volume meet this methodological challenge by using a well defined set of criteria including reducing consumer prices increasing quantity and improving quality by which to make their assessments Background chapters provide a conceptual framework for considering the issues Contributors Pablo Arocena Sean D Barrett Ansgar Belke Michel Berne Henrik Christoffersen Andrea Goldstein G nter Knieps David Newbery Martin Paldam David Parker G rard Pogorel Friedrich Schneider Eric van Damme Ingo Vogelsang Johan Willner The Social Science Encyclopedia Adam Kuper,2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society
