Positive Free Speech Andrew T Kenyon, Andrew Scott, 2020-05-28 Freedom of expression is generally analysed as a bare liberty against restraint by state action Underpinning rationales for freedom of speech very often imply however that the concept also has important positive aspects and that to be truly democratic the modern polity requires more than negative freedom In contemporary conditions this understanding of free speech raises matters such as media diversity or pluralism the concept of voice and access to the public sphere access to information and the need to rethink the audience in relation to public speech Whether securing positive free speech is a matter of politics or of law a task for legislatures or for courts is an open question On one level any programme of inculcating positive dimensions of free speech might be understood as inherently polycentric and hence political in character Yet a number of jurisdictions evince enhanced legal recognition for the principle The aim of this collection of papers is to interrogate the rationales of positive free speech to consider the political and juridical methods by which it has or may be more fully reflected in the modern state and to consider the range of practical contexts in which its valorisation has or would have significant implications The contributors are drawn from an array of European and international jurisdictions They include academic lawyers and communications researchers

Deficits in EU and US Mandatory Environmental Information Disclosure Dirk Büniger, 2011-10-20. It is the publicity about the Pollutant Release Inventory's data which creates an incentive for firms to achieve emission reductions. Accordingly, public access to environmental information constitutes a core characteristic of the aforementioned inventory. Here, in essence, two facets arise. First, with regard to the collection, it is disputed whether such information, which may comprise confidential commercial and industrial information in the EU as well as trade secrets in the US, can be protected.

under fundamental and constitutional property rights respectively Second in the context of dissemination and utilisation it is arguable whether the information indeed impacts polluters and produces an outcome that secures a certain level of environmental protection The author responds to the first issue by taking the EU and US jurisdictions into account and strives to analyse how this novel form of Internet disclosure liberates market mechanisms in the quest for effective and efficient emission reductions
