Kissin, G. David Adamson, Georgina Chambers, Christian De Geyter, 2019-07-04 Offers a comprehensive guide to assisted reproductive technology surveillance describing its history global variations and best practices *Infertility around the Globe* Marcia Inhorn, Frank van Balen, 2002-05-30 This exceptional collection of essays breaks new ground by examining the global impact of infertility as a major reproductive health issue one that has profoundly affected the lives of countless women and men Based on original research by seventeen internationally acclaimed social scientists it is the first book to investigate the use of reproductive technologies in non Western countries Provocative and incisive it is the most substantial work to date on the subject of infertility With infertility as the lens through which a wide range of social issues is explored the contributors address a far reaching array of topics

why infertility has been neglected in population studies how the deeply gendered nature of infertility sets the blame squarely on women's shoulders how infertility and its treatment transform family dynamics and relationships and the distribution of medical and marital power The chapters present informed and sophisticated investigations into cultural perceptions of infertility in numerous countries including China India the nations of sub Saharan Africa Vietnam Costa Rica Egypt Israel the United States and the nations of Europe Poised to become the quintessential reference on infertility from an international social science perspective Infertility around the Globe makes a powerful argument that involuntary childlessness is a complex phenomenon that has far reaching significance worldwide

Homologous Artificial Insemination (AIH) J.C. Emperaire, A. Audebert, E.S. Hafez, 2012-12-06 Andrology a counterpart to gynecology deals with the study of the male reproductive organs Clinical andrology has been neglected primarily because of the lack of relevant accurate laboratory methods for functional analysis but in the last decade substantial progress has been made in the understanding of male reproductive biology This progress has resulted from modern techniques and instrumentation in microanatomy immunology neurophysiology pathology genetics endocrinology biochemistry biophysics urology and surgery These studies are scattered in such a wide spectrum of journals that andrologists can hardly keep abreast of the advances There have been numerous textbooks on the testes male accessory organs and semen but the clinical aspects of andrology have not received similar emphasis Since literature concerning clinical andrology is extensive and widely scattered in many different publications we hope that a useful purpose will be served by summarizing the more pertinent material in a series of volumes which can be made readily available to students of andrology It was decided that a series of specialized monographs should be devoted to clinics in andrology These ten volumes of the series are an attempt to coordinate anatomical physiological biochemical endocrinological pharmacological and immunological aspects of the spermatozoa testes epididymis and other accessory genital organs Little is known about the effect of diet diseases environmental factors and drugs on male reproduction The interest in developing new male contraceptive methods will stimulate research in andrology

The Diagnosis and Treatment of Male Infertility Nabil Aziz, Ashok Agarwal, 2017-06-15 This case based guide is written from the clinician's perspective dealing with a defined male infertility problem tracing the actual clinical pathway arriving at the diagnosis and discussing the treatment options and the likely outcome Rather than focusing on excessive theoretical details each chapter presents a unique clinical vignette or scenario the relevant aspects of which are followed throughout the entire chapter correlating specific fertility issues with clinical findings describing treatment options prognoses and procedures when indicated and concluding with practical clinical pearls Opening with chapters describing current diagnoses of male infertility and semen analysis the subsequent cases presented cover a variety of relevant topics in male infertility including anabolic steroid use ejaculatory and erectile dysfunction azoospermia Klinefelter Syndrome varicocele cystic fibrosis and spinal cord injury Additional chapters discuss choosing the right assisted conception technique and developing and managing a sperm
