Reimagining The Nation:

Reimagining The Nation-State Jim Mac Laughlin, 2001-02-20 This book assesses competing modes of nation building and nationalism through a critical reappraisal of the works of key theorists such as Benedict Anderson and Eric Hobsbawm Exploring the processes of nation building from a variety of ethnic and social class contexts it focuses on the contested terrains within which nationalist ideologies are often rooted Mac Laughlin offers a theoretical and empirical analysis of nation building taking as a case study the historical connections between Ireland and Great Britain in the clash between big nation historic British nationalism on the one hand and minority Irish nationalism on the other Locating the origins of the historic nation in the seventeenth and eighteenth centuries Mac Laughlin emphasises the difficulties and specificities of minority nationalisms in the nineteenth century In so doing he calls for a place centred approach which recognises the symbolic and socio economic significance of territory to the different scales of nation building Exploring the evolution of Irish Nationalism Reimagining the Nation State also shows how minority nations can challenge the hegemony of dominant states and threaten the territorial integrity of historic nations

Reimagining National Belonging Robin Maria DeLugan, 2012-12-01 Reimagining National Belonging is the first sustained critical examination of post civil war El Salvador It describes how one nation after an extended and divisive conflict took up the challenge of generating social unity and shared meanings around ideas of the nation In tracing state led efforts to promote the concepts of national culture history and identity Robin DeLugan highlights the sites and practices as well as the complexities of nation building in the twenty first century Examining events that unfolded between 1992 and 2011 DeLugan both illustrates the idiosyncrasies of state and society in El Salvador and opens a larger portal into conditions of constructing a state in the present day around the globe particularly the process of democratization in an age of neoliberalism She demonstrates how academics culture experts popular media and the United Nations and other international agencies have all helped shape ideas about national belonging in El Salvador She also reveals the efforts that have been made to include populations that might have been overlooked including indigenous people and faraway citizens not living inside the country s borders And she describes how history and memory projects have begun to recall the nation s violent past with the goal of creating a more just and equitable nation This illuminating case study fills a gap in the scholarship about culture and society in contemporary El Salvador while offering an ethnography of the state that situates El Salvador in a global context

Reimagining the Nation Marjorie Ringrose, Adam J. Lerner, 1993 Capturing a wide spectrum of current thought on the construction of nationhood and national identity this work explores new ways of thinking about the concept of the nation and suggests possible ways of resisting its totalizing effects

Reimagining India McKinsey & Company, Inc., 2013-11-19 Reimagining India brings together leading thinkers from around the world to explore the challenges and opportunities faced by one of the most important and least understood nations on earth India s abundance of life vibrant chaotic and tumultuous has long been its foremost asset The nation s rising

economy and burgeoning middle class have earned India a place alongside China as one of the world's two indispensable emerging markets. At the same time India's tech-savvy entrepreneurs and rapidly globalizing firms are upending key sectors of the world economy. But what is India's true potential? And what can be done to unlock it? McKinsey Mukesh Ambani, CEO of India's largest private conglomerate; Microsoft founder Bill Gates; Google chairman Eric Schmidt; Harvard Business School dean Nitin Nohria; award-winning authors Suketu Mehta, *Maximum City* and Edward Luce, *In Spite of the Gods*; and Patrick French, *India: A Portrait*. Nandan Nilekani, Infosys cofounder and chairman of the Unique Identification Authority of India, and a host of other leading executives, entrepreneurs, economists, foreign policy experts, journalists, historians, and cultural luminaries. These essays explore topics like the strengths and weaknesses of India's political system, growth prospects for India's economy, the competitiveness of Indian firms, India's rising international profile, and the rapid evolution of India's culture. Over the next decade, India has the opportunity to show the rest of the developing world how open democratic societies can achieve high growth and shared prosperity. Contributors offer creative strategies for seizing that opportunity. But they also offer a frank assessment of the risks that India's social and political fractures will instead thwart progress, condemning hundreds of millions of people to enduring poverty. *Reimagining India* is a critical resource for readers seeking to understand how this vast and vital nation is changing and how it promises to change the world around us. *Reimagining Equality* Anita Hill, 2011

Home: a place that provides access to every opportunity America has to offer. A. H. P. vii **Imagining the Nation** Daina Stukuls Eglitis, 2004-12-15 Every epoch produces its own notions of social change, and the post-Communist societies of Eastern Europe are no exception. *Imagining the Nation* explores the fate of contemporary Latvia, a small country with a big story that is relevant for anyone wishing to better understand the nature of post-Communist transitions. As Latvia and other former Soviet bloc countries seek to rebuild and transform their societies, what is the central dynamic at work? In *Imagining the Nation*, Daina Stukuls Eglitis finds that in virtually all aspects of life, the guiding sentiment among Latvians has been a desire for normality in the wake of the deformations that marked the half-century of Soviet rule. In seeking to return to normality, many people look to the West for models; others look back in time to the period of Latvian independence from 1918 to 1940, before the years of Soviet domination. Ultimately, the changes in Latvia and other Eastern European countries are closely tied to a vital reimagining of the past, as the logic of progress long associated with revolution is amalgamated with nostalgia for what is gone. The radiant utopias of revolution give way to widely shared aspirations for a return to the normal in politics, place names, private property, and even gender relations. Eglitis draws upon published and unpublished documents, campaign posters, maps, and monuments, as well as interviews with Latvians from all walks of life. The resulting picture of life in contemporary Latvia offers a fresh perspective on a dilemma facing millions throughout the post-Communist world.

Reimagining the Nation Sutherland, Claire, 2017-06-21 This book develops new ways of thinking beyond the nation as a form of political community by seeking to transcend ethnonational categories of us and them Drawing on scholarship and cases spanning Pacific Asia and Europe it steps outside assumptions linking nation to state Accessible yet theoretically rich it explores how to think about nationhood beyond narrow binaries and even broader cosmopolitan ideals Using cutting edge critical research it fundamentally challenges the positive connotations of British patriotism and UK politics increasingly shrill anti immigrant discourse pointing to how these continue to reproduce vocabularies of belonging that are dependent on ethnonational and racialised categorisations With a cross continental focus this book offers alternative ways of thinking about togetherness and

belonging that are premised on mobility rather than rootedness thereby providing a constructive agenda for critical nationalism studies

Socio-Legal Struggles for Indigenous Self-Determination in Latin America Roger Merino, 2021-05-16 This book is an interdisciplinary study of struggles for indigenous self determination and the recognition of indigenous territorial rights in Latin America Studies of indigenous peoples opposition to extractive industries have tended to focus on its economic political or social aspects as if these were discrete dimensions of the conflict In contrast this book offers a comprehensive and interdisciplinary understanding of the tensions between indigenous peoples territorial rights and the governance of extractive industries and related state developmental policies Analysing the contentious process pushed by indigenous peoples for implementing pluri nationality against extractive projects and pro extractive policies the book compares the struggle for territorial rights in Bolivia Ecuador and Peru Centrally it argues that indigenous territorial defenses against the extractive industries articulate a politics of self determination that challenges coloniality as the foundation of the nation state The resource governance of the nation state assumes that indigenous peoples must be integrated or assimilated within

multicultural arrangements as ethnic minorities with proprietary entitlements so they can participate in the benefits of development. As the struggle for indigenous self-determination in Latin America maintains that indigenous peoples must not be considered as ethnic communities with property rights but as nations with territorial rights, this book argues that it offers a radical re-imagining of politics, development and constitutional arrangements. Drawing on detailed case studies, this book's multidisciplinary account of indigenous movements in Latin America will appeal to those with relevant interests in politics, law, sociology and development studies.

Reimagining Indian Country Nicolas G. Rosenthal, 2012-05-15. For decades, most American Indians have lived in cities, not on reservations or in rural areas. Still, scholars, policymakers and popular culture often regard Indians first as reservation peoples living apart from non-Native Americans. In this book, Nicolas Rosenthal reorients our understanding of the experience of American Indians by tracing their migration to cities, exploring the formation of urban Indian communities and delving into the shifting relationships between reservations and urban areas from the early twentieth century to the present. With a focus on Los Angeles, which by 1970 had more Native American inhabitants than any place outside the Navajo reservation, *Reimagining Indian Country* shows how cities have played a defining role in modern American Indian life and examines the evolution of Native American identity in recent decades. Rosenthal emphasizes the lived experiences of Native migrants in realms including education, labor, health, housing and social and political activism to understand how they adapted to an urban environment and to consider how they formed and continue to form new identities. Though still connected to the places where indigenous peoples have preserved their culture, Rosenthal argues that Indian identity must be understood as dynamic and fully enmeshed in modern global networks.

Reimagining Liberation Annette K. Joseph-Gabriel, 2019-12-30. Black women living in the French empire played a key role in the decolonial movements of the mid-twentieth century. Thinkers and activists, these women lived lives of commitment and risk that landed them in war zones and concentration camps and saw them declared enemies of the state. Annette K. Joseph-Gabriel mines published writings and untapped archives to reveal the anticolonialist endeavors of seven women. Though often overlooked today, Suzanne Césaire, Paulette Nardal, Eugénie Bouët-Lau, Jane Vialle, André Blouin, Aoua Kita and Eslanda Robeson took part in a forceful transnational movement. Their activism and thought challenged France's imperial system by shaping forms of citizenship that encouraged multiple cultural and racial identities. Expanding the possibilities of belonging beyond national and even Francophone borders, these women imagined new pan-African and pan-Caribbean identities informed by black feminist intellectual frameworks and practices. The visions they articulated also shifted the idea of citizenship itself, replacing a single form of collective identity and political participation with an expansive plurality of forms of belonging.

Cities Ash Amin, Nigel Thrift, 2002-04-22 This book develops a fresh and challenging perspective on the city Drawing on a wide and diverse range of material and texts it argues that too much contemporary urban theory is based on nostalgia for a humane face to face and bounded city Amin and Thrift maintain that the traditional divide between the city and the rest of the world has been perforated through urban encroachment the thickening of the links between the two and urbanization as a way of life They outline an innovative sociology of the city that scatters urban life along a series of sites and circulations reinstating previously suppressed areas of contemporary urban life from the presence of non human activity to the centrality of distant connections The implications of this viewpoint are traced through a series of chapters on power economy and democracy This concise and accessible book will be of interest to students and scholars in sociology geography urban studies cultural studies and politics
