**Re-Inventing the Corporation** John Naisbitt, 1985-09-01 **Finding a Solution to Leadership** Niels Brabandt, 2019-10-17 Business and employee management are key subjects in business administration For decades actually for centuries there has been a discussion about how effective leadership of people or employees can be realized It has always been a major concern within market based economic systems to learn how its products and services should be designed in order to generate consumer demand That the discussion about business and employee management is more relevant than ever is linked to the fact that leadership situations are influenced by a variety of external factors They include in particular political cultural social demographic economic and technological developments It is therefore required for business and employee management to be adapted to those external framework conditions on a permanent basis In former times the assumption in mainstream leadership research was that leadership success relied on specific personal

characteristics Later on the prevailing view was that the decisive factors in employee management lied in specific leadership behavior or leadership styles Today s research on leadership is dominated by situation oriented approaches providing for specific leadership concepts for specific organizational and employee related structures The present thesis is an attempt to bundle a variety of approaches to leadership with the aim of providing an overarching framework for concepts of a similar nature Therefore the leadership concept to be developed in what follows is to be characterized by the principles of holism and sustainability The first step is to present the fundamentals of leadership and management in order to introduce key terms and concepts and provide an overview of the research on leadership Chapter 3 deals with separately displaying the business and employee management approaches of various management pioneers distinguishing between early and contemporary pioneers Each approach is presented in consideration of its key elements its strengths and opportunities as well as its weaknesses and limitations The fourth chapter finally is devoted to developing a holistic and sustainable leadership concept

*Future* Lawrence R. Samuel, 2009-12-03 The history of our attitudes toward the possibilities of tomorrow A fascinating trek through American future visions from the 1920s to the present Lori C Walters Ph D University of Central Florida The future is not a fixed idea but a highly variable one that reflects the values of those who are imagining it By studying the ways that visionaries imagined the future particularly that of America in the past century much can be learned about the cultural dynamics of the times In this social history Lawrence R Samuel examines the future visions of intellectuals artists scientists businesspeople and others to tell a chronological story about the history of the future in the past century He defines six separate eras of future narratives from 1920 to the present day and argues that the milestones reached during these years especially related to air and space travel atomic and nuclear weapons the women s and civil rights movements and the advent of biological and genetic engineering sparked the possibilities of tomorrow in the public s imagination and helped make the twentieth century the first century to be significantly more about the future than the past The idea of the future grew both in volume and importance as it rode the technological wave into the new millennium and the author tracks the process by which most people to some degree have now become futurists as the need to anticipate tomorrow accelerates

**Work in the Spirit** Miroslav Volf, 2001-04-27 Since the rise of modern industrial society work has come to pervade and rule the lives of men and women Although there have been many popular books and church documents on the Christian understanding of work this is the first scholarly effort to articulate a developed Protestant theology of work In *Work in the Spirit* Miroslav Volf interprets work from a new perspective in terms of the doctrine of the Holy Spirit He exhaustively explores the nature of work in both capitalist and socialist societies and considers a variety of work including industrial agricultural medical political and artistic work Examining the importance of alienation in work in industrial and information societies particularly in the relation of workers to management and technology he analyzes various forms of such alienation and elucidates the character of humane work On the basis of the pneumatological theology of work that he develops Volf

rejects the traditional Protestant understanding of work as vocation and takes the concept of charisma as the cornerstone for his theological reflection on work. He denies that one is called to do a particular work irrespective of one's inclinations and asserts instead that it is our privilege to do the kind of work for which God's spirit has gifted us. All human work done in accordance with the will of God, Volf argues, is cooperation with God in the preservation and transformation of the world.
