**Reinventing Management** Julian Birkinshaw, 2012-04-25 The economic crisis was not just caused by a failure of regulation or economic policy it was a story of the failure of management in a fundamental sense a deeply flawed approach to management that encouraged bankers to pursue opportunities without regard for their long term consequences and to put their own interests ahead of those of their employers and their shareholders The revised edition of this best selling book shows convincingly that many of today's major economic problems in the west can be traced to a failure of management In this updated edition the author draws our attention to new examples of failed management from Rupert Murdoch's News Corp and the disaster at BP to the ongoing problems in financial services companies such as UBS and RBS Throughout the book the references and statistics have been updated to make this a current highly relevant analysis of the problems besetting modern business and how managers need to tackle them      **Reinventing Fire** Amory Lovins, 2013-10 Oil and coal have built our civilisation created our wealth and enriched the lives of billions Yet their rising costs to our security economy health and environment are starting to outweigh their benefits Moreover the tipping point where alternatives work better and compete purely on cost is not decades in the future it is here and now And that tipping point has become the fulcrum of

economic transformation In *Reinventing Fire* Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race not forced by public policy but led by business for long term advantage This independent and rigorous account offers market based solutions integrating transportation buildings industry and electricity It maps pathways for running a 158% bigger US economy in 2050 but needing no oil no coal no nuclear energy one third less natural gas and no new inventions This transition would cost 5 trillion less than business as usual without counting fossil fuels huge hidden costs Whether you care most about profits and jobs or national security or environmental stewardship climate and health *Reinventing Fire* makes sense It s a story of astounding opportunities for creating the new energy era
