Relations Dincertitude:

Pierre Teilhard De Chardin on People and Planet Celia Deane-Drummond, 2017-07-05 Humanity's relationship to nature is central to the work of Pierre Teilhard de Chardin an influential priest and scientist of the twentieth century Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity's understanding of its place in the world Pierre Teilhard de Chardin on People and Planet argues that Teilhard's cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality The book offers a critical revision of Teilhard's thought in the light of current debates in evolutionary science eco theology and environmental ethics The essays present fresh interpretations of Teilhard's work and point to the significance of his thought in the contemporary study of science and religion

Mécanique quantique Jean-Louis Basdevant, Jean Dalibard, Manuel Joffe, 2002

La-préhension du réel Andre Coret, 2021-09-01 Le réel est réellement non représentable telle est la découverte majeure que les scientifiques et les physiciens en particulier ont faite pour leur compte au cours du XXe siècle Mais le savent-ils The real is really unrepresentable this is the major discovery that scientists and physicists in particular have made on their own during the twentieth century

French XX Bibliography William J. Thompson, 2006-09 Provides a listing available of books articles and book reviews concerned with French literature since 1885 This work is a reference source in the study of modern French literature and culture The bibliography is divided into three major divisions general studies author subjects arranged alphabetically and cinema

Foundations and Interpretation of Quantum Mechanics Gennaro Auletta, Giorgio Parisi, 2001 The aim of this book is twofold to provide a comprehensive account of the foundations of the theory and to outline a theoretical and philosophical interpretation suggested from the results of the last twenty years There is a need to provide an account of the foundations of the theory because recent experience has largely confirmed the theory and offered a wealth of new discoveries and possibilities On the other side the following results have generated a new basis for discussing the problem of the interpretation the new developments in measurement theory the experimental generation of Schrödinger cats recent developments which allow for the first time the simultaneous measurement of complementary observables quantum information processing teleportation and computation To accomplish this task the book combines historical systematic and thematic approaches
