## **Relax Its Only Uncertainty Lead The Way When The Way Is Changing:**

**Relax, It's Only Uncertainty** Philip Hodgson, Randall White, 2001 Leading the way when the way is changing The Cynefin Mini-Book Greg Brougham, 2015-09-23 We all recognise that world is inherently complex but what does this mean From a theory perspective it means that it is an open system where the agents and the environment coevolve and influence each other This means that traditional approaches that are based on analysis no longer have agency and will not allow us to make sense of the world It is not about throwing the old out but understanding where existing practices are applicable and where we need to think a new This mini book started out as a series of papers that were experiential in nature and which were intended to provide an introduction to complexity theory the Cynefin framework in particular and some of its related practices These are simple practices that allow us to make sense of a complex world and allow us to establish what actions are appropriate and how we should act **Stand Out, Fit In, Have Fun** Jane Phillips, 2006 Our Grandchildren Redesigned Michael Bess, 2015-10-13 A panoramic overview of biotechnologies that can endlessly boost human capabilities and the drastic changes these superhuman traits could trigger Biotechnology is moving fast In the coming decades advanced pharmaceuticals bioelectronics and genetic interventions will be used not only to heal the sick but to boost human physical and mental performance to unprecedented levels People will have access to pills that make them stronger and faster informatic devices will interface seamlessly with the human brain and epigenetic modification may allow people to reshape their own physical and mental identities at will Until recently such major technological watersheds like the development of metal tools or the industrialization of manufacturing came about incrementally over centuries or longer People and social systems had time to adapt they gradually developed new values norms and habits to accommodate the transformed material conditions But contemporary society is dangerously unprepared for the dramatic changes it is about to experience down this road on which it is already advancing at an accelerating pace The results will no doubt be mixed People will live longer healthier lives will fine tune their own thought processes and will generate staggeringly complex and subtle forms of knowledge and insight But these technologies also threaten to widen the rift between rich and poor to generate new forms of social and economic division and to force people to engage in constant cycles of upgrades and boosts merely to keep up Individuals who boost their traits beyond a certain threshold may acquire such extreme capabilities that they will no longer be recognized as unambiguously human In this important and timely book prize winning historian Michael Bess provides a clear nontechnical overview of cutting edge biotechnology and paints a vivid portrait of a near future society in which bioenhancement has become a part of everyday life He surveys the ethical questions raised by the enhancement enterprise and explores the space for human agency in dealing with the challenges that these technologies will present Headed your way over the coming decades new biotechnologies that can powerfully alter your body and mind The possibilities are tantalizing Rejuvenation therapies offering much longer lives 160 and even beyond in full vigor and mental acuity Cognitive

enhancement through chemical or bioelectronic means the rough equivalent of doubling or tripling IQ scores Epigenetic tools for altering some of your genetically influenced traits at any point in your lifetime body shape athletic ability intelligence personality Bioelectronic devices for modulating your own brain processes including your pleasure centers a potentially non stop high Direct control of machines by thought and perhaps direct communication with other people brain to brain a new dimension of sharing and intimacy But some of the potential consequences are also alarming A growing rift between the biologically enhanced and those who can't afford such modifications A constant cycle of upgrades and boosts as the bar of normal rises ever higher Humans 95 Humans XP Humans 8 The fragmentation of humankind into rival bioenhancement clusters A gradually blurring boundary between person and product Extreme forms of self modification with some individuals no longer recognized as unambiguously human
